

GOVERNOR WILL GIVE
DEFENSE OF REFUSAL
TO SIGN SUFFOLK BILL

Mr. Draper Advised Court
Would Hold Appointment
of Commission on Expenses
of County Unconstitutional

MEASURE NOW LAW

Approval Is Given to Several
Bills Affecting Scituate,
New Bedford and Worcester—
Marblehead Causeway

Governor Draper will send to the Legislature on Tuesday the reasons why he is unable to sign the bill for the appointment of a commission by the supreme court for the apportionment of the county expenses of Suffolk county between Boston, Chelsea, Revere and Winthrop. It has been found that the provision for the appointment of a commission by the supreme court is probably unconstitutional.

The bill becomes a law today without the signature of the Governor. In explanation of this Secretary Murphy gave out the following statement:

"The Governor did not sign this bill because he was advised that it was very doubtful if the supreme judicial court would deem it constitutional to appoint the commission provided for in the bill, and being so advised he felt that it was improper for him to sign it."

"Had the Legislature been in session he would have called its attention to the matter so that this detail of the bill might have been corrected, but having adjourned on Friday afternoon and the bill becoming a law on Saturday afternoon it was impossible to have the bill withdrawn."

"The Governor is entirely in sympathy with the object of the bill and would have been glad to sign it had it not been for this provision in it which he is informed is unconstitutional."

"Under the circumstances he has decided to allow it to become a law because it can make conditions no worse than they are at present. This statement is made in order that the latter may be called to the attention of the Legislature, so that if it is desired to take any further action in the matter it can be done at this session of the General Court."

Governor Draper has signed the following bills:

To appropriate \$25,000 for dredging Plum Island river in the city of Newburyport contingent upon an appropriation by the United States of a like amount.

To make married women holding property to the amount of \$2000 or more jointly liable with their husbands for bills for necessities up to \$100.

To reconstruct the sea wall at Scituate. To increase the number of deputies of the commission of fisheries and game by six, with one additional for Nantucket.

For a farm school in the city of Worcester.

For the textile school in the city of New Bedford.

The Marblehead causeway bill for the construction of a breakwater and highway between the town and Marblehead Neck, for which \$50,000 is appropriated, becomes a law without the Governor's signature. This bill puts 65 per cent of the cost on the state, 25 per cent on the county of Essex and 10 per cent on the town.

HARVARD TABLET
TO HONOR HEROES

A feature of special interest in the observance of the national holiday in memory of the soldiers who fell in the civil war, next Monday, will be the dedication of the bronze memorial tablet to Harvard men who lost their lives in the Spanish-American war, which has been placed in the Harvard Union building at Cambridge, Mass.

This tablet was designed and executed by sculptor Bela L. Pratt of Boston and is eight feet long and about 4 1/2 feet wide. It represents an eagle with outstretched wings, beneath which on either side are inscribed the names of the 11 Harvard men whose deeds it commemorates.

MISS AYER WEDS ARMY OFFICER.

BEVERLY, Mass.—Miss Beatrice Banning Ayer, daughter of Mr. and Mrs. Frederick Ayer of 385 Commonwealth avenue, Boston, became the wife of Lieut. George S. Patton, Jr., fifteenth United States cavalry, son of Mr. and Mrs. George S. Patton of San Gabriel, Cal., late Thursday at Beverly Farms. The ceremony took place at the residence of the Ayers at Prides Crossing. The Rev. Dr. George A. Gordon of the Old South church of Boston performed the ceremony. The ushers, all military men, were in uniform.

MR. WINTHROP TO NEWPORT.

WASHINGTON—Beekman Winthrop, assistant secretary of the navy, will leave Washington today for Newport, R. I., where next Wednesday he is to deliver an address to the naval war college.

Assistant Secretary Under
Mr. Roosevelt Is Being
Discussed for Vacancy

RUDOLPH FORSTER.
Assistant secretary to the President,
retained from the force under
Mr. Loeb.

MAY NAME BOSTON
MAN AS SECRETARY
FOR THE PRESIDENT

WASHINGTON—The capital is busily discussing today the abrupt termination of Fred W. Carpenter's services as secretary to the President, and the possible successors to the position.

Prominent among those mentioned for the post are Messrs. Charles D. Hilles and Charles D. Norton, both assistant secretaries of the treasury. It is said that the choice lies between them.

It is thought both know more of politics and have a better acquaintance with public men, and also are more adept in handling the large situations apt to arise in the office of the President, and in particular are better qualified to present the many favorable accomplishments of the President to the public than has been the case for some time.

Another man mentioned as a possible successor and one that is thoroughly familiar with the duties of the office is Rudolph Forster, one of the two assistant secretaries. Mr. Forster, it is pointed out, has been with the department and close to the affairs of the office so that it would be a simple matter for him to take up the duties. It is possible that he will be appointed temporarily to the position.

Louis A. Coolidge of Boston, formerly assistant secretary of the treasury, is also mentioned for the post; also Alfred E. Lunt of Boston, connected with the Republican College League and formerly president of the Harvard Republican Club.

It is admitted on all sides here today that Mr. Carpenter as minister to Morocco to replace H. Percival Dodge of Boston, who will be promoted, was brought about solely by the unfortunate circumstances of Mr. Tawney's criticism of the President's traveling expenses made in the House. This information, it is explained, emanated from Mr. Carpenter.

The incident of Mr. Taft's travels is said to have brought to a climax a long string of undiplomatic actions on the part of Mr. Carpenter.

URGE CULTIVATION
OF PUBLIC TASTE

The informal farewell luncheon of the Twentieth Century Club was held at 1 o'clock this afternoon. Samuel L. Crothers of Cambridge and Arthur Fairbanks of the Museum of Fine Arts were the principal speakers. Mr. Crothers spoke on Theodore Parker and Mr. Fairbanks took for his topic "The Forming of Taste in the Community."

Mr. Fairbanks said: "The forces at work to set standards for color designs, decorations, furniture, etc., are not so much the public school as the colored supplements of the Sunday newspapers, and perhaps the greatest force of all is the department store. Is it not a suitable work for the Twentieth Century Club to investigate what may be done in the effort to train the taste of the community?"

TUFTS MAN MADE DELEGATE.

Dr. Lawrence B. Evans of Tufts history and public law departments, has been appointed delegate from the Episcopal Club of Massachusetts to the national conference of church clubs in Portland June 7 and 8.

SHOE AND LEATHER TO MEET.

A shoe and leather convention and field day will be held in Boston July 14 under the auspices of the allied trade organizations of New England.

ATTORNEY VERTREES
FOR DEFENSE MAKES
SCATHING ARGUMENT

Declares That Secretary Ballinger Is the Victim of the
"Pinchot-Garfield-Glavis"
Combination.

PRAISES HIS WORK

WASHINGTON—A vigorous defense of Secretary of the Interior Ballinger's policy with regard to the Cunningham claims as "single-minded, honest and straightforward," was the basis of the argument today before the congressional investigation committee by Attorney J. J. Vertrees, counsel for the "defense."

The Tennessee lawyer bitterly arraigned "that Pinchot-Garfield-Glavis outfit," denounced them as foolish visionaries, and held up Secretary of the Interior Ballinger as a public servant without a peer.

When the committee met, Representative McCall read a letter to Senator Nelson from Oscar Lawler, assistant attorney-general of the interior department, retracting and apologizing for the statements which he had made on the witness stand against C. P. Connolly, a magazine writer. Attorney Lawler declared that Mr. Connolly was guilty of cowardice on the steamer Republic disaster. In the letter Mr. Lawler stated that it subsequently developed that C. P. Connolly was not the man, and that James B. Connolly, who was charged by a steward with cowardice on that occasion, had proved the charges unfounded and was only prevented from prosecuting the author of the statements by the fact that he had fled to Canada. Mr. Connolly had filed suit for \$20,000 libel against Mr. Lawler.

Attorney Vertrees declared that there had never been presented to the land office a more valid claim than that of the Cummings. He insisted that even if Mr. Ballinger had been censorable for grossly unethical conduct in drawing an affidavit for Clarence Cunningham, the

(Continued on Page Eight, Column One.)

AVIATORS MAY MEET
IN AIR AS THEY CROSS
THE ENGLISH CHANNEL

DOVER, Eng.—The Hon. Charles Stewart Rolls was expected to start on a round trip transchannel aeroplane flight from Dover to Calais, without alighting this afternoon. At Calais Hubert Latham, one of the most daring of the French aviators, had his Antoinette monoplane ready for a flight to Dover and return and the possibility of a midair meeting between the two above the English channel brought large crowds to both the French and English shores.

Mr. Rolls started on a similar trip Friday, but a defect in his Wright biplane forced him to descend before reaching the channel.

Compared with M. Latham, Mr. Rolls is a novice in aviation and had never attempted anything so pretentious as a transchannel flight. M. Latham, however, had twice fallen into the channel in an aeroplane, and lost the initial honor to Louis Bleriot, who on July 25, 1909, flew from Calais to a point near Dover.

Last Saturday Count Jacques de Lesseps duplicated M. Bleriot's performance. Count de Lesseps hoped to make the return trip after a brief stop on the English coast, but a strong wind held him back. The Ruinart prize of \$2500 goes to the one who first makes a round trip across the channel within 24 hours.

Mr. Rolls is one of the prominent politicians and manufacturers of England. He is captain of the London section of the army motor reserve and managing director of the Rolls-Royce Company, motor car manufacturers. He is the third son of Baron Llangatock. Mr. Rolls was a pioneer in the automobile business in England, but of late months has been devoting most of his time to aeronautics.

He is one of the founders of the Aero Club of the United Kingdom and a member of the Aero Club de France.

Mr. Curtiss Ready for Trip
but Wind Prevents Start

ALBANY, N. Y.—Glenn H. Curtiss did not fly in his aeroplane from Albany to New York today. He was at the starting point, gave his machine an overhaul, got into his aviator's costume, sent Mrs. Curtiss across the river to where a special train was in waiting to follow him and declared conditions ideal. A few minutes later he got out of his machine, wig-wagged a signal across the river to Mrs. Curtiss and announced that the wind had risen and the weather was

(Continued on Page Eight, Column Three.)

ALL AROUND CLUB RECEIVES.

The All Around Club of the women of Tufts College gave its annual reception to the senior class Friday evening. A dance followed.

ORCHID EXHIBITION
IS BIG ATTRACTION
TO FLOWER LOVERS

Show Will Continue Through
Memorial Day and Is
Drawing Many Horticulturists
of Note to Boston.

MEDAL FOR AZALEAS

The orchid show is being visited today by the largest number of people attending on any day since the opening on Thursday evening. The exhibition will continue through Sunday and Monday, afternoon and evening. On Monday the doors of Horticultural hall will be open at 10 a. m.

The officials of the society and the exhibitors are delighted with the continued fresh appearance of the orchids. The owners or their representatives are in constant attendance at the valuable exhibits, and it is due to this fact that the flowers are kept in such perfect condition.

Professor Sargent's azaleas are a never-failing source of delight to the visitors. Through an oversight The Monitor account of the awards of prizes omitted mention of the award of a gold medal to this remarkable collection.

A silver medal has been awarded to the exhibition of tree peonies from the Japanese gardens at Holm Lea.

An interesting feature at the exhibition today is the number of signs indicating that valuable specimens have been sold. Some of these transactions, it is said, represent as high as \$1200 for a single plant, and sales at from \$10 to \$25 are quite frequently made.

The exhibition has had the result of bringing together orchid fanciers from many parts of the country, both amateurs and professionals, which is expected to give orchid growing an impetus such as it has never before received in this or any other country.

There was an impromptu gathering of ex-orchid hunters in the large hall when three men met and discovered that each of them had made from one to three trips each into the depths of the Brazilian forest and brought crates of the precious flowers out of the jungle either by way of the rivers or by arduous journeys over the mountains of Peru and Brazil.

An especially pleasing feature of the show are the concerts given by the Boston Philharmonic Orchestra afternoons and evenings. This evening the program will be: March, "The Gladiator," Sousa; overture, "Barber of Seville," Rossini; "Spring Song," Mendelssohn; "Song Without Words," Tschai-kowsky; selection, "Havana," Stuart; Egyptian ballet, Luigini; solo for cello, selected, Carl W. Dodge; waltz, "Artist's Life," Strauss; selection, "Il Trovatore," Verdi; Italian dance, "Tribute of Zadora," Gounod; finale, "America."

MILITIA OFFICERS
START TO FT. RILEY
SCHOOL ON SUNDAY

Traveling in a special car, en route to the national militia officers school at Ft. Riley, Kan., 17 officers of the cavalry and field artillery forces of the Massachusetts volunteer militia will leave the North station at 12:30 o'clock Sunday noon on the Continental Limited, reaching their destination at 2:30 o'clock Tuesday afternoon.

Massachusetts is sending the largest representation of any state in the Union to the school, which is held this year for the first time. The officers will carry with them their uniforms, equipments, blankets and bedding, and will receive pay. The school begins Wednesday and continues until June 30, but the officers are not required to take the full course. The courses are divided into three periods of 10 days each. They will live in tents.

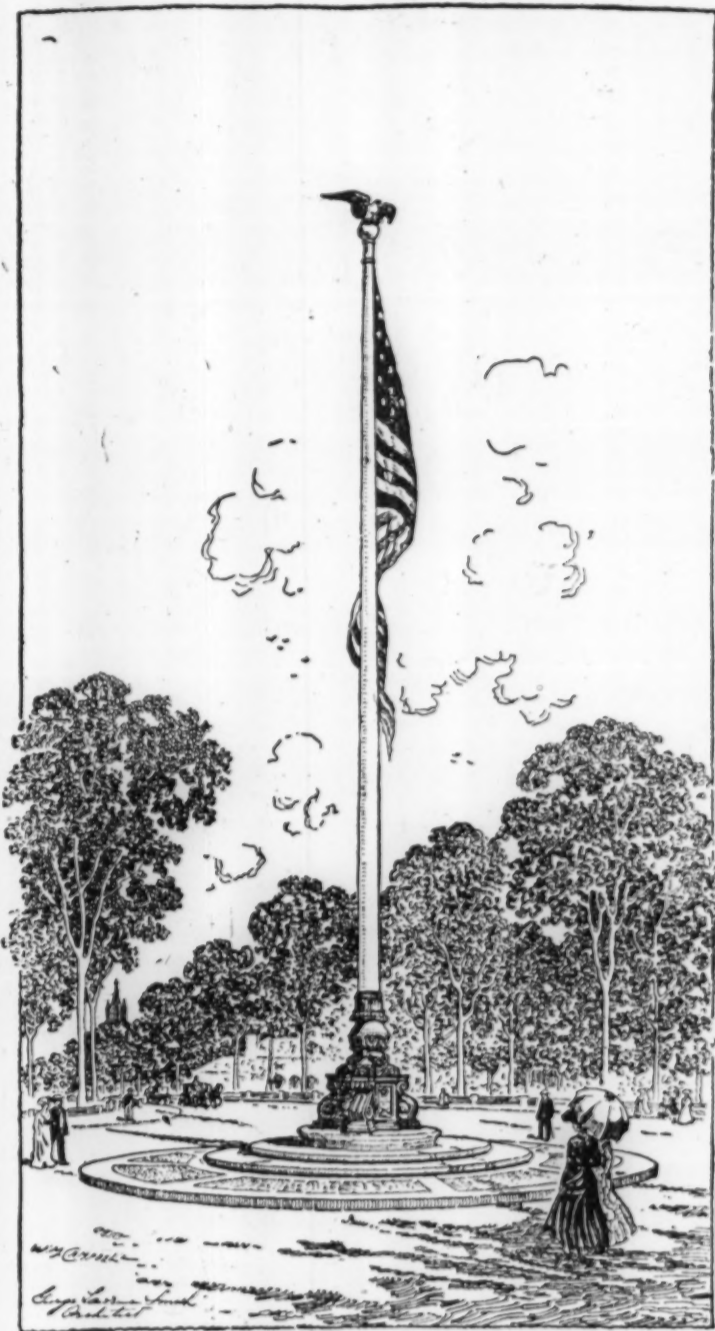

Maj. Charles F. Sargent of Lawrence, battalion commander of the M. V. M. field artillery, will be in command of the officers going west Sunday. The others in the party will be Capt. C. A. Salisbury of Lawrence, field artillery battalion adjutant; Capt. Joseph A. Smith of Worcester, field artillery paymaster; Second Lieut. Nicholas J. Skerrett of Worcester, battalion quartermaster and commissary officer; First Lieut. Roger D. Swain of light battery A, Boston; First Lieut. Nicholas J. Smith and John F. J. Herbert of light battery B, Worcester; Capt. Louis S. Cox, First Lieut. Alexander S. McGregor and Ernest O. Dick, Second Lieuts. Arthur J. Roberts and Thorndike D. Howe of light battery C, Lawrence; First Lieut. John W. Hall, cavalry squadron adjutant of Boston; First Lieut. Charles B. Appleton of Second Lieut. John Kenney, troop A, cavalry, Boston; Capt. William L. Swan, troop C, cavalry, Cambridge; Capt. Charles A. Schmitt and First Lieut. Frank J. Giggins, troop D, Boston.

FIRE DESTROYS WAREHOUSES.

MINNEAPOLIS—Fire destroyed several of the largest agricultural implement warehouses in the West early today. The loss is estimated at considerably more than \$1,000,000.

STAFF FOR "OLD GLORY"

Hannah Winthrop Chapter, D.A.R., to raise \$8000 or \$9000 for new Cambridge flag memorial.

DESIGN BY GEORGE LAWRENCE SMITH.
The old flagstaff was taken down when the subway was started; present plans contemplate an ornamental bronze pedestal with four inscribed tablets.

A FINE memorial flagstaff, it is expected, will be placed at the junction of Garden street and Massachusetts avenue, Cambridge, within a few months. Hannah Winthrop chapter, Daughters of the American Revolution, has started to raise \$8000 or \$9000 for this purpose. The old flagstaff was taken down when the subway was started on the former site a few rods away from the new location.

The new flagstaff will be placed in an ornamental bronze pedestal, resting on a circular granite base and seat. A bronze ball and eagle will surmount the staff. Around the pedestal will be four bronze tablets, inscribed with the names of Cambridge soldiers and patriots who lost their lives in the American revolution.

The design here presented is by George Lawrence Smith. It is approved by the Cambridge Municipal Art Society and by eminent architects and critics. The money needed will be raised by popular subscription, and it is hoped may be secured by July 1 in order to finish the work this summer.

Subscription blanks may be signed at the public library, city hall, Cambridge Savings Bank and elsewhere. Oscar F. Allen, treasurer of the Cambridge Savings Bank, will act as treasurer of the fund.

MANCHESTER, Mass.—The Manchester Yacht Club defender of the Seawanhaka cup was launched this afternoon in the presence of many yachtsmen from Boston, Marblehead and other centers at Fenton's yard, being christened the Massachusetts by Miss Edith Bremer, daughter of Commodore S. Parker Bremer of the Manchester Yacht Club.

The new yacht was designed by E. A. Boardman. She is of light draft and provided with a double rudder. She will carry a crew of four men. Designer Boardman will handle the tiller and Counselman John L. Saltonstall of Beverly, R. de B. Boardman of Beverly Farms and Eliot Wardsworth of Boston will make up the crew, which is limited to 750 pounds and caused some clever figuring to get skilled yachtsmen who would come under the weight.

The challenger for the Seawanhaka cup will be sailed by George H. Dugan. The first race will be sailed on July 25.

KELIHER WITNESS
IS ORDERED HELD

Ast. U. S. Atty. William H. Garland asked the federal officials in New York today to hold James Strausneider in bail of \$25,000 for three weeks as a witness against William J. Keliher, now on trial in the United States circuit court on the charge of aiding George W. Coleman in looting the National City Bank of Cambridge. Strausneider was arrested in Brooklyn Friday night. Strausneider said he was a broker. In default of bail he went to jail.

This morning George W. Coleman at the office of United States Marshal Guy Murchie, went over the deposit ledger of the National City Bank showing Harvey H. Pratt, counsel for Keliher, how he had juggled the figures and concealed the fact from the bank officials and the national bank examiner

PATRIOTIC SOCIETIES
PLAN FOR MEMORIAL
DAY'S OBSERVANCE

Grand Army Posts and Affiliated Organizations Prepare
Varied Programs for Boston
and Suburbs.

SUNDAY'S SERVICES

Other Events of the Day Will
Be a Tablet Unveiling at
Harvard, Athletic Contests
and Workhorse Parade.

Many organizations will contribute to the varied program for the Memorial day observances in Boston and vicinity Monday. Foremost among these are the G. A. R. posts, and their affiliated organizations, the Woman's Relief Corps, the Ladies of the G. A. R., and the Sons of Veterans, all of which have prepared elaborate programs.

At Harvard University the bronze memorial to Harvard men who lost their lives in the Spanish war will be unveiled. Special services will be held in many of the churches Sunday and Monday.

The Workhorse Parade Association will add new features to its annual parade and in the field of sports leading events will be the boat races on the Charles, between Stone school and Cascadilla in the morning and between the Harvard and Cornell varsity crews and the Harvard and Cornell freshmen crews in the afternoon.

J. B. Lewis of Boston, national patriotic instructor, G. A. R., in an address to veterans, patriotic societies and people at large today says in part:

"This custom, participated in by millions of Americans, does much to keep alive the spirit of patriotism and love of country, and furnishes the inspiration which comes from the contemplation of deeds of heroism and unselfishness."

"Especially on this day should all animosities be forgotten. In the universal thankfulness for a united country, the passion engendered by strife has been mostly obliterated, and today both blue and gray rejoice in a union of states in a common country, extending from ocean to ocean and from lakes to gulf, under one glorious flag—Americans all."

In Boston the leading feature of the G. A. R. program will be the memorial exercises in Tremont Temple under the auspices of Edward W. Kinsley post, No. 113, Maj. Albion P. Pease commander. The post will assemble at headquarters, Ford hall, at 8:15 a. m., and march to the monument on the Common.

At the conclusion of the exercises the column will march to Tremont Temple. The services at the temple will commence at 10:30 o'clock and will include a reception to the colors, the recital of President Lincoln's Gettysburg address by Warren Russell of the Oliver Wendell Holmes school, Dorchester; introduction of the orator by the Rev. Edward Anderson, oration by Gen. John C. Black of Illinois, post chaplain's address. At the conclusion of the Temple exercises the post will reassemble, and, escorted by the band, march to Kinsley hall.

On Sunday morning the post will attend special services at Tremont Temple. Other Sunday services will be as follows:

Gettysburg post 191, Charles H. Shaw commander, will attend special services at St. Mark's M. E. church, Brookline. Under escort of the National Lancers, Troop A, M. V. M., Charles Russell Lowell post 7 will march to the Clarendon Street Baptist church to attend the morning service, which will be conducted by the Rev. James A. Francis.

Dahlgren post 2, under escort of the S. of V., will march to Phillips Congregational church, and attend special services at 10:30 o'clock and listen to a sermon by the Rev. F. B. Richards. Washington post 32, escorted by Maj. M. J. O'Connor camp, S. W. V., will attend service at the Barham Memorial church, Dorchester and Vinton streets, South Boston. The Rev. Mr. Heath will preach the sermon.

John A. Andrew post 15 will assemble at headquarters at 9 a. m. and, escorted by the battalion and band, the post will march to Union church, Columbus avenue, where the members will hear a memorial sermon by the Rev. Allen A. Stockdale.

Thomas G. Stevenson post 26, under escort of troop D, squadron cavalry, M. V. M., will march to the Congregational church on Humboldt avenue. The comrades of John A. Hawes post 159 will assemble at headquarters Sunday evening at 6:30 o'clock and march to Meridian Street M. E. church and Bethel to attend memorial services by invitation of the Rev. O. E. Mark. John A. Hawes W. R. C. and the associate members are invited to attend.

The comrades of Maj. G. L. Stearns post, with the W. R. C. and S. of V., will attend the First Parish church, Harvard street, Charlestown.

Under the auspices of Washburn post 92 special services will be held at the First Parish (Unitarian) church, Chestnut avenue, Brighton, on Sunday at 2:30

(Continued on Page Nine, Column Five.)

Leading Events in Athletic World U. of P. the Favorite

HARVARD VARSITY AND FRESHMAN CREWS READY FOR CORNELL

Coach Wray Well Pleased With His Two Eights and Confident of Making Good Showing.

1913 BOAT IS FAST

The Harvard varsity and freshman eights have concluded a week of rather light work in preparation for the races which take place with the Cornell varsity and freshmen on the Charles river next Monday. Coach Wray is well pleased with the work of both crews and feels confident that they will acquit themselves well in the coming races.

The freshman crew will present one of the fastest freshman combinations ever seen on the Charles. On the same day that the varsity beat the record for the two-mile course the 1913 crew broke the record of 9m. 54s. by almost a minute.

In Capt. A. M. Goodale, the old Cambridge Latin and Noble's oar, the freshman eight has a remarkable stroke, with smoothness, power and the ability to drive a crew. Goodale has displayed such magnificent form this season that many believe he will displace R. W. Cutler at stroke on the varsity crew next year.

Moffat, Stratton and Keays complete a heavy and powerful stern four. The bow four has been subjected to many changes recently on account of the loss of Nelson, a former Minnesota Boat Club oarsman, who has been declared ineligible to row, since he is ranked as a special student. Lincoln has been shifted from 2 to 4, G. Cutler has changed from 6 to 2, Meyer placed at bow, and Parmenter at 3, after many trials. Parker, Morgan and Roosevelt have also been tried at bow, but Meyer has been given the place as the slides move smoothly than with the other men, although the cover of a few weeks ago is a trifle decreased. Taken as a whole, however, the freshman eight presents a combination so strong that Coach Wray expects a victory over both Cornell and Yale.

The crews will row on Monday in the following order:

HARVARD.
Varsity—Cutler, stroke; Wald (captain); T. Newton, 6; Bacon, 5; Withington, 4; Balch, 3; Sargent, 2; Whitney, bow; King, coxswain.
Freshman—Goodale, stroke; Moffat, T. Stratton, 6; Keays, 5; Lincoln, 4; Parmenter, 3; Cutler, 2; Meyer, bow; Ables, coxswain.

CALIPH REACHES HAVANA FIRST

HAVANA.—The Caliph, running under the full capacity of her 60-horsepower engine, and with foresail and jib set, was the first boat to reach Havana in the ocean motor boat race which started at Philadelphia last Saturday.

She whizzed across the finish line between Morro Castle lighthouse and a buoy across the mouth of the harbor at 6:03:14 Friday evening. The Berney crossed at 7:04 p. m. The Caroline and the Ilya have not yet been reported.

While the Caliph led the Berney by 1h. 1m. 14s., the race thus far is to the advantage, by reason of handicap, of the Berney by 3h. 22m. 13s. The Caliph had a time allowance of 7h. 12m. 40s., and the Berney one of 11h. 35m. 7s. The Berney, however, cannot yet be proclaimed the winner, as the little Ilya and the Caroline both have large handicaps, the former 10h. 3m. 7s. and the latter 18h. 12m. 40s.

WOODLAWN GOLF CONTINUES TODAY

Semi-Final Round This Forenoon—Low Handicap Men Disposed of Rapidly in Friday's Play.

The semi-final round of the Woodlawn open amateur tourney was played this forenoon with H. Schmidt of Worcester vs. G. McC. Sargent (invited) and W. Stucklen, Brae Burn vs. H. B. Wood of Columbia, N. Y., in the first division. In the second division W. L. Swan of Wollaston plays K. Schmidt of Worcester and B. S. Turpen of Harvard. In the third division H. B. Cook of Albemarle plays S. E. Thayer of Woodlawn and C. D. Hodges of Crown Point with M. L. Crosby of Chestnut Hill. The finals will be played this afternoon.

Low-handicap golfers in the state association were disposed of in rapid-fire order yesterday in the chief division match play. Lockwood, Zublin, Sproule and Farrington all went out, and by their elimination a complete chapter of upsets was recorded in the second round.

The summary of the second round is as follows:

FIRST DIVISION.
Second round—Schmidt defeated Farrington, 5 and 4; Sargent defeated Lockwood, 1 up; Stucklen defeated Sproule, 2 and 1; Wood defeated Zublin, 1 up.

SECOND DIVISION.
Second round—Swan (12) defeated Jewett (12), 1 up; Schmidt (10) defeated Hartwell (8), 5 and 4; Turpen (9) defeated O'Donnell (10), 1 up; Lyman (9) defeated Becker (5), 5 and 4.

THIRD DIVISION.
Second round—Cook (9), defeated Trifton (12), 5 and 4; Thayer (7) defeated Newell (9), 4 and 3; Hodges (22) defeated Fisher (8), 2 up; Crosby (8) defeated McMillan (13), 4 and 2.

HERRESHOFF AND TRAVERS TODAY

Ex-Champions Meet in Final Round of Metropolitan Golf Association for Title of 1910.

NEW YORK.—Fred Herreshoff of Westbrook meets J. D. Travers of Montclair today in the final round of the Metropolitan Golf Association championship tournament over the Morris County Links. A year ago at Apawamis Herreshoff's opponent in the final round was Walter J. Travis.

In working their way to the semi-final bracket the two survivors were compelled to eliminate two champions. Travers began by defeating Max Behr, the New Jersey title holder, and Herreshoff downed C. H. Brown, who a year ago succeeded Gilman P. Tiffany as the champion of the Hudson River League. Other third-round winners were Gardner White, the best of the interscholastic set, and E. M. Wild, who disposed of A. F. Kammer of Fox Hills. White defeated John M. Ward and incidentally squared accounts for the beating the veteran handed him in the recent Garden City tournament.

CHAMPIONSHIP.
Third round—G. W. White, Oakland, beat J. M. Ward, Garden City, 4 up and 3 to play; Fred Herreshoff, Westbrook, beat C. H. Brown, Seagrove, 6 up and 5 to play; Jerome D. Travers, Montclair, beat Max Behr, Morris County, 6 up and 4 to play; E. M. Wild, Cranford, beat A. F. Kammer, Fox Hills, 3 up and 2 to play.

Semi-final round—Herreshoff beat White, 5 up and 3 to play; Travers beat Wild, 6 up and 5 to play.

BAY STATE GOLF DATES ARE NAMED

Secretary R. R. Freeman of the Massachusetts Golf Association has sent out the schedules for the amateur and open championship tournaments of his association for the titles of 1910.

The amateur tourney will be held June 15, 16, 17 and 18 on the links of the Brae-Burn Country Club, West Newton.

The open championship will be held on the links of the Essex Country Club, Manchester, July 13 and 14.

SCHOOL PITCHERS SHOWING UP WELL

English High Still Undefeated in the Interscholastic League, But Beaten by Groton and Concord.

With only three more weeks to make a showing, the Greater Boston high school teams are working hard to end the season with a respectable amount of victories to their credit.

English high, which up to last Monday was recognized as the only undefeated team among the schools, met its conqueror at Groton academy, and again on Tuesday the Concord school showed them the way to the plate. Both of these games were close, and should have been victories for the local school, but errors allowed the others to take a lead which was too much of a handicap to overcome. They came back strongly on Thursday and defeated Rindge Manual Training school in an "Interscholastic League" game. O'Brien of Rindge displayed that he is premier shortstop among the school boys again this year.

The pitchers this year have had a great deal to do with the victories of their respective teams. No less than four no-hit no-run games have been pitched by men who early in the season were not regarded as exceptionally good. There also seems to be an abundance of twirlers who are making their opponents strike out. Among the boys, who have made records, are Davis of Lynn English high, Worcester of Newburyport high, Hernandez of Stone School, Brennan of Dorchester high, Gaw of Newton, Fahy of Medford, Laurie of Somerville, Callahan and Norton of Commerce, Gram of Melrose, and Devine of English.

English high should win the Interscholastic League title, as it has victories over all of the other contestants. Malden has been playing the best ball among the Suburban League schools, although Everett, which was defeated by Malden three weeks ago, has regained its former standing, and may upset things before the season is over. On Wednesday they played a tie game with the strong Commerce team Medford and Melrose have good pitchers but are not backing them up properly.

Commercial high is far superior to any of its rivals in the Boston high school race, and they should arrange a game with English high to settle the championship of the city. It would be a great contest. Boston Latin has been coming to the front of late and will give the others a good battle from now on.

The Preparatory League started this week, and it is a toss up between Newton and Brookline for the championship. Newton looks the better. Cambridge Latin, the other member, is playing good ball. Arlington, Waltham, Wakefield and Lynn Classical are showing up best of the out of town schools.

Noble and Greenough is leading the private school teams, having won over nearly all of the others. Stone school is its nearest rival, while Volkmann and Brown and Nichols are showing up well.

TENNIS MATCH AT BRAE-BURN TODAY

The Massachusetts lawn tennis doubles championship tourney starts this afternoon at 3 o'clock at the Brae-Burn Country Club. When the pairings were made Friday afternoon 32 pairs were drawn.

There will be a new doubles championship team, for Beals C. Wright, who with Frank C. Sullivan won the title the last two years, is in Europe, and Sullivan this year is paired with D. P. Rhodes of the Longwood Cricket Club.

The pairings:

B. O. Wellington and A. M. Hallow vs. F. W. Wise and H. Davenport.
W. Carl and P. B. Large, Jr. vs. C. E. Baker and H. C. Brown.
J. F. Sullivan and D. P. Rhodes vs. R. C. Seaver and Richard Bishop.
W. C. Bruckman and F. J. Rhodes vs. E. R. Leonard.
G. T. Putnam and H. F. Holt vs. J. E. Kent and partner.
C. B. Wilbur and T. B. Plympton vs. W. Rice and E. M. Currier.
F. G. Fogarty and M. D. Brice.
D. T. Cummings and M. D. Brice vs. D. Niles and H. Plympton.
H. Wesslock and F. A. Hinchliffe vs. N. E. Porter and E. Barker.

AMHERST BEATS DARTMOUTH TEAM

AMHERST, Mass.—Amherst won Friday's game with Dartmouth, 5 to 2. The game was won in the eighth inning, when Amherst secured four runs. Both McLure and Mitchell pitched good ball, five strikeouts being the tally of each. Mitchell pitched in particularly fine form throughout the game. The score:

Innings..... 1 2 3 4 5 6 7 8 9 R H E.
Amherst..... 0 0 0 1 0 0 4 - 5 5 2
Dartmouth..... 0 0 0 0 0 1 1 0 - 2 7 2
Batteries, McLure and Henry; Mitchell and Chadbourne, Elcock, Umpire, Foley.

HARRY NILES TO LEAVE BOSTON.

Harry Niles has been sold to Cleveland, which has been trying for some time to get him. With Lewis, Speaker and Hooper in the Boston outfield there was little chance for Niles to get into the game, although he is a hard-working, conscientious ball player and a prime favorite with the Boston public.

WON HEAT IN SHORT DASH.

R. COOKE '10.
Princeton varsity track team.

RATIONAL GOLF BY JASON ROGERS.

Today we will consider the faulty grip shown yesterday from above. Compare the illustration presented on Wednesday last with the one below, and it will be seen how much farther under the club the two hands really are. This under the hand intensifies the likelihood of a hammer-like blow. It is an easier way to get a ball of very moderate flight, for the wrists do not get an opportunity to properly assert their influence in the stroke.

No more than the first joints of the left fingers should be seen by the player as he stands in his address to the ball, and no more than the second joints of the right fingers.

The results of this will be that the shaft of the club will point up at a much

lower angle than if the club is held with the hands around or under the club.

If you have noticed the best professionals drive you will have discovered that they always play with the hands lower down than the average amateur.

They stand farther away from the ball, and, with the hands lower, get a flatter oval in the swing to the ball and during the follow through, and greater power than the more chopping blow of the amateur.

By advising the player to stand farther away from the ball and keep the hands lower I don't wish to be understood as asking him to get so far away as to have to reach for the ball or to make the toe of the club stick up with its heel to the ground.

R. I. STATE WILL HOLD DUAL MEET

KINGSTON, R. I.—At a special meeting of the Rhode Island State College Athletic Association it was voted to hold the first intercollegiate track meet that the college has ever participated in at the West Kingston fair grounds May 30, Memorial day, with New Hampshire State College of Durham.

The events will include 120-yard hurdles, 16-pound hammer, half-mile run, 220-yard hurdles, high jump, 220-yard dash, 100-yard dash, 440-yard dash, broad jump, 16-pound shot put, mile run, pole vault and two-mile run. Of the Rhode Island men who will take part in the dual meet Goodale, Webb, Tucker, Doll, Tully, Nugent and Davis will probably be the main point winners for the local team. Other men who will represent the local college in the meet will be Ahrens, Hadley, Caldwell, Mounce, Sullivan, Barlow, Rollins, Minor and Albro.

HUNTER RELEASED TO MONTREAL.

Manager Dahlen of the Brooklyn Nationals announced the release of Pitcher Hunter to Montreal during Friday's game between the Brooklyn team and New York.

PENNSYLVANIA HAS BEST SHOWING IN THE PRELIMINARIES

Qualifies Fourteen Men to Twelve for Yale and Princeton and Eleven for Harvard.

FINALS ARE TODAY

PHILADELPHIA.—University of Pennsylvania continues to rule the favorite for championship honors in the big meet of the Intercollegiate Association of Amateur Athletes of America, the final events of which take place this afternoon on Franklin field, Harvard, Yale and Princeton appear to be her closest rivals, with Cornell yet to be heard from in the distance run.

Several unexpected things happened in the preliminaries Friday. R. C. Foster of Harvard failed to qualify in the 220-yard dash, Kelley and de Selding of Harvard failed in the 440, Kirjassoff of Yale did not get into the 880 and Canfield of Yale failed to stay in the high jump.

On the other hand Barr qualified in the pole vault for Harvard, while Long and Lewis of Harvard won in the high and low hurdles. Gardner, also of Harvard, qualified in the 100 and Goddard of Harvard finished third in the shot put. Indications point toward these four colleges finishing well together, with upsets figuring strongly in the final results. The summary of the preliminaries:

100-YARD DASH.

First heat—Won by Ramsdell, Pennsylvania; second, Sherman, Dartmouth; third, Baldwin, Amherst; fourth, Amberg, Pennsylvania State College, Time, 10.1-5s.

Second heat—Won by Minda, Pennsylvania; second, Cooke, Princeton; third, Keck, Michigan; fourth, Russell, Dartmouth, Time, 10.2-5s.

Third heat—Won by Bass, Cornell; second, Downey, Syracuse; third, Kelly, Yale; fourth, Thayer, Harvard, Time, 10.2-5s.

Fourth heat—Won by Gardner, Harvard; second, Robson, Wesleyan; third, Snyder, Yale; fourth, Hartigan, Brown, Time, 10.2-5s.

Fifth heat—Won by Craig, Michigan; second, Jacobs, Columbia; third, Jessup, Princeton; fourth, Wheeler, Yale, Time, 10.3-5s.

Sixth heat—Won by Roberts, Amherst; second, Seymour, Yale; third, Tyler, Harvard; fourth, McConnell, Haverford, Time, 10.3-5s.

Second series of trials first and second qualifying.

Fifth heat—Won by Craig, Michigan; second, Ramsdell, Pennsylvania; third, Ertly, Yale; fourth, Robson, Wesleyan, Time, 10.1-5s.

Second heat—Won by Minda, Pennsylvania; second, Jacobs, Columbia; third, Jessup, Princeton; fourth, Wheeler, Yale, Time, 10.1-5s.

Third heat—Won by Cooke, Princeton; second, Bass, Cornell; third, Seymour, Yale; fourth, Tyler, Harvard, Time, 10.1-5s.

Fourth heat—Won by Jessup, Princeton; second, Gardner, Harvard; third, Downey, Syracuse, Time, 10.3-5s.

Fifth heat (for men who finished third)—Won by Roberts, Amherst; second, Kelly, Yale; third, Thayer, Harvard; fourth, Seymour, Yale, Time, 10.3-5s.

220-YARD DASH.

Five heats, first and second men qualified for semifinals.

First heat—Won by Minda, Pennsylvania; second, Ford, Cornell, second, Time, 21.3-5s.

Second heat—Won by Robson, Wesleyan; Hough, Pennsylvania, second, Time, 22.2-5s.

Third heat—Won by Cooke, Princeton; Baldwin, Amherst, second, Time, 21.4-5s.

Fourth heat—Won by Craig, Michigan; Jacobs, Columbia, second, Time, 21.3-5s.

Fifth heat—Won by Ramsdell, Pennsylvania; Seymour, Yale, second, Time, 21.1-5s.

440-YARD RUN.

Three heats, first three to qualify for final.

First heat—Won by Redpath, Syracuse; McCarthy, Cornell; second, Sawyer, Princeton, third, Time, 1.10-5s.

Second heat—Won by Palmer, Haverford; Young, Amherst, second; Ross, Michigan, third, Time, 50.1-5s.

Third heat—Won by Black, Princeton; Smith, Pennsylvania, second; Ranney, Harvard, third, Time, 50.4-5s.

HALE-MILE RUN.

Three heats, first three in each heat, fastest fourth man qualifying for final today.

First heat—Won by Boyle, Pennsylvania; Eberhart, Cornell, second; Byley, Harvard, third; Frautz, Princeton, fourth, Time, 1m. 58.3-5s.

Second heat—Won by Whitely, Princeton; Putnam, Cornell, second; Levering, Pennsylvania; Baker, Pennsylvania, fourth, Time, 1m. 58.4-5s.

Third heat—Won by Paul, Pennsylvania; Hall, Michigan, second; Taylor, Cornell, third; Holtman, Syracuse, fourth, Time, 1m. 58.3-5s.

120-YARD HURDLES.

Four heats, first and second qualified for semi-finals.

First heat—Won by Chisholm, Yale; Havens, Rutgers, second, Time, 19.2-5s.

Second heat—Won by King, Yale; Wendell, Wesleyan, second; Eberle, Wessmore, third; Hall, Cornell, fourth, Time, 19.2-5s.

Third heat—Won by Long, Harvard; Newcomb, Colgate, second; Bacon, Wesleyan, third, Time, 16.2-5s.

Fourth heat—Won by Dwight, Princeton; Lewis, Harvard, second; Pinder, Syracuse, third, Time, 16.2-5s.

220-YARD HURDLES.

Four heats, first and second to qualify in semi-finals.

First heat—Won by Stibolt, Cornell; second, Dusenberry, Princeton, Time, 25.4-5s.

Second heat—Won by Gardner, Harvard; second, King, Yale, Time, 26s.

Third heat—Won by Chisholm, Yale; second, Eberhart, Cornell, Time, 25.2-5s.

Fourth heat—Won by Dwight, Princeton; second, Lewis, Harvard, Time, 25.3-5s.

HIGH JUMP.

Final—Qualified, Palmer, Dartmouth; Fielden, New York University; Burdick,

NEWS IN AND AROUND ABOUT THE STATE

MEDFORD.

Members of Gen. Samuel C. Lawrence post, G. A. R., will hold services Sunday in the First Baptist church. On Memorial day they will be escorted by Sons of Veterans, the Daughters of Veterans, the Woman's Relief Corps and the Auxiliary to the Sons of Veterans, the Lawrence Light Guards and the Spanish War Veterans, together with the mayor and other city officials and members of the boys' brigade while marching. At noon they will parade through the square, escorted by the high school band. In the evening there will be exercises in the opera house, and W. G. Haskell of Washington, D. C., will be the orator.

Medford high plays the Boston Latin school on the Medford grounds on Fulton street this afternoon.

Representative Charles H. Brown, Mayor Clifford M. Brewer, Superintendent of Schools Fred H. Nickerson, Capt. Howard S. Fahy of the football squad and Charles T. Daly, first president of the school congress, were the guests and speakers at the annual banquet of the high school congress Friday evening.

BROCKTON.

The South Congregational and Porter Congregational churches have made arrangements for outdoor services Sunday evenings this summer. The South church will have a large tent for the purpose and the Porter church will hold service pleasant Sunday evenings on the lawn.

J. Wilder Fairbanks of Boston will give an illustrated lecture Sunday evening in the South Congregational church on "Whitman's Ride for the Flag and the Cross."

Preliminary steps toward the organization of a chorus of girls in the South Congregational church were taken Friday. The conductor will be Mrs. E. N. C. Barnes. There is already a chorus of boys and one of men.

The Christian and Missionary Alliance will open a three days' convention in the Olivet Memorial church today. A returned missionary from China, the Rev. Frederick Christopherson, will take part.

EASTON.

The final examinations will begin at the high school June 6. In the school Friday Memorial day exercises took place, the sophomore and freshman classes having charge.

Commander Nathaniel W. Slocom and comrades of the Grand Army post, members of the Woman's Relief Corps and Sons of Veterans will attend the morning service Sunday in the Methodist church at North Easton. The sermon will be by the Rev. W. Lenoir Hood. The Memorial day orator will be Gen. Elisha H. Rhodes of Providence, R. I., and the exercises will take place in the town hall at 2:30 p. m.

A party of about 12 young people from this town and Stoughton will spend the next few days at Glen Echo Park at a cottage party.

WEST BRIDGEWATER.

The athletic association at Howard Seminary held a dancing party Friday in the gymnasium.

The Rev. Edward B. Maglathlin, pastor of the Unitarian church, will be the guest of the Edward W. Kingsley post 13 of Boston at their Memorial day services.

The students at Howard Seminary will present the operetta "The Egyptian Queen" in the seminary hall Wednesday evening.

The old frame which has been used in the past for shoeing oxen, and which has been in the local blacksmith shop for many years, has been purchased by W. B. Cross of Brockton.

STOUGHTON.

A dancing party was held Friday evening by the Bachelor Girls in Sons of Veterans hall with a large attendance from this town, North Easton and Brockton.

Dr. Snedden of the Massachusetts state board of education gave an address at the meeting of the Board of Trade Friday evening in the town hall. It was ladies' night and supper preceded the address.

A St. John Chamber post, G. A. R., the Woman's Relief Corps and John A. Andrew camp, S. of V., will attend the morning service in the Universalist church Sunday.

The ladies of the Congregational church will serve a strawberry supper and hold a May party Tuesday night.

HANSON.

Memorial day exercises will open Sunday morning when the T. L. Bonney post, G. A. R., and its kindred organizations will attend services in the Congregational church. The sermon will be given by the Rev. H. A. Bridgman of Boston. On Monday afternoon exercises will be held in the town hall, when the oration will be given by Dallas Lore Sharp, and there will be selections by a band and exercises by the children.

Exercises were held by the public school children Friday afternoon and details were present from the T. L. Bonney G. A. R. post.

NORWELL.

The Memorial day oration will be given by Dr. Frank G. Wheatley of North Abington in the town hall. Sunday morning the post and W. R. C. will attend services in the Universalist church at Assinippi.

The children of the public schools held memorial exercises at the Unitarian church at Norwell Center Friday. Details were present from the G. A. R.

The Norwell baseball team will open its season today by playing at Rockland. A Quincy team will play here Monday.

DEDHAM.

The graduating class at the high school has chosen Edmond W. Bowler class prophet.

Miss Maime Davis of the Baptist training school will speak of religious work among the Italians in the First Baptist church Sunday evening.

The Dedham Women's Club has elected: President, Mrs. Frederic C. Cobb; vice-presidents, Mrs. Roswell F. Phelps and Mrs. J. Ellis Ames; treasurer, Mrs. Edward C. Paul; corresponding secretary, Mrs. William F. Whitman; recording secretary, Mrs. Alice I. Tapley; directors, Dr. Mildred P. Babcock, Miss Helen Kelley and Mrs. Ralph W. Redman.

The dedicatory exercises of the new \$60,000 Quincy school building at East Dedham will be held on the afternoon of June 4. Julius H. Tuttle, president of the Dedham Historical Society, will give an address on the history of the school and the district. Dr. David Snedden, commissioner of education, graduates of the school, citizens and residents of the district will also make addresses. The Wagner male quartet, school children and graduates of the school will sing.

WINTHROP.

The infant class of the Baptist Sunday school, known as the "Precious Jewels" will have their annual entertainment in the church vestry this afternoon. In the evening the Young People's Union will hold their monthly social.

Margaret Winthrop lodge of Rebecca will hold a memorial service in Social hall, Sunday, at which the Noble Grand, Mrs. Lillian McNeil, will preside. Mrs. Annie E. Crosby will deliver the address and Miss Isabel Douglas will give several solos.

The Rev. Frederick M. White, pastor of the Baptist church, will deliver the address at the exercises on the library grounds, on Memorial day.

On Memorial day there will be a band concert at Ingleside park from 8 to 9 a. m. A parade will then be formed. An address will be made by Melville C. Stone of Malden. There will be a concert in the square near the monument from 12 to 1 o'clock. Flags will be flown throughout the town.

EAST BRIDGEWATER.

A band concert will be held Memorial day and after dinner at G. A. R. hall the post and its auxiliaries will march to the town hall, where the oration will be given by Miss C. Fannie Allyn. The J. W. Munroe post in the afternoon will join with the Justin Dimick post in exercises at the town hall.

Friday was observed as Parents day at the Allen school, also in honor of Memorial day. Delegations were present from the two G. A. R. posts and the exercises by the children were of a patriotic nature.

The East Bridgewater baseball team will open its season as a member of the Trolley League Monday when two games will be played.

The William McKinley camp, S. of V., will be guests of the camp in Bridgewater Sunday afternoon.

BRIDGEWATER.

The Bridgewater Normal School Club has elected: President, Frank E. Gurney; vice-president, Edward Lincoln; secretary, Carrie Stoddard; treasurer, Preston Chase; auditor, Lester Lane.

Nine candidates will be admitted to the Baptist church at the services Sunday.

Tomorrow will be observed as Memorial Sunday in this town and the members of the Bridgewater post, G. A. R., with the W. C. R. and the Sons of Veterans will attend services in the Central Square Congregational church. Monday will be observed by the post and its auxiliaries. In the afternoon there will be exercises in the town hall, including an address by E. C. Davis of Lawrence and selections by the high school chorus.

MIDDLEBORO.

The Memorial day exercises were begun Friday afternoon when the school children and the veterans united in exercises at the town hall. Sunday morning the members of the G. A. R. post and W. R. C. and Sons of Veterans will attend services in the First Baptist church at Rock when the sermon will be preached by the Rev. Frederic T. Kenyon. The oration on Monday will be given by Mrs. Mary J. Sibley in the town hall.

The pupils of Miss Abbie Warren will give a recital June 8 in the Unitarian church.

George H. Shaw has been elected a member of the executive board of the Massachusetts Home Missionary Society.

MELROSE.

Several of the principal streets will be given a coat of tar macadam during the summer. Howard street will be rebuilt and the car tracks of the Boston and Northern railway relaid in that street. Next week the city will also sprinkle the principal streets with oil.

Two factory sites have been offered the new manufacturing concern which it is proposed to locate here for the manufacturing of automobile supplies and in which Melrose people are interested. Both adjoin the railroad.

A petition is being circulated to have the class day and graduation exercises on the closing week of the school year.

PEMBROKE.

Memorial day exercises were held here Friday in the schools. Sunday morning the Joseph E. Simmons post and W. R. C. and the Sons of Veterans will attend the Methodist church. After dinner Monday the oration will be given in the Unitarian church by the Hon. Willard Howard of Chelsea, and there will be exercises by the school children.

CHELSEA.

Under the direction of City Engineer O'Brien considerable work is being accomplished in the fitting up of playgrounds for the children for the summer. The Central avenue side of the Shurtleff school grounds has been graded and sodded, and swings, tilts, rope ladders and other amusements for the small children will be placed there. The Williams school grounds have already been made attractive. On the Everett avenue playgrounds 100 maple and poplar trees are growing finely and the Orange street side of the grounds is being prepared for the use of the smaller children. The baseball and football field of the Everett avenue side is being improved. Extensive work is also being done on the East Side park.

St. Luke's Guild of the Episcopal church will hold a strawberry festival and sale in the parish house June 2.

The Men's Club of the First Congregational church has elected: President, Dr. William H. Walkley; vice-president, William F. Bradley; secretary, Lorne Hulsman; treasurer, Norman F. Wass. At the annual meeting an address was given by Chaplain Charles Walkley, on his personal army experiences in the Philippines.

WEYMOUTH.

Memorial day exercises were held by high school pupils Friday afternoon. Commander George L. Newton, Bradford Hawes, Maj. F. A. Bicknell, Charles and H. Burrell of Reynolds Post No. 58, G. A. R., gave addresses. The scholars of the Shaw, Howe and Bates schools held exercises in Fogg's Opera House. They were addressed by Commander Charles W. Hastings and J. Murray Whitcomb of Reynolds Post.

The Rev. H. S. Huntington of Milton will preach in the Old North Congregational church Sunday.

The Ladies Circle of the Pilgrim Congregational church has elected: President, Mrs. W. E. Bean; vice-president, Mrs. H. A. Newton; secretary, Mrs. Gardner Alden; treasurer, Mrs. John Blanchard; executive committee, Mrs. W. O. Collyer, Mrs. Laura Libby, Mrs. E. F. Reals, Mrs. F. G. Merrill, Mrs. Horace Walker, Mrs. Henry Dyer, Mrs. W. A. Drake and Mrs. Otis Bent.

The Ladies Benevolent Society of the Memorial Congregational church has elected: President, Mrs. Sarah C. Butler; vice-president, Mrs. W. F. Cummings; secretary, Mrs. Walter Blake; treasurer, Mrs. Frank Anderson.

QUINCY.

Commencement week at the Quincy Mansion school will begin Sunday, June 5, with the baccalaureate sermon by the Rev. Franklin Hamilton, chancellor of the American University at Washington, D. C.

Memorial day exercises were held in the high school Friday, in charge of Head Master J. D. Howlett. Addresses were made by Mayor Charles H. Porter, Mrs. Cora Carman and Mrs. Agnes Fletcher of Paul Revere W. R. C.

At the Woodward Institute for Girls an address was delivered by Superintendent of Schools A. L. Barbour and Miss Elizabeth Patten contributed a poem.

The Ladies Benevolent Society of the Memorial Congregational church has elected: President, Mrs. Sarah C. Butler; vice-president, Mrs. W. F. Cummings; secretary, Mrs. Walter Blake; treasurer, Mrs. Frank Anderson.

WALTHAM.

The Waltham Playgroup Association has elected: President, Dr. Richard Hinchey; vice-presidents, the Rev. Newton M. Simmons and Mrs. Christina Fulton; secretary, Mrs. H. W. Dyke; treasurer, Thomas Bannion; governing board, Thomas Curley, Miss Annie L. Sears, Bernard W. Stanley, Miss Martha Barnes, Mrs. J. H. Yetten and Mrs. Mary H. Howe.

The Home Garden Association has appointed the following committee to revise its prize list: George A. Fiel, Miss Louise Fay, Miss Josephine Webber and Miss Stella W. Mayo.

The advisory board of the Crescent Association will plan the work for next season this evening.

Mayor Walker and City Solicitor Carey will attend the hearing by the special commission on the apportionment of the metropolitan park taxes June 2.

ABINGTON.

The pupils of the Adams and Lincoln schools held patriotic exercises in Standish hall Friday afternoon. The program included singing, readings, declamations, flag drill and dramatization.

Dr. Frank G. Wheatley will deliver the oration before Dr. Willard Robinson post 112, G. A. R., on Memorial day.

Miss Mary Dudley will entertain the circle of Kings Daughters of the First Congregational church at her summer home, Oldham pond, Pembroke, Wednesday.

HALIFAX.

On Memorial day, there will be exercises under the direction of the members of Halifax grange and veterans of the civil war. The oration will be given by the Rev. A. S. Muirhead of East Bridgewater and there will be singing by the children of the public schools in the town hall.

HOLBROOK.

On Memorial day an address will be delivered by the Rev. J. P. Armand of the Methodist Episcopal church. At 7:30 p. m. a service will be held in the town hall, where an oration will be delivered by the Rev. A. M. Hyde, D.D., of Brockton.

COCHESSETT.

The Rev. E. S. Brightman, who has just retired as pastor of the Methodist church, sailed today from New York for a several months' tour in Europe.

The Rev. J. Elbert Wells will preach at the Methodist church Sunday.

WINCHESTER.

Mr. and Mrs. Benjamin Turner Stephenson of Winchester announce the engagement of their daughter Marguerite to Frank Leon Willis of Melrose.

WAKEFIELD.

Mrs. Mabel Wall Sweetser and Mrs. Helen A. Evans will represent the Kosmos Woman's Club at the State Federation of Women's Clubs in Lynn, June 6 and 7.

The new freight station on North avenue will be ready for use about July 1.

The selectmen, after two weeks work in inspecting the highways of the town, are ready to begin the street improvement campaign systematically. All streets needing repairs have been noted and approximately 10 per cent of the \$17,500 appropriation will be spent in each of the Greenwood, Montrose, West Side, North Ward and Center districts.

Memorial day will be observed with a parade by Post 12, G.A.R., Camp Parker, S. W. V., H. M. Warren camp, S. of V., company A, sixth regiment, and the W. H. S. cadets, followed by exercises at the soldiers' monument add at Lakeside. A patriotic entertainment will be held in the town hall in the evening, with music by a quartet and speeches by six high school students, Walter Hickey, Daniel Ferris, Thomas Stuart, Walter Pinkham and Marjorie Smith.

MALDEN.

The street and water commission has awarded the contract for the Summer street drain to the Bryne Construction Company of Boston for \$6970. There were five bids, the highest being \$13,240.

The First Universalist and the First Congregational churches will hold their annual picnic parties June 11 at Lexington park.

The Monday Club will give an exhibition of its work this afternoon in Edward hall, Browne building.

Instead of running the street sweeping team during business hours, the city will in future run the sweeper and watering carts at night time, and the rubbish will be taken up by the street cleaning squad next morning.

WHITMAN.

The David A. Russell post, G. A. R., the W. R. C. and the Sons of Veterans will attend services in the Congregational church Sunday morning, when the sermon will be given by the Rev. A. H. Ericsson. Monday evening exercises will be held in the town hall and the oration will be given by the Rev. Maurice Levy of Newton.

The annual roll call of the George A. Custer Camp, Sons of Veterans, was held Friday evening in Grand Army hall.

Whitman's share of the county tax this year will be \$6283.22, an increase of \$139 over last year.

Resolute lodge, N. E. O. P., will visit Fidelity lodge of Brockton this evening.

HANOVER.

Sunday morning Joseph E. Wilder post 83, G. A. R., and the W. R. C. and the Nelson Lowell camp, S. of V., will attend services in the Baptist church at North Hanover. The sermon will be given by the pastor, the Rev. E. E. Ventress. The oration Monday will be given by Judge George W. Kelley of Rockland in the town hall here.

The Hanover Band of Mercy will hold its fourth annual baby show at Rest Haven grove at West Hanover next Saturday.

The graduating exercises at the high school will be held in the town hall June 22. The class will hold a reception June 24.

EVERETT.

Chairman Columbus Corey of the board of assessors states that the number of assessed polls this year has increased 652 over last year. The estimated population of the city is 37,000 this year against 32,100 last year.

Superintendent of Schools U. G. Wheeler and Principal Wilbur G. Rockwood are arranging an old fashioned spelling match for the next meeting of the Parents' Association at the high school.

HYDE PARK.

The Christ church Mothers Club has elected: President, Mrs. Robert Scott; vice-president, Mrs. Richard Newman; secretary, Mrs. James M. Hargrave; treasurer, Mrs. John Greenlow.

The Methodist Epworth League has chosen: President, Miss Elizabeth R. Stevens; vice-president, Miss Edith M. Grenier; Chester R. Littlefield, Estella Beatty, Florence Dawson; secretary, Marion Smith; treasurer, Alan McIntire.

WESTWOOD.

The Unitarian Girls Club has elected: President, Florence A. Bonney vice-president, Gertrude A. Bonney; treasurer, Myrna Draper; secretary, Blanche Draper. The club will hold its annual outing at North Weymouth beach, June 17.

Commander Richard H. Lincoln of Charles W. Carroll post 144, G. A. R., Dedham, and Post Commanders Orlis S. Guild, Charles E. Lewis and William B. Gould visited the public schools of the town Friday.

BRAintree.

Members of Amasa Rebelek lodge 96, I. O. O. F., gave a minstrel entertainment in Old Fellows hall Friday evening. The following took part: H. L. Chase, L. H. Sears, W. B. Smith, H. W. Chick, F. C. Allen, C. Haven Belcher and H. M. Saunders.

The Rev. S. C. Weatherly of Rockland will preach in All Souls Unitarian church, Sunday.

WINCHESTER.

Mr. and Mrs. Benjamin Turner Stephenson of Winchester announce the engagement of their daughter Marguerite to Frank Leon Willis of Melrose.

BEVERLY.

The Cameron car company's total shipments for four months this year equal those for the entire year of 1909.

There will be racing in five classes at the Jubilee yacht club Memorial day, the Jubilee yacht club, two for sailing boats and one for sailing dories, the last open to all Beverly owned dories. The first class will be sent off at 2 o'clock.

The class of 1910, Beverly high school has sent President Taft an invitation to attend its reception at City hall at the end of next month.

When pupils in the Washington district return to school Tuesday they will attend the McKay street school. The old building is to be sold at auction today, and will be torn down.

Several extra passenger trains will be run by the Boston & Maine on Memorial day. Extra trains will leave Beverly for Boston at 10:05 a. m., 6:07 p. m. and 6:57 p. m., and extras will leave Boston for Beverly at 12:33 p. m. and 11:10 p. m.

Patriotic programs were given in all the Beverly schools Friday. Details from the Grand Army, the Women's Relief Corps, the Sons of Veterans and the Ladies Auxiliary to the Sons of Veterans attended.

Preston post 188, G. A. R., will attend services in the Farms Baptist church Sunday morning. Monday evening the exercises will be held at the same church and the Rev. Carey W. Chamberlain will deliver the address.

FITCHBURG.

The Woman's Club has presented the Lumburg street school with Della Robbia's celebrated frieze, "The Boy Trum-peters," this week. The committee from the Woman's Club comprised Mrs. George B. Woodward, Mrs. Clara E. Tenney, Mrs. B. D. Dwinell and Mrs. Nancy A. Adams. Master Roy Paige received the gift on behalf of the school.

The second annual exhibition of the industrial department of the high school will be given in the library Friday, June 10, at 7:30 p. m.

The residents at West Fitchburg are preparing to build a new hall for large gatherings.

The annual meeting of the Fitchburg Smith College Club with Miss Maud L. Gifford elected: President, Miss Helen F. Stratton; vice-presidents, Miss Frances Lockey of Leominster, Miss Maud L. Gifford; secretary, Miss Alice W. Day; treasurer, Miss Elsie C. Damon; chairman of executive committee, Mrs. William C. Hardy.

BROOKLINE.

The school committee of the town of Brookline has voted to grant a pension of \$500 per year to Miss Anna M. Johnson, an assistant of the high school, to date from July 1, 1910.

Miss Bertha C. Marshall, an assistant at the high school, has been given leave of absence for one year.

A special committee has been appointed in connection with plans for the proposed new schoolhouse on Westbourne terrace and an article will be inserted in the warrant for the special town meeting during June.

Boston has a new D. R. chapter which will be known as the Lucia Knox chapter. Mrs. Elizabeth Robbins Berry is regent, Mrs. Harriet B. C. Butler of this town vice-regent, Miss Annie L. Williams, secretary, and Miss Ellen P. Hersey, treasurer.

The selectmen of Brookline have recommended that no municipal garage be built and that the town pay \$500 for rent for sheltering its automobiles. At the special town meeting June 1 this recommendation will be acted upon.

CHELSEA.

At the meeting of the board of trade this week Benjamin L. Cohen, Samuel H. Robie and former Representative Marcus M. Merritt were appointed a committee to see what could be done to advertise the advantages of the city as a place of residence. It was announced that two large industries were considering locating in the city. Chairman William E. McClintock of the board of control, Samuel H. Robie and Thomas J. Gray were appointed to invite firms seeking locations for new industries to visit the city.

W. S. Hancock command, No. 1, U. V. U., held memorial services Sunday evening and the board of control have accepted an invitation to be present.

The plans for the campaign for raising money to build a new building for the day nursery were completed Friday evening and the campaign was begun this morning. The headquarters for the coming week will be in the Henry building.

ROCKLAND.

The Vincent Girls held a dancing party in Grand Army hall Friday evening. The committee consisted of the Misses Sadie Mulready, Alma Thompson and Helen Riordan.

The Rev. D. R. Freeman of Braintree will occupy the pulpit of the Unitarian church Sunday. The Rev. W. I. Ward of Providence, will conduct the services in the Methodist Episcopal church.

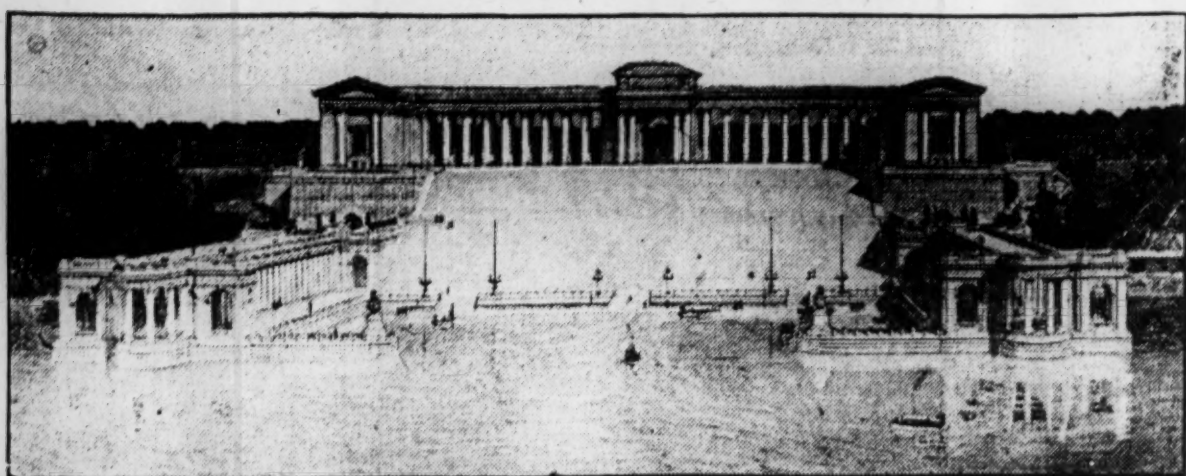

Patriotic exercises were held in all the schools Friday afternoon.

OYSTER BAY PEOPLE AND COUNTY TO HAIL FORMER PRESIDENT

OYSTER BAY, L. I.—This village is going to welcome Mr. Roosevelt home independently of the celebration in New York and the general Long Island affair that is planned for

Robert Fulton Memorial Designs Exhibited

Sixty-two architects show plans in New York for the monument to be erected along river bank.

PRIZE WINNING DRAWING FOR NATIONAL TRIBUTE.

This idea for the water gate submitted by H. Van Buren Magonigle to be constructed between One Hundred and Fourteenth and One Hundred and Sixteenth streets in Manhattan was given the \$3000 award as the one selected.

NEW YORK—Designs by the 62 competing architects for the proposed \$3,000,000 Robert Fulton monument or water-gate to be erected on the Hudson river between One Hundred and Fourteenth and One Hundred and Sixteenth streets are on exhibition this week, including Sunday afternoon, May 29, at the Fine Arts building, West Fifty-seventh street. These plans include the successful design by H. Van Buren Magonigle, which won the first prize of \$3000 offered by the Robert Fulton Monument Association as well as five others that were awarded minor prizes.

Mr. Magonigle's design will ultimately materialize into one of the most costly and most magnificent memorials ever erected in honor of a man. The association has planned to make it national in character and of a nature that shall be useful to the public. Its cost is estimated at between \$2,500,000 and \$3,000,000.

Credit for the idea of erecting a water-gate is given to Nicholas Murray Butler, president of Columbia University. Before his recommendation was made the association was considering the erection of a monument at some point along the Hudson in its desire to honor Robert Fulton, inventor of the steamboat. Professor Butler proposed that a water-gate would provide a landing place for foreigners and distinguished visitors to America. A suitable place, for instance, for the President of the United States to review the nation's battleships, and which would also provide promenades and walks for the pleasure of those on shore. This plan was adopted by the association, which has since been aided by the Legislature as well as the city government in the movement.

The competition in which the design for the memorial was selected ended last October. As professional judges the following architects were appointed: William R. Mead, George B. Post, Thomas Hastings, and John R. Pope. The professional judges acted in cooperation with, as lay judges, Robert Fulton Cutting, Walter Scott, William H. Fletcher and Isaac Guggenheim.

The work of elimination in 62 sets of ably executed plans was no easy task. The judges first selected 20 sets of plans, which were presently reduced to 10. It had been agreed that 10 should be selected, and their designers remunerated with \$500 each to cover the work already done and that of improvement and enlargement for the final scrutiny.

Upon the return of the 10 designs the judges selected five as prize winners. It should be understood that at no time during the adjudication were the judges aware of the names of the designers. The first prize of \$3000 was found to have been won by H. Van Buren Magonigle, 7 West Thirty-eighth street. The other four were, with their respective awards, Robert P. Bellows, \$2000; Albert Kelsey and Paul P. Cret, \$1500; Charles P. Huntington, \$1000, and Heacock & Hokanson, \$500.

The design which won the prize at first glance strikes one as a thing of solid grandeur, without extravagance. It runs in the design from One Hundred and Fourteenth street to One Hundred and Sixteenth street, through Riverside park, for a distance of over 563 feet. From the drive into the river it extends 700 feet.

A great landing pool for pleasure craft is enclosed and sheltered north and south by Doric colonnades, the tops of which form recreation piers, and below and between which there are also shaded piers. At the landward end of the upper piers are formed Italian gardens, backed by buttresses of solid stone. On the top of each buttress at the north and south ends of the monument are massive stone edifices.

The building to the north is the one which is to be used chiefly for the reception of distinguished guests visiting city or country. The building on the south end is to be devoted to a naval museum, while the two buildings are joined by a high open peristyle, in the center of which will be a triumphal arch with the canopy enclosing the tomb of Robert Fulton.

At present the tomb is merely a design. It is thought "at later the catalogue will be replaced by a statue of Robert Fulton to be executed by a sculptor chosen, probably, in competition. From the sheltered tomb to the peristyle runs an imposing flight of stairs 350 feet wide. Looking up from the base of them one reads the tentative wording on the face of the whole sweep of the peristyle:

"To record the genius and honor the name of Robert Fulton, the American people have erected his memorial."

Beginning with a few hundred dollars in the half year 1902, the exports of crude petroleum to Alaska rose to \$334,000 in 1909, the total for the eight years being over \$900,000, while the shipments of crude to Hawaii were growing from \$79,000 for six months of 1902 to \$846,000 in 1909, with a total of \$5,061,000 for the eight years.

The use of crude oil as fuel is, doubtless, the explanation of this rapid growth in the export. The refined oil trade shows a like expansion. The shipments to Alaska were valued at \$50,000 for the half year in 1902 and rose to \$259,000 in 1909, with a total of \$1,670,000. The exports to Hawaii rose from \$103,000 in the half year 1902 to \$506,000 in 1909, with a total of \$2,559,000. Porto Rico, beginning a year earlier, received refined oil valued at \$100,000 in 1901, and at \$389,000 in 1909, with a total value of \$1,862,000; and the Philippines paid \$120,000 for their refined oil from the United States in 1901 and \$664,000 in 1909, and a total of \$4,920,000 for the nine years. The shipments to all the possessions increased from 1907 to 1908, and continued to increase in 1909 for all except the Philippines, where the decline was nearly \$400,000.

The shipments of quicksilver went almost wholly to Alaska. Like quicksilver, salt is shipped chiefly to Alaska.

Beginning with a few hundred dollars in the half year 1902, the exports of crude petroleum to Alaska rose to \$334,000 in 1909, the total for the eight years being over \$900,000, while the shipments of crude to Hawaii were growing from \$79,000 for six months of 1902 to \$846,000 in 1909, with a total of \$5,061,000 for the eight years.

RECORDS GROWING MINERAL TRADE OF THE UNITED STATES

Bulletin Specifies Exports to Non-Adjacent Possessions of This Country in Certain Products.

COVERS NINE YEARS

WASHINGTON—The commerce in domestic mineral products between the United States and its non-adjacent possessions for the calendar years from 1901 to 1909, inclusive, is given in a bulletin issued by the United States geological survey. The figures are those reported by the collectors of customs.

The heaviest total shipments of anthracite coal for the period were valued at \$41,000 to Alaska and \$25,000 to Porto Rico; the anthracite shipments to Hawaii were valued at only \$4000, and none was sent to the Philippines. The shipments of bituminous coal for the nine years were \$641,000 for Hawaii to \$1,573,000 for Alaska, \$1,646,000 for Porto Rico, and \$2,125,000 for the Philippines, a total value of \$5,983,000.

The shipments of coke fell from \$29,000 in 1907 to less than \$7000 in 1908. In 1909 Hawaii recovered fully, with \$6000 of shipments, and Porto Rico had \$2000; but the Alaskan imports were valued at only about \$1000. The total shipments for the seven years 1903-1909 were: Alaska, \$49,000; Hawaii, \$18,000; and Porto Rico, \$14,000. No shipments to the Philippines were reported.

The shipment of domestic fertilizers rose steadily and rapidly in value from \$20,000 in 1901 to \$1,302,000 in 1909, and even in 1908 there was a gain of more than \$4000 over 1907. The total value for the nine years was over \$7,000,000. The shipment valued at \$1900 in 1905 is the only one recorded for the Philippines. The shipments of petroleum, crude and refined, present a remarkable instance of rapid expansion of trade. The exports in 1901, consisting of refined petroleum, were valued at \$200,000; in 1909 the shipments were valued at over \$3,000,000, and the total for the nine years was \$17,386,000.

Beginning with a few hundred dollars in the half year 1902, the exports of crude petroleum to Alaska rose to \$334,000 in 1909, the total for the eight years being over \$900,000, while the shipments of crude to Hawaii were growing from \$79,000 for six months of 1902 to \$846,000 in 1909, with a total of \$5,061,000 for the eight years.

The use of crude oil as fuel is, doubtless, the explanation of this rapid growth in the export. The refined oil trade shows a like expansion. The shipments to Alaska were valued at \$50,000 for the half year in 1902 and rose to \$259,000 in 1909, with a total of \$1,670,000. The exports to Hawaii rose from \$103,000 in the half year 1902 to \$506,000 in 1909, with a total of \$2,559,000. Porto Rico, beginning a year earlier, received refined oil valued at \$100,000 in 1901, and at \$389,000 in 1909, with a total value of \$1,862,000; and the Philippines paid \$120,000 for their refined oil from the United States in 1901 and \$664,000 in 1909, and a total of \$4,920,000 for the nine years. The shipments to all the possessions increased from 1907 to 1908, and continued to increase in 1909 for all except the Philippines, where the decline was nearly \$400,000.

PREPARE PARADE FOR THE FOURTH

Celebration in Boston Promises to Be Worthy of Review by the President, Who Is Expected to See It.

Boston's improved Fourth of July celebration parade is expected to be worthy in every respect of review by President Taft, who, it is thought, will see it. The parade will depict "Independence and Its Fruits," with floats and marching detachments, including hundreds of school children, companies of coast artillery from the harbor forts, marines and sailors from the navy yard and on board the warships which will be in the harbor on July 4, the Massachusetts national guard, G. A. R., United Spanish war veterans, Ancient and Honorable Artillery Company, fusiliers, lancers and high school cadets.

The school children from the eighth and ninth grades, mainly from those school near the Common, numbering about 4000, will be divided into 12 "blocks," each block representing one of the great nations of the world, and each pupil in the respective block being adorned with the national colors of the country represented, with the national flag of that country displayed. A man dressed to represent the ruler of each country will head the respective blocks. Among the special features to be depicted in the floats are the battle of Bunker Hill, battle of Lexington, battle of Concord, General Gates and the schoolboys, Boston Tea Party.

MR. FILENE AIDS "1915." Edward A. Filene, who has been in Washington for the purpose of forwarding the interests of the "Boston-1915" exposition, is expected to return to Boston today.

Summer Rugs

From the smallest mat to the largest carpet size we have the best and most complete assortment in town and at prices absolutely the lowest

Shaiki Rugs

A most attractive rug in soft blended colorings in pinks, greens and blues.

NEW UNION STATION FOR MINNEAPOLIS IS J. J. HILL'S PROMISE

MINNEAPOLIS—A new union station on the lines of the Baltimore & Ohio station in Baltimore will be built in Minneapolis within the next 18 months, James J. Hill, head of the Hill lines, in control of the station site here, has promised in an interview. The plans have proceeded no farther than to provide 10 through tracks, which is nearly double the capacity of 10 "end-in" tracks.

Mr. Hill declared at the same time that terminals both in St. Paul and Minneapolis and in Chicago must be greatly enlarged.

"The decline of exports," he said, "will relieve the situation somewhat in New York, but the growth of the West and the increase in manufacturing in Chicago make the problem in this section much harder to solve."

Regarding the business outlook, Mr. Hill said: "Give us a good crop, worth \$9,000,000,000, as the prospects now point to, and we will tide over any threatening depression. I wanted to be an optimist, but I never let the desire fool me if I can help it. Give us the crop and we are safe, if we will begin to exercise economy in public expenditures. We have just voted \$40,000,000 for rivers and harbors. A large part of that will be waste. We must stop waste."

PROVIDENCE, R. I. — The Culebra slide which is reported to be causing great anxiety among engineers in the Panama Canal Zone is nothing but an ordinary landslide such as was expected, according to John R. Freeman of this city, one of the engineers sent by President Taft to inspect the Panama canal.

TELEGRAPH LINES AND TELEPHONES TO BE SUPERVISED

U. S. Senate Adopts Amendment Placing Them Under Control of the Interstate Commerce Commission.

WASHINGTON—The Senate at its latest moment before reaching the point of voting on the administration railroad bill on Friday adopted an amendment placing interstate telegraph and telephone lines under the supervision of the interstate commerce commission.

This action insures the including of the provision in some form in the proposed law, as the subject is covered in the House bill.

The adoption of the amendment was followed by an effort to restore a portion of section 2, affecting mergers, previously voted out, and the proposition was considered so important that, rather than vote upon it without further consideration, the Senate took an adjournment until today.

The section, if restored, would prohibit all common carriers from acquiring any interest whatsoever in the capital stock of or purchasing or leasing any railroad which is competitive with that of the purchasing company, a fine of \$5000 being imposed for each day's violation of the provision.

NEW YORK—Having traveled nearly 40,000 miles since Oct. 25 last, Col. and Mrs. Edward M. Knox of Ridgefield, Conn., arrived in New York Thursday on the Adriatic of the White Star line, from Southampton.

Their trip around the world included a long visit in Burma, where, Colonel Knox said, there were evidences of rapid development of a natural oil industry. He obtained many objects of art to add to his large collection.

FILE CANAL PLANS FOR BIG IRRIGATION SCHEME FOR WEST

SPOKANE, Wash.—The Klickitat Irrigation & Power Company has filed maps and descriptions with the Yakima land office for the big irrigation canal to be run from the head waters of the Big Klickitat river to the Horse Heaven country in south-central Washington. Details for construction have been completed for 42 miles of the 110-mile canal. The drainage area is 175,900 acres, of which 93,000 is in the Yakima reservation and 82,900 in the Mt. Rainier forest reserve.

It is proposed to store 852,122 acre feet of water, from which to maintain a continuous flow of 1250 cubic feet of water per second. To carry this water to the land that is to be irrigated there will be constructed canals, flumes and tunnels.

The dimensions of the canals will be 11.8ft. on the bottom, 11.8ft. on the sloping sides and 22.2ft. across the top. The canals are to be lined with cement. The flumes are to be 10½ft. wide and 10ft. deep. The tunnels are to be 12ft. wide and 10ft. deep. It is believed that the most difficult engineering and construction work will be encountered on the first two sections of the big ditch, those being the two sections for which the maps have been prepared. Farther down the contour of the country is not broken, and the construction will not be so expensive.

PROMISE TO HELP HYDE PARK AHEAD

HYDE PARK, Mass. — A paper has been circulated and signed by the members of the Business Men's Association promising to boom Hyde Park and its interests vigorously for one year.

The association has stamped its approval on the playground movement by appointing Selectman John T. Robinson to represent the organization at the Rochester, N. Y., playground association convention in June. A committee of 15 is making arrangements for the annual summer outing and R. P. Moseley, William Anderson and D. P. Simpson are in charge of the June meeting.

HEARING ON BATH CHARGE TUESDAY

The second session of the municipal bath trustees to hear the evidence on the charges against Joseph P. O'Brien, superintendent of the department, will be held next Tuesday afternoon, the first session having been adjourned after eight witnesses had been examined, all of whom gave testimony on his activity in politics.

CHICAGO REJOICES OVER PROSPECT OF A NOISELESS PAVING

CHICAGO—Chicago citizens, and her visitors as well, are rejoicing over the prospects of new pavements in the downtown district in a short while, and the passing of the noisy, smoothly worn granite blocks that have done service practically since the great fire. The improvement was made certain when a number of property owners, who had objected in court, withdrew their objection.

There will be 10,570 yards of crooked wooden blocks laid immediately. The streets to be paved are: Randolph from Clark to Madison, LaSalle from Randolph to Madison, Clark from Lake to Madison, Washington from Clark to LaSalle.

This section constitutes a rectangle, two blocks by one, in the center of which is the new county building and the new city hall, which is rapidly approaching completion. It is only the starting point of a movement by the board of local improvements to pave the entire downtown district with smooth and noiseless material.

LIBRARIANS MEET AT NORTHAMPTON

NORTHAMPTON, Mass.—The spring meeting of the New England College Librarians Association here Friday was marked by the formal opening of the new Smith College library. President Seelye of the college presided at the exercises, and the dedicatory address was delivered by Dr. Dawson W. Johnston, librarian of Columbia University.

CHOOSES STATUE MODEL FOR TOWN

HYDE PARK, Mass.—The committee appointed at the last annual town meeting to consider the question of a soldier's monument erected in Winchester, Va., by the state of Massachusetts is the best model.

This monument is of bronze, heroic size, and represents a soldier in light marching order; it is mounted on a granite base. It can be duplicated for \$2000 and at the next town meeting the committee will ask the voters to appropriate this sum.

The committee consists of Maj. D. W. Lewis, James D. Grant, F. C. Graham, F. N. Tirrell and J. King Knight.

PEACE CONFERENCES POINT OUT AMERICAN LEADERSHIP

WASHINGTON—The extent to which the United States is becoming committed to perpetual peace among the nations is indicated by the multiplicity of peace conferences and of other public meetings at which methods of securing international peace are discussed. No sooner had the New England peace conference concluded its sessions than the Lake Mohonk conference began. This was the sixteenth annual gathering at Lake Mohonk

Ornaments of Silver Are
Dressy

Silver jewelry has been raised to an important place in the collection of ornaments possessed by the well-dressed woman, says the Portland (Me.) Express and Advertiser.

The picturesque costumes of dull, harmonized tones, or those upon which the dark, metallic laces are used, are much enhanced by silver ornaments that do not clash with the colors of the metal trimmings.

Silver forms a beautiful setting for all semi-precious stones, which give richness without appalling expense.

The filigree and ancient Bohemian ornaments are now being worn, and the barbaric Russian designs occupy a conspicuous place in jewel cases.

With rich velvets or with airy evening gowns silver jewelry is beautifully combined, lending just a required touch of artistic ornament to complete the picturesque, for which so many strive.

Fringing a Round Doily

Fringe is little used as a finish for round centerpieces or doilies. It is hard to do and harder to keep in condition. For certain plain mats it is preferred to button-holed scallop or lace.

Square fringing is easy. A thread of linen is drawn the desired depth of fringe and the threads pulled first on one side, then on the other.

With coarse, round thread linens the pulling is done by the fingers, but with most weaves it will be necessary to use a coarse pin.

As it is better not to fringe until after a piece is laundered, the linen is kept in better condition by putting the doily on a table and working on a flat surface rather than drawing with hand, as for hemstitching.

To fringe a round doily, outline on linen a circle the desired depth of fringe and cut the linen an eighth of an inch beyond for an even edge.

Put centerpieces on a flat surface and draw the warp and woof threads on both sides until the embroidery or scalloping is reached. This will leave triangular pieces at four corners, which are then fringed from both sides until nothing remains.

The threads are brushed straight and the edges of fringe, which are longer where the triangular strands lie, are carefully trimmed into a circle with even edge.

If the linen is hard to draw, the threads will pull more easily by moistening with a wet sponge or rubbing with a piece of damp white soap.

New Dressing Jacket

A pretty dressing jacket is made with very deep plain yoke, pointed back, front and on shoulders, respectively, and is trimmed with rows of heading threaded with ribbon.

To this is gathered a full short body of the same fabric and the sleeves are cut in points following the yoke effect and trimmed to match. This garment can be cut from four yards of material 27 inches wide.

The fitted short negligees will demand the same amount of goods. A pretty model is that made to fit the back and sides, the fronts tucked at the top to yoke depth, and the fullness drawn in at the waist line by means of a ribbon loosely tied.

FASHIONS AND

A Sewing Shower for
Bride-Elect Is
Novelty

A SEWING shower for the bride-elect offers a splendid idea for a novel entertainment now that June, the month of weddings, approaches.

The presents can all be made at home by the needleworkers and are certain to prove acceptable in the new home.

Invitations can be sent out in the form of tiny needle books. These can be made of pasteboard covered with gay silk with inner leaves of flannel; between these a folded leaf of linen paper on which is written the invitation. This may be formal or in rhyme.

The gifts can include anything needed to stock a well-equipped sewing room. Cards of hooks and eyes in different numbers, papers of needles or cases of them, needle books, a gold thimble, stilettes, cases of bodkins, emeries, tape measure, yardsticks, the latest improvements for skirt hanging and draping, waist and skirt forms, darning eggs, new darning for machine, button bags, silk, cotton and darning cotton in assorted numbers and shades, chalk for marking patterns, a pin cushion to pin to waist when fitting, a sewing apron.

Where expense need not be considered an appropriate present for a sewing shower might be a sewing machine or a mahogany sewing table.

The guests when assembled ostensibly are to have a sewing bee. It will be a pretty idea if the articles sewed are also included in shower gifts. In this case the guest should be notified and the sewing of a kind to be finished in a few hours' work, such as wash cloths, tea towels, dusters, scrub cloths, clothespin and laundry bags.

If you wish amusements as part of the affair, have a sewing test. Provide squares of unbleached muslin, needle and red cotton. Have each one hem, gather, backstitch, tuck and miter this patch and award prize for best work in different classes.

Refreshments may be quite simple or the afternoon may end with a supper. The shower gifts can be distributed at close of supper when table has been cleared after dessert and before nuts and candy are passed.

Another way would be to have the smaller gifts concealed in the floral centerpiece, with ribbons attached. These are tied in a loose bunch, which the hostess hands to guest of honor at the desired moment, telling her to untie and follow each ribbon to other end.

Latest Neck Ruffs

Some very remarkable neck ruffs are shown where frillings are very full and of silk tulle, in the exact tone of the gown, forming a sort of collarette for the costume, says the Philadelphia Times.

Some of these ruffs have a draping of soft taffeta in front to form a cravat, and they are tied in the back with a big bow of ribbon to match the tulle.

Then there is a neck ruff of ostrich which is quite different from its relation of other years. At present it has no ends whatever and simply encircles the throat, fastened in the front with a cluster of loops of ribbon of the same shade.

IDEAS IN FASHION

Practical little striped gingham frocks for tiny folks of 2 to 4 years are in Russian style, or with a long French waist and full-kilted skirts in bright or dark colors.

Ruffles of plaited net, batiste, plain or lace edge, and attached to a heading of insertion, may be bought by the yard and made into side frills for the shirt waist or coat suit.

It is better, instead of lining a shirt waist of soft silk, to wear under it a separate lining of thin lawn.

Gold colored straw trimmed with black is a popular combination in millinery this season.

One of the newest developments of the peasant idea is the dress fashioned on lines identical with the coat suit.

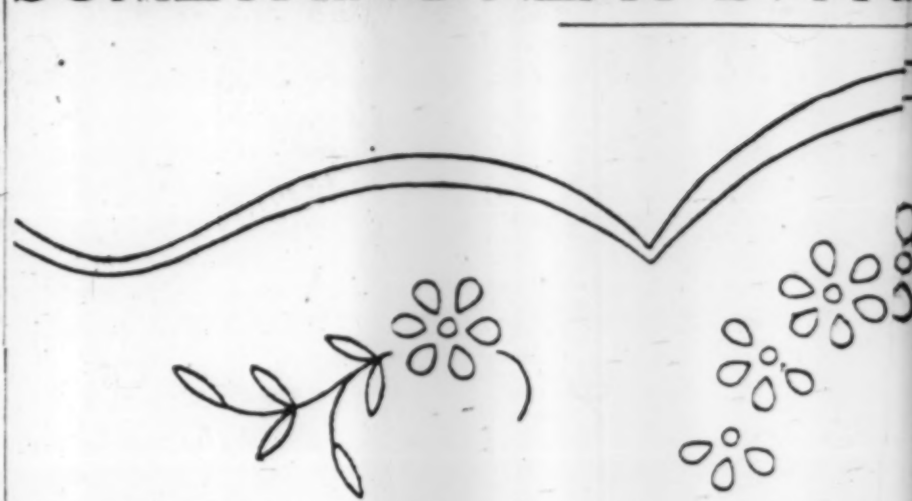

A Shirtwaist Gown

FASHIONABLE SUMMER DRESS.

SHIRTWAIST gowns that are made of linen, of soft finished pique, of cotton pongee, and all similar materials, are sure to be in demand now. Here is one that is both simple and smart. The waist pattern, No. 6556, and the skirt pattern, No. 6552, can be secured at any May Manton agency.

SOMETHING NEAT IN FR

New Model Sailor Hat
Is Neat

A NEW sailor hat has appeared that is very similar to the sailor of old, but with differences which are purely of today. The new models are 20 inches or more in diameter as to brim, and are rolled up slightly all round with a more emphatic roll at the back toward the left side. One of these hats that is pleasing is of rich green straw bound with deeper green two-inch ribbon.

The latter is arranged to lap evenly over upper and under brims. Being straight ribbon, however, it cannot be moulded on except at the center, and this has led to a novelty in binding which is pleasingly simple. The ribbon is ever so slightly gathered at each edge, so as to draw it into the narrower width required, and it is then stitched on by machine.

Around the crown of the sailor hat was a wreath of old-pink roses, which most artistically softened in with the green straw, and a loop or half-wreath of the same sort of trimming is arranged under the brim so as to drape the hair like a Grecian band.

The effect is very pretty as a setting for a fluffy haloed face, but such a garniture should be adopted cautiously as it might readily result in something quite the opposite. However, milliners are renowned for their ability to meet all exigencies, and this pretty idea is being applied to artificially colored roses and other blooms, and even to black silk ones, and carried out also in tulle which matches the wearer's hair.

How Do You Move Your
Books

Many persons complain that their books suffer in transit. The head of the moving company was interviewed on this subject and he said:

"After several years of experimenting with different things for the best conveyance of books, I have found the use of small boxes is by far the most advisable, the smaller the better. These boxes are easily secured for a few cents from your grocer, or if you let us know in time we will supply them to you gratis. For storage purposes, where the matter is left to us, we move the books in long, narrow boxes, fitted with handles made especially for this purpose, but this is not necessary of course for the ordinary moving. Barrels simply ruin books, and large boxes filled with heavy volumes have caused more than one strike among our men. They are the clumsiest of all things to handle, as well as the heaviest."

Another mode of moving books is to tie them up in small bundles with stout wrapping paper and heavy twine, leaving enough of the twine to make a loop handle for lifting.—New Idea Magazine.

Centerpiece for May Table

A pretty centerpiece for the May luncheon is made as follows: The centerpiece is a high-handled basket gilded and filled with daisies and asparagus ferns. Tie a bunch of daisies and ferns to the handles with soft pink or pale blue taffeta ribbon, carrying an end of the ribbon down to the basket where it ends in a small bow. At each corner have small gilded baskets filled with unhusked strawberries or cherries. Yellow and lavender iris, some calling them flags or fleur de lis, in a tall slender vase make an unusual center, with small individual vases at each plate containing one or two of these stately blossoms. Yellow and lavender are very striking colors, but they do not light up well. Candles are not as much in favor for daytime functions and are entirely tabooed for these glorious springtime functions.

Hemming the Napkins

There is a special little way to treat the edges of a napkin that is commendable, because the stitches are concealed, while the hem is still evident, says the Indianapolis Star.

The stitch used is known in the embroidery world as the napery stitch. First of all, turn the hem as for any trimming and baste firmly around the four sides. Then turn back the basted portion until the background and the basted edge of the hem are in a position for overcasting.

Overcast with tiny stitches, using small strands of the linen, and when finished and flattened out there will be a beautifully worked hem.

THIS French towel end is arranged a full inch in width by continuing the side ties with usually the chosen material, though linen be worked in solid satin stitch, a more it is well to run the scallops with strong linen-broidery will look much nicer if the scalps are chain stitch with soft cotton.

Just the scallops on the plain end (the towel leaves may be added).

For the initial letter to be used in the wreath and in better harmony with this French style is now considered the most in style.

Furnish Summer B
Colors and

LIGHT colors, plain lines, absence of heavy draperies and simple unornate furniture for the summer bedroom are cool-looking and artistic when well handled, says the Montreal Star.

Keep the bedroom paper light. Two-toned stripes in white or grey, with a narrow floral border in yellow, violet, green or pink, are instantly "summery."

Cretonnes for furniture coverings and curtains may now be had to match the border of paper. If the paper is a floral effect, use plain linen, if a solid color, use a floral effect. A soft sage green is sometimes cooler looking with a yellow or pink flowered paper than a own tone.

Unless the room is airy, with a good draft, omit cretonne curtains and use those fine barred muslin or figured lawn. Ruffles are dainty, but they catch dust, and a two-inch hem or narrow cotton edging is more practical.

Where both sets of curtains are chosen, the cretonne ones pushed far to sides. For double or casement windows have them only in the outside edge of outer windows. They should be full enough to slide across entire space when needed for a shade.

It is often cooler looking to have the bed curtains of white or gray to match surface paper, with a band of cretonne down front across bottom. These bands for a bedroom daintier if but two inches wide.

Use matting and rugs or a bare floor with rugs. The latter can now be bought in all colors, both in rag carpet weaves or other woven cotton effects. Grass cloth is also woven to resemble handsome carpet rugs with deep borders.

Curtains Made of Pieces

One form of work is waiting; waiting on bargain counters would be adjudged work by many a woman besides the one in question, who claims her curtains as the just reward of days of waiting until fashions in materials changed and whose lengths of flowery hangings were sold for a song.

She bought them for little prices and pieced them into lengths at odd places where seams were concealed in folds.

She avers that she earned them twice over and there is little doubt of it, by the planning and the measuring she did, but her present windows, with their valances and festoons so gracefully made to cover a multitude of short lengths are telltale evidence of a woman's cleverness at none at all of discarded fashions in window draperies or cut prices.

Putting Away Winter Clothing

The proper disposal of winter clothing will save both time and money next fall, says the New York Tribune. All heavier undergarments should be laundered, mended and otherwise renovated and packed away ready for use. Heavy coats should be thoroughly brushed and folded with wads of soft paper between the folds and also filling out the sleeves.

The same brushing and folding process should be applied to heavy skirts and all plaits should be basted down. Hats may be best preserved by being divested of their trimmings, and these trimmings should be brushed or smoothed. Fur should be sent to storage.

She Disliked DUSTING

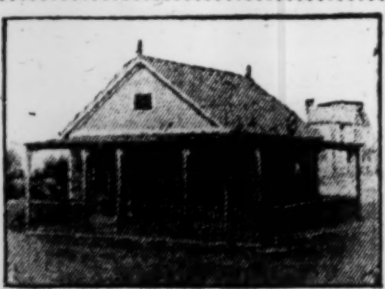

She disliked it until she got a HOWARD DUSTLESS DUSTER, and then she "didn't mind it a bit," because every article of furniture could be wiped spotlessly clean in no time, and not a particle of dust was set afloat in the air to settle somewhere else. Her Dustless Duster holds the dust as soon as it touches it. Wouldn't you like a duster like this? You can get a full size duster by mail for 25c, or a small sample free. There's "No Oil to Soil."

HENRY W. PEABODY & CO., 17 State St., New York

THE HOUSEHOLD

FRENCH TOWEL END DESIGN

Bedrooms in Light Plain Lines

There should be in tones of the paper and curtains. In furnishing a new house have white iron beds with or without brass trimmings. Much better are single beds of white enameled wood with French rounding top and baseboard fitted with woven white cane. With the iron beds one can use mahogany or rosewood maple bureau or dressing table, a white washstand, white or natural colored wicker furniture and a white writing table. Cooler and newer is to furnish the entire room in white enameled wood to match the beds. Writing tables in this wood are copies of antique mahogany ones where is ample drawer and shelf space. Chairs are in wicker, natural colors or painted white. They can be had in all shapes, and the seat and cushion at back are made of cretonne to match drapery. The coolness of this furnishing does not mean dinginess. The enamel finish permits rubbing of spots with a damp cloth or one dipped in kerosene. Do not have much bric-a-brac or many pictures in the summer bedroom. Put away unused photographs, as they are quickly ruined by weather. Have a low vase where fresh flowers are kept. A book rack in white wood, or brass, especially in a guest room. Covers for dressing tables should be of finely edged white pique with buttonholed scalloped and worked with a padded monogram in white. The white pincushion can have a similar design of pique that fastens with ribbons.

How to "Dry Clean" Silk

There are silks the appearance of which is easily spoiled by washing, and for this reason ought to be "dry cleaned." One method is as follows: Put in a basin a quantity of benzine and a little good soap. The quantity of benzine and soap used depends upon the size and number of garments to be cleaned, and one gallon of benzine is usually enough to clean three waists. Two ounces of soap should be quite enough for one gallon of the liquid, but the quantity of soap depends entirely on the degree of dirt in the clothes. Mix the soap with the benzine and also rub some of it on the dirtiest parts of the garment before immersing it, says Marion Harriet Neil in the Journal of Agriculture. Then place the waist in the liquid and squeeze gently until it is quite clean. Squeeze out the liquid and rinse in clean benzine, again squeeze out and roll in a cloth and beat well to remove as much of the liquid as possible. The garment is likely to dry shaded if this is not thoroughly done. Shake the garment well to remove as many of the creases as possible and hang in a current of air to dry until all the benzine is evaporated.

Salt for Cleaning Sink

For a greasy sink a handful of salt rubbed over the sink two or three times a week with a scrubbing brush will very quickly remove any grease and keep the sink smooth and clean.

HOUSEHOLD HELPS

Place all cakes to cool on a wire sieve and never put them away in tins until thoroughly cooled.

When frying the stove is often splashed over with grease. To prevent this sprinkle a little salt in the frying pan before putting in the fat.

When washing fine china or cut glass, a heavy Turkish towel on the bottom of the dishpan will often keep the dishes from chipping.

To keep the floor very white, scrub it with a mixture of three parts sand and one part of partly slaked lime. This will remove all grease spots.

Sifted coal ashes, wheat flour and sand mixed with water make an excellent mortar for patching holes where the plaster is broken. It becomes as hard as stone and can be put on by hand with very little trouble.

To prevent antique brass from tarnishing, first polish with a good paste and then apply a solution of a quarter of an ounce of shellac to a quarter of a pint of methylated spirit. Before doing this heat the brass, if possible, and again after painting over with the varnish.

When heating flatirons it is a good plan to lift and wipe them after being on the stove a few seconds, as the moisture caused by the first heating causes them to become rusty if they are left until they are thoroughly heated. This will also save the labor of cleaning when ironing.

Promptness Desirable

Promptness in all things connected with social life is undoubtedly one secret of popularity, for procrastinating persons not only often frustrate the plans of hostesses, but they insinuate a doubt of the desirability of the invitation received, says Rosanna Schuyler in the Pittsburg Sun. For it is true that human nature is enthusiastic and usually prompt to what pleases and dilatory in affairs which appear dull.

To acknowledge an invitation in the mail following that which brings it is none too prompt, and as a rule can be done. Naturally a woman sometimes must wait to consult her husband as to whether the time suits him, but should he be out of town, so she cannot hear from him on the same day, she should refuse or accept the invitation without consulting him and adhere rigidly to her word afterward.

When it comes to arriving promptly at dinner, luncheon, or whatever time for which one is asked, every effort should be made to be prompt. Every hostess should give her guests five minutes' grace, but later than that may mean the ruin of the whole. If there is to be a delay, which is unavoidable, a guest should telephone immediately to the hostess, explaining, and saying precisely how long it will be.

Sewed on to Stay

In sewing on buttons, if the knot is placed on the right side of the cloth, directly under the button, the thread will be less likely to break and become loosened, and the button will remain on longer.

Paris Fashion Letter Shows Paisley In Vogue

(Copyright by Murielle Loeb, 1910.)

PARIS—It is quite extraordinary how very popular are the silks, ribbons, etc. in Paisley and cachemire designs; indeed there is a fact for these at the moment, and it is no exaggeration to say that this is the leading style note of this season.

The Paris shops are now showing belts composed of suede which have a Paisley figure or design on their surface.

Silk ties and silk belts to match are composed of Paisley silk, and these lend a very stylish point to a white waist and skirt.

The little girls playing in the Tuileries gardens wear immense hair bows of Paisley and cachemire ribbon, and their sashes are composed of the same silk in a wider width.

The newest sunshades come in either natural colored shantung that has a wide paisley border, or in white linen with an embroidered border in paisley design.

The best dressed Parisiennes are wearing large capeline toques composed of immense bunches of chiffon that is printed in paisley pattern. The foulards and taffetas that sell best are those that come in paisley figuring and coloring, and many of the newest shantung gowns are trimmed with bands and borders of paisley silk.

Easy Way to Blacken Stove

The easiest way to blacken a stove is to use a flat paint brush about one and a half inches wide and a tin or jar large enough to receive the brush for the blacking. Apply the blacking to the stove as you would paint, using a newspaper to polish with.

THE HOUSEKEEPER

Hints That May Help.

FANCY TUCKED WAIST.

Such a blouse as this one is sure to meet with approval. It is pretty and dainty and suits all the fashionable thin materials. Mercerized lawn makes this one with trimming of Valenciennes banding but anything that can be laid in fine tucks is appropriate. It can be utilized for silk and made over a lining or for washable material and made without and the neck can be finished as illustrated or with a yoke, making it high, and this yoke can be finished with the material will be found suitable.

6657—Fancy Tucked Waist. 32 to 40 bust.

The quantity of material required for the medium size is 3 1/4 yards 24 or 27, 2 1/2 yards 32 or 2 yards 44 inches wide with 7 yards of banding.

The pattern, No. 6657, may be had in sizes from 32 to 40 inches bust measure and can be obtained at any May Manton agency or will be mailed to any address on receipt of price (10c.). Address 132 East Twenty-third street, New York, or Masonic Temple, Chicago.

SOME TRIED RECIPES.

BRAISED LAMBS' TONGUES. Select a dozen fresh lambs' tongues, wash them well, add a teaspoon of salt, cover with water and simmer for an hour and a half. Drain, remove the skin and trim off the roots carefully. In a frying pan brown two tablespoons each of butter, flour and chopped onion; add two cups of the water in which the tongues were boiled and two cups of strained tomato and stir until smooth. Then add half a cup of chopped carrot, two tablespoons of mushroom catsup, a bay leaf, a sprig or two of parsley and season to taste. Put the tongues in a deep dish, pour over them the prepared sauce, cover tightly and bake for two hours.

A SUMMER SALAD.

Peel, slice and chill half a dozen fresh, ripe tomatoes. Peel and slice three or four fresh cucumbers, young enough to have small, tender seeds. Lay these in ice water for an hour. At serving time drain thoroughly. Rub the inside of a salad bowl or platter with a cut clove of garlic, make a foundation of lettuce, pile the cucumbers in the middle and put the tomatoes around the edge. Sprinkle thickly with finely chopped mint, and pour over a well-mixed French dressing. This is a particularly refreshing salad, suited to either dinner or luncheon.

STRAWBERRY SHORTCAKE.

Two cups flour, two teaspoonsful baking powder, two tablespoonsful sugar, a pinch of salt; sift ingredients together and mix thoroughly with two tablespoonsful of butter; beat two eggs and add to milk enough to make a soft dough; pour into buttered pan and bake; split when done and butter. Have two boxes of strawberries stemmed and slightly mashed on which sugar has been standing for some time; put these between the two halves and serve warm with cream.

POTATO PUFFS.

Add hot milk to cold mashed potato, beat thoroughly. Add one or two well beaten eggs, leaving out the yolks if preferred whiter. Drop in spoonfuls on a buttered tin, place a piece of butter on the top of each and bake a delicate brown or put in a pudding dish and butter the top and bake till a light brown on top. Fifteen minutes in a hot oven will be sufficient.

SNOW PUDDING.

Make lemon jelly with one fourth box or one slightly rounded teaspoon granulated gelatine, soaked in one fourth cup of cold water, dissolved in one cup boiling water, one cup of sugar and one fourth cup of lemon juice. Strain and cool. Beat whites of three eggs very stiff, and when the gelatine begins to thicken combine the two and beat with a perforated wooden spoon in a large bowl, to give wide sweep to each stroke, till very light. Pour into a wet mold or into a pretty glass dish. Serve with boiled custard poured round, if molded, or from a pitcher if not molded.

RUGS

It will be a matter of pleasant surprise to those not already familiar with them, to find how delightfully cool and refreshing one's chamber can be made to look by using washable RAG RUGS on the floors during the warm summer months.

These Rugs come not only in reproduction of the old hit-or-miss rag carpets of Colonial days, but also in a variety of pleasing plain effects.

Their cost is almost trifling and the range of sizes complete, starting with 24x36 in. and ranging all the way to 12x15 ft.

In size 9x12 ft. they are priced from \$8.00 up.

The buying advantages we possess as a wholesale house, together with our wholesale location (one block from Washington Street and Temple Place), carrying a very low rent, have a marked influence on our prices.

Why Have an Overheated Kitchen in Summer?

When the sultry days come and the coal range makes the kitchen almost unbearable and cooking a dreaded task, put out the range fire and try the newest method of cooking in hot weather--use a

New Perfection WICK BLUE FLAME Oil Cook-stove

What a contrast! The kitchen no longer is so hot, the work is now done with comfort, and the housewife is not disturbed by the heat.

She saves her activities, keeps happy and is better able to enjoy the summer.

The New Perfection does everything that any other stove can do--all the family cooking, baking, washing and ironing. No smoke, no dust, no odor. Heat is applied directly and not wasted. A turn, and the flame is out.

The New Perfection stove has a Cabinet Top with shelf for keeping plates and food hot, drop shelves for the coffee pot or saucepans, and nicked towel racks.

It has long turquoise-blue enamel chimneys. The nickel finish, with the bright blue of the chimneys, makes the stove very attractive and invites cleanliness. Made with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet.

ATTORNEY VERTREES FOR DEFENSE MAKES SCATHING ARGUMENT

(Continued from Page One)

committee has no jurisdiction to investigate that matter. On the other hand, he declared there was no inference of misconduct in Mr. Ballinger's services to the claimant.

He denounced Mr. Garfield scathingly as being the tool of Mr. Pinchot. He declared that when Mr. Garfield found that he was not to be secretary under the new administration, he grew revengeful.

"Pinchot—Pinchot, the pure—controlled Garfield just as he pleased," Mr. Vertrees cried. "Everything that was wild and chimerical with reference to a tree or a reserve, he did at Pinchot's direction."

As to Secretary Ballinger's action in turning over to Assistant Secretary Pierce all business relating to the Cunningham claims, when he became secretary, Mr. Vertrees lauded it as right and denounced Attorney Brandeis for "sneering and prating about the appearance of evil."

"Ballinger," he shouted, "has been held up before all the country and has been wounded by these men, and all because of the disappointment and revenge of men who were not capable of a generous or noble impulse."

"Malicious calumny" was Mr. Vertrees' characterization of charges that Mr. Ballinger was guilty of misconduct in connection with the Cunningham claims.

"You, gentlemen of the committee," he declared, "cannot make a report against Secretary Ballinger unless it is upon the assumption that the men who did things—who really handled the claims and who came here and assumed that responsibility did not tell the truth. And you know the truth and that is absolute vindication of their chief."

"Gauguin seems to be the logic of the West. I presume that he has the virtues and the faults of every human being. I know that he is building a railroad in Alaska, and I also know that he is trying to put a bond issue, which is certainly to his credit."

Mr. Vertrees paid a glowing tribute to E. C. Finney and the other clerks in the department, and lauded them as the sort of men who did their work for the nation. Then he digressed and with his arms uplifted, shouted and denounced F. M. Kerby.

"He is a poor, miserable, weak creature who was flattered by an invitation to the Pinchot mansion under the dark, soft mantle of night to confer with such men as this Garfield and Brandeis."

Henry M. Hoyt, formerly attorney-general for Porto Rico, and one of the star witnesses, Mr. Vertrees declared, was the sort of man "who saw a bug under every chip."

WASHINGTON—Whether there is any truth in the report that the Republican insurgents of the House will join with the Democrats in that body for the purpose of impeaching Secretary Ballinger following the considered probable acquittal of that official by a majority vote of the committee which has been investigating him for several months, is not definitely known at this time; and yet, there is just enough likelihood that such a thing will happen to give the rumor a good deal of popular interest.

The insurgents and Democrats form a majority of the House, and if they stick together on the impeachment proposition they will be able to carry it through. On the question of whether there would be a two-thirds vote of the Senate sustaining the impeachment is another question, and one that may be answered very readily. The Democrats and insurgents of the Senate do not constitute two-thirds of that body, and consequently it is not difficult to foresee that the impeachment would fail. But the action of the House in bringing it would have a tremendous effect on the campaign now about to begin, and it is probable that the political phase of the case is the one which is attractive to the Democrats. There could be no impeachment of Secretary Ballinger, of course, without a loss of prestige by President Taft and his administration.

JURY IN HILLS SUIT DISAGREE.

The jury in the \$75,000 suit of Mrs. Martha H. Hills of Chicago against the New York, New Haven & Hartford Railroad Company came in this morning after an all night session and reported a disagreement. Mrs. Hills was struck when a trunk fell from a baggage truck at the station in Hartford, Conn., July 6, 1905. The railroad admits liability and the only question that the jury must agree on is the point relating to damages.

BIG COAL CARGOES ARRIVE.

The largest coal cargo ever brought here by the steam collier *Malden* arrived today from Norfolk on that vessel. It was also one of the greatest fuel cargoes ever landed here. The shipment amounted to 7455 tons, for the coke works in Everett. A large coal cargo also arrived today from Louisville, C. B., in the Norwegian steamer *Reidar*, which brought 6000 tons for the same company.

NEW YORK DEMOCRATS TO MEET.

NEW YORK—William J. Conners, chairman of the Democratic state committee, has issued a call for a meeting of the committee to be held at the Hoffman house Thursday, June 2. New officers will be elected, including a successor to Mr. Conners, who will retire.

UNVEIL SOLDIERS' MEMORIAL IN WESTFORD, MASS., MONDAY

LOWELL, Mass.—The town of Westford will unveil on Memorial day a monument to the men of the town who served in the civil war.

The monument is a gift from Col. Edwin D. Metcalf, a former resident of Westford, now a prominent manufacturer of Auburn, N. Y. It stands on the square facing the town common and is a splendid example of the sculptor's art. There is the heroic bronze figure of a soldier of the Union army in heavy marching order with long Springfield rifle at the right shoulder, standing on a pedestal of Barre granite. The pedestal bears the insignia of the Grand Army of the Republic in bronze and is otherwise appropriately inscribed.

Colonel Metcalf was born here and received his early education in Westford academy. His father, Nathan Metcalf, was the first man to enlist in the town and came back a lieutenant in C company, sixteenth Massachusetts volunteers.

In after years Colonel Metcalf became mayor of Springfield, Mass., and served two terms in the Massachusetts Senate. He received his military title from service upon the staff of Governor Robin.

Among the speakers will be former Gov. John D. Long, who was at one time principal of Westford academy. Another will be the Hon. Charles S. Hamlin, whose grandfather, Nathan Hamlin, was a resident of Westford.

Little Miss Hazel B. Hartford, granddaughter of Wesley O. Hawkes, commander of the Westford Veterans Association, will unveil the monument at 11:30 o'clock Monday forenoon.

The unveiling will be preceded by a band concert on the town common at 9 o'clock, and followed by a dinner for 400 guests, to be served in a big tent. Another band concert and other features will occupy the afternoon.

The committee in charge of the ceremonies includes Capt. Sherman H. Fletcher, chairman; Edward Fisher, secretary; Wesley O. Hawkes, Julian A. Johnson, George T. Day, Andrew Abbot, Oscar R. Spalding and John C. Abbot.

NEW YORK IS GLAD OF HARBOR ACTION

NEW YORK—Business men of New York who have been interested in the harbor project at Jamaica bay are expressing satisfaction today over the final approval which the project received Wednesday at the meeting of the sinking fund commission. Dock Commissioner Calvin Tomkins will at once begin the preliminary work of determining the harbor line. The \$1,000,000 needed for the first steps has already been set aside for the purpose.

The city is to act in conjunction with the federal government in improving the bay and it is understood the government will spend at least \$500,000 in dredging a channel into Jamaica bay from the lower bay. The biggest expense by the city will be for dredging and piling, riprap work and breakwaters.

DECLARE SERVICE TO BE INADEQUATE

Citizens of Cliftondale, claiming that the development of the town is held back by inadequate car service on the Boston & Northern street railway, have filed a petition with the railroad commission for an opinion on the subject.

The Boston & Northern, it is stated, gave them leave to withdraw on a petition of 1100 citizens for the remedying of the conditions.

The petitioners ask for double tracks from Broadway, Revere, through Malden street to Cliftondale square, and for a location from Cliftondale square down Lincoln avenue to and through Ballard street to Western avenue. This arrangement, it is stated, would bring the district within 45 minutes of Boston and 20 minutes of Lynn.

FLAGPOLE BALL HELD OLD PAPERS

OREGON AGRICULTURAL COLLEGE, Corvallis, Ore.—Very interesting relics were brought to light when the brass ball that has surmounted the flagpole on the administration building for the past 23 years, was opened a few days ago.

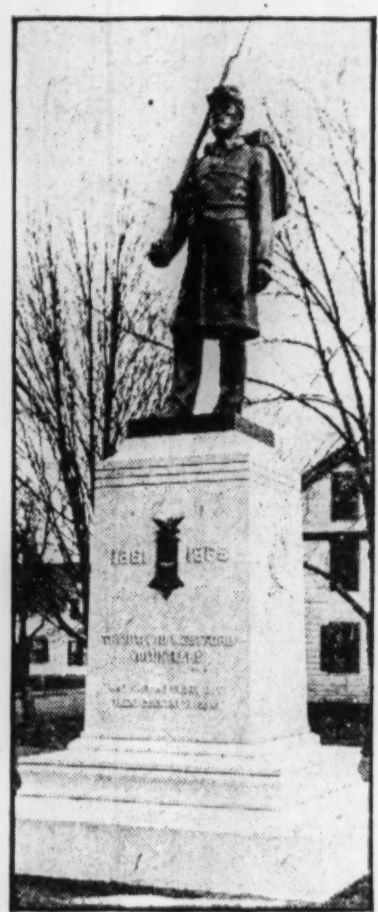

When the ball was opened, it was found to contain a bundle of papers, including the Oregonian of Nov. 17, 1887; the Benton Leader, published Dec. 2, 1887; and a "Lay Sermon on the Labor Question" by Robert G. Ingersoll.

The papers will be placed on exhibit in the college library, until a suitable place can be provided for them in the museum.

LOWER CHARGES FROM NEW CABLE

NEW YORK—Cable rates from New York and points east of the Rocky mountains and Canada, to Peru, Bolivia, Chile, the Argentine Republic, Uruguay and Paraguay will be reduced from \$1 to 85 cents a word June 1. The reduction was brought about through the laying of a new cable from Buenos Aires to the Ascension island by the Western Telegraph Company.

The Central and South American Telegraph Company has announced a reduction in rates to meet the charges by the Western Telegraph Company.

VIEW OF MONUMENT. Statue given town by Col. Edwin D. Metcalf stands in square facing the common.

AVIATORS MAY MEET CROSSING CHANNEL

(Continued from Page One)

now against him. He will wait for more favorable weather.

Mr. Curtiss, in explaining the care he has taken to insure a successful trip, said:

"An aeroplane is like a monster violin. It is a work of art, yet not a standardized commercial product. Everything has to be built by hand and adjusted to its duty in the mechanism, and then the whole thing has to be tuned up to work in harmony."

"Of course I have never undergone the strain of so long a flight as I am now called upon to make. It takes both hands and my body all the time to operate the machine, and there is no such thing as taking leisure aloft, for such a task, for instance, as putting on a pair of gloves. One can't handle the craft even on the smoothest gliding with a single hand."

Mr. Curtiss works his "airlions"—the small intermediary plane which right him after side currents have upset his balance—with his back. His hands care for his front elevating planes, and his feet look out for his gas supply and his magneto connections.

Mayor James B. McEwan has asked Mr. Curtiss to take on his flight a letter of greeting to the mayor of New York. Mr. Curtiss gladly consented to be the first letter carrier of the air.

BETHANY, Conn.—The balloon Massachusetts, with Charles J. Glidden and Jason S. Bailey in the basket, which ascended from Pittsfield, Mass., early today, on the farm of Dennis Meginn near here at 8 a. m.

NEWBURYPORT, Mass.—Several aeroplane flights lasting an hour and a half and covering distances from a quarter to half a mile at an altitude of 15 feet were made Friday by William Hilliard in a Herring-Burgess biplane at the Plum Island aviation grounds. A device to give lateral stability, especially in windy weather, had its first real test. The inventor and Mr. Hilliard say that it worked remarkably well.

PARIS—Louis Bleriot today flew in his monoplane from Tours to Etampes, 90 miles. The flight was not timed.

MR. TAFT IN BOSTON JULY 4.

WASHINGTON—President Taft Friday confirmed the tentative engagement he has had for some time to visit Boston on July 4 and to review the big parade in that city arranged by the committee in charge of the "greater Boston 1915" movement. Edward A. Filene of Boston called at the White House to make the arrangements.

NOTABLES ADDRESS UNITARIANS.

Gov. Eben S. Draper, former Gov. John D. Long and Speaker John Walker of the Massachusetts House of Representatives were the principal speakers at the annual festival of the American Unitarian Association in Tremont Temple Friday evening. The festival was the closing event of this year's anniversary week.

NAVY YARD WAGES INQUIRY.

Civilian employees at the Charlestown navy yard today are interested in the decision of Secretary Meyer to grant the request of Congressman Ernest W. Roberts that he appoint a special board to inquire into the wages of masters, quartermen and foremen at navy yards, as compared with similar work outside.

PIKE AND BASS FOR IOWA LAKES.

OKOJOJI LAKES, Ia.—Four hundred thousand wall-eyed pike and bass have been put in Spirit lake and the same number in East Okojoji from the United States hatchery at Manchester, Ia. During July and August the same number of bass will again be placed in these lakes.

MILK CONTRACTORS OF BOSTON DISCUSS THE PROBE REPORT

William A. Graustein, president of the Boston Dairy Company, today said that he believed the report of the Legislature's special committee which has been investigating the milk situation to be very fair.

Walter H. Hunter, president of the milk producers association, said he believed that the inspection of dairies which the committee recommended was unnecessarily severe and would tend to drive the producer out of business.

George Whiting, who was the chief witness before the committee for D. Whiting & Sons, declined to express any opinion on the committee's report.

PERU IS SHIFTING ARMY TO BORDER

LIMA, Peru—Another large contingent of the army is proceeding to the northern frontier. Despite official assurances from Washington that Peru and Ecuador have accepted the arbitration of the United States, Brazil and Argentina in their boundary dispute, the popular opinion is that war is likely, owing to conditions which Ecuador imposes.

WASHINGTON—The state department expresses "its astonishment" that another contingent of the Peruvian army is being despatched to the Ecuadorian frontier. No news of such character has been received at the state department. The statement was reiterated that both Ecuador and Peru had with expressions of satisfaction accepted Secretary Knox's mediation proposition.

MECHANICS SHOW TO BE IN OCTOBER

For the first time in eight years a Mechanics exposition in Boston is announced for next October. The fair will be given by the Boston Mechanics Exposition, Inc., and will occupy the whole of the Mechanics building from Oct. 3 to 29. It will be along similar lines to the fairs held triennially for many years by the Massachusetts Charitable Mechanics Association.

The Mechanics fairs in the past have proven of great value in the development of industrial life in Boston and New England. Excursion rates have been arranged with all the railroads.

ADJOURN CAUCUS ON POSTAL BANK

WASHINGTON—The Republican House caucus on the postal savings bank bill adjourned at 11 p. m. until next Wednesday night without having completed consideration of the bill. Shortly after the caucus convened it was decided to pass over without action section 9, relating to the disposition of postal savings deposits. All of the remaining sections of the bill were read and accepted but with slight amendment.

GENEROUS SOUTHERN OFFER.

WASHINGTON—In a telegram to President Taft and the speaker of the House, condemning the attitude of those southern representatives who opposed an immediate appropriation for the President's traveling expenses, the business organizations of Augusta, Ga., today offered the government \$5000 cash to meet the deficit of the President's recent transcontinental trip.

BETROTHED TO CONGRESSMAN.

BEVERLY, Mass.—Mrs. John C. Phillips announced the engagement of her daughter, Miss Martha R. Phillips, to Congressman Andrew J. Peters of Boston at a luncheon party of about 20 friends, including Congressman Peters, today at her home at North Beverly. It is expected that the wedding will take place in this city next fall.

BALLINGER MAN RESIGNS.

CHICAGO—Edmund Perkins, engineer in charge of the Chicago bureau of the United States reclamation service, and one of the chief supporters of Secretary Ballinger, has announced that he would retire from public service to enter private business.

RULES TO ADMIT TURKS TO U. S.

WASHINGTON—Secretary Nagel of the department of commerce and labor has ordered admitted a party of Turks from Beirut who were prohibited from landing at New York because they had been assisted in coming to this country.

MOVING PICTURES IN COLORS.

NEWARK, N. J.—Thomas A. Edison said today that he has succeeded in producing a moving picture photographing machine which will take pictures in their natural colors, experiments showing that almost any day would see its perfection.

RAISE SUBMARINE MONDAY.

CAISNE—Divers at work today on the sunken submarine *Pluviose* said it would be impossible to raise the boat before Monday. All through the night the divers passed chains under her preparatory to the attempt to raise her.

CHEMICAL SOCIETY ELECTS.

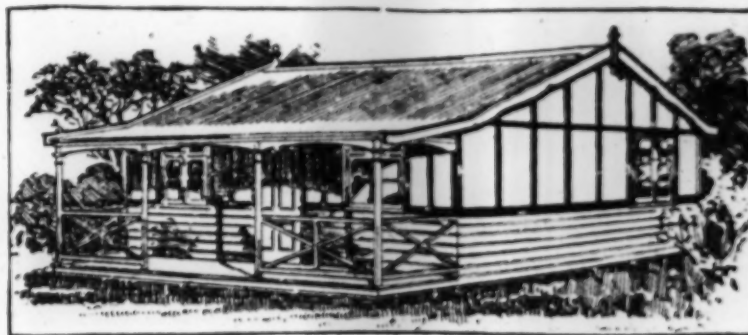

The Tufts College Chemical Society has chosen: President, Percy G. Savage, Medford; vice-president, Louis H. Carter, East Weymouth; secretary, Walter S. Frost of Roxbury; treasurer, Leroy G. Jackson, Marlboro.

JUST THE VERY THING A Bungalow

FOR \$245.00

COMPLETE

Built in sections. Can be erected by two men in four hours.

STANDARD BUNGALOW—NO. 2

IN response to numerous inquiries for a small house at a low price we have decided to offer a Bungalow, dimensions 12 ft. x 20 ft. with porch 6 ft. wide for \$245.00. Freight paid to Eastern and Middle West points. The interior will be partitioned to suit customer without extra cost.

This building has double walls four inches thick exterior clapboard or drop siding, interior wall board papered. The whole is constructed in a first-class manner of excellent materials, interior woodwork stained exterior painted two coats. This house can be occupied during the entire year.

GUARANTEED TO GIVE SATISFACTION

Standard Construction Company

512 TREMONT TEMPLE BUILDING, BOSTON, MASS.

MR. ROOSEVELT IS SAID TO INDORSE THE FIGHT ON CANNONISM

WASHINGTON—At the Capitol today a representative of the United Press was shown a letter just received from Theodore Roosevelt practically indorsing the fight against Speaker Cannon, and the House organization and inviting one of the most influential insurgents to meet him in New York immediately after his arrival.

Coupled with this comes the announcement today on excellent authority that Mr. Roosevelt has accepted an invitation to be the guest of honor at a banquet June 22, given by Robert J. Collier, editor of Collier's Weekly, which has made such a bitter fight against Secretary Ballinger and the present administration. The significance of these two indications as to Mr. Roosevelt's present attitude impressed itself deeply on both insurgents and regulars at the Capitol.

MAYOR EXPLAINS HIS OBJECTIONS TO CAPTAIN PARKER

Says He Believes Fire Commissioner Is One Who Moves in Order to Escape Paying Taxes.

Stories which have reached the ears of Mayor Fitzgerald to the effect that he indirectly forced the resignation of Fire Commissioner Samuel D. Parker led the mayor this afternoon to give out a statement naming two reasons why he did not see fit to reappoint Mr. Parker to the position.

The mayor first states that he believes Mr. Parker to be one of those who change their residences to avoid taxes and believes that the officers of Boston should live within the city and pay taxes to the city. Another reason given for not considering his reappointment was the fact that he favored the transfer of the Mason street fire house to Park square.

It seems, says Mayor Fitzgerald, that a man of Mr. Parker's knowledge of the operations of a department should have realized at once the absurdity of such an arrangement. He did not, however, and it was the mayor who insisted that a public hearing be given upon the proposition. When this was done the protest was unanimous against the relocation.

Former Fire Commissioner Parker could not be located this afternoon.

TALK ON PERSIAN CONDITIONS.

HYDE PARK, Mass.—The Rev. J. D. Shlemmon, who for eight years has been a missionary in his native land, Persia, will tell of conditions there at the Sunday morning service in Christ Episcopal church.

ASSESSORS LIKELY TO RAISE EAST BOSTON REALTY VALUES

Hearing Relative to a Site for a New Courthouse and Police Station Brings Out New Estimates of Worth of Property Compared With the Assessed Rating.

Real estate values in East Boston are expected to take a jump as a result of a conference held in the mayor's office today, at which time the location for the new police station and court house was discussed at considerable length.

During the conference several of those present declared that real estate assessments in East Boston were in some cases 50 per cent below the amount which the owners would take for their property at a sale. Some of those present admitted owning property assessed for less than 50 per cent of its market price.

Mayor Fitzgerald is to order a readjustment of real estate values in East Boston, and it is possible that new assessments may be made for this year. This question is now in order before

the dooming board, which is in session, the mayor sent for Chairman Murphy of the board of assessors and Secretary Charles Folsom while the conference was in progress, but neither was available, and the meeting was adjourned to a later date.

Two sites were seriously considered on which to locate the new courthouse, the one which seemed to have the preference being that known as the Brown-Pigeon estate on Meridian street, about 300 feet north of Central square, the other being the Wood-Granger place on Meridian, White and Border streets.

It is possible that at a later meeting a proposition may be entertained to utilize the present site of the police station, with additional property which can be acquired.

ISSUE EXPLAINED BY CONGRESSMAN

WASHINGTON—Congressman Kollier today gave out the following statement relative to the war department's attitude upon the rebuilding of the Meridian street and Chelsea south bridges: "Boston will not be called upon to expend \$1,500,000 for a new bridge for Meridian street, nor will an expenditure of \$800,000, as rumored, be necessary to alter the Chelsea bridge over the Mystic to meet the demands of the federal authorities. The disposition of the war department is not to embarrass Boston."

THE PARCELS POST BILL.

WASHINGTON—The bill providing for an experimental parcels post, which has been in the House committee on postoffices and postroads since the present session began, will be recalled from committee by the House if a resolution introduced by Representative Hardwick, Democrat, of Georgia, prevails.

LOW RAILROAD EARNINGS.

DES MOINES, Ia.—Thirty-one steam railroads operating in Iowa last year earned a total of \$19,144,592 net. The figures for the interurban roads show that the 14 interurbans earned last year over and above all expenses \$526,716.62.

\$3,400,000 FOR THE INDIANS.

WASHINGTON—By a decision of the court of claims the confederated bands of Ute Indians will receive \$3,400,000 from the United States government in settlement for claims amounting to approximately \$16,000,000.

NAVAL RESERVES ELECTION.

ROCKLAND, Me.—The naval reserves organized Thursday night with the election of Herbert R. Mullin as ensign. It was a three-cornered contest, Edward R. Veazie and Milton W. Weymouth being candidates.

MISS GREEN BECOMES BRIDE.

Elizabeth Shaw Green, daughter of the late Mr. and Mrs. W. B. Green, became the wife of Samuel Eliot Morison of Brimmer street at Trinity church at noon today. The wedding was attended by the leading society folk of Boston, Cambridge and New York.

POOR CATCH OF SEALS.

JUNEAU, Alaska—The total catch of fur seals by the natives in the open sea off the Alaska coast this season will not be more than 125 pelts. Japanese sealers using muffled power boats are expected to reap a harvest.

MRS. RICHMOND GUILTY.

Mrs. Elizabeth Richmond was found guilty by the jury of murder in the second degree. She was accused of killing Stewart McTavish. The jury was out since 6:30 p. m. Friday.

—On—

"Bargains"

The demand for the product I market has not been so great that I have four floors overflowing with bargains at ruinous prices. I have however quite a number of pianos and player-pianos at very low prices. Some were taken in exchange, some bought at auction and some are junk that I have put in presentable condition and will sell for the cost of the work laid out. If you want a musical instrument, the best is none too good, but if you cannot pay for the best I can fit you out with a better "bargain" than any house in Boston and not brag about it. Think it over. Thought breeds confidence.

Geo. Lincoln Parker

Who sells Kruskal's Pianos at 241-243 TREMONT ST., across the road from the Hotel Touraine

Please send me particulars concerning your "bargains."

Name

Address

LEXINGTON COLONY 'FAIR OAKS' SEEKING THE HIGHEST IDEAL

LEXINGTON, Mass.—"Fair Oaks" in this town is unique in the development of suburban country sites for homes, a special effort having been made to develop the 90 acres of the estate according to the highest ideals. Something of which this means may be seen from the fact that two fifths of the property has been given over to drives, bordering grass plots, walks and triangular parks at the junction of two roads.

The prime object of the architect-surveys has been to retain all the charms of the place for the benefit of future dwellers. To this end the house sites were first chosen to suit the topography of the land, drives were laid out so as to prevent ugly cuts and fills as well as give an easy approach to the higher land and finally the boundary lines were run between the lots so as to conserve the many groves of beautiful trees.

The lot lines have been run in such a way that one is easily deceived as to the size of the lot itself. In many cases one-acre lots look to be twice or three times the size. Three and four acre lots have been estimated by visitors to be as high as 10 acres. When the lots are developed it is said this illusion will be enhanced even more.

The careful restrictions on all the lots are well adapted to the "home beautiful" plan. No owner, however discriminating he may be, need fear that his aesthetic sense will be disturbed by untoward activities on the part of his neighbor. Building a home at "Fair Oaks" means to live amid fields and gardens, and to be surrounded by kindred homes.

"Fair Oaks" is situated about 10 1/2 miles from Boston and less than a mile from Lexington common on one of the highest hills of the town, which enjoys a southern exposure and commands a view extending 30 miles to the south and west. Mt. Wachusett is plainly seen and on a clear day the eye may discern Mt. Monadnock towering above its fellows on the hazy horizon.

The site of "Fair Oaks" was chosen by state experts from over 40 estates within a radius of 20 miles of the common examined by them as being the most ideally situated and adapted for the proposed state sanatorium on the cottage plan. An option was secured on the property by the commonwealth, surveys were made and architects were preparing plans for the new institution when the commonwealth in deference to the general opposition of the people of Lexington abandoned their plan.

In this way the advantages offered by the estate to prospective suburbanites were first made known to the public and led to the development of the property along ideal lines.

OFFICERS IN NAVY READY TO CONFER

A number of officers at the Boston navy yard and from vessels in the yard are going to the naval war college annual conference at the Newport (R. I.) navy yard, which opens June 1. Officers from navy yards and ships all over the country assemble at the conference, which is the most important of the year and which annually gains for the navy advantageous changes.

Assistant Secretary of the Navy Beaman Winthrop will make the opening address and there will be a number of lectures by naval specialists. The purpose of the conference is to bring officers of the naval service together to discuss questions upon which opinion is not fully formulated.

HARVARD AWARDS BOWDOIN PRIZES

Bowdoin prizes awarded for dissertations in English are announced at Harvard today as follows: Graduate prizes of \$200 each, Stanley Perkins Chase of Woodford, Me., William James Musgrave of Long Beach, Cal., David Zek-teang Yui of Wuchang, China; first undergraduate prize of \$250, Norman Otto Forster '10 of Pittsburg, Pa.; second undergraduate prize of \$100 each, Roscoe Russell Hess '11 of Seattle, Wash., Neil McCullough Clark '12 of Cleveland and Simon Leventhal '11 of Chelsea.

PRUSSIANS TO RENEW DEMAND. BERLIN—It is widely assumed that the rejection of the Prussian government's franchise bill on Friday portends the early downfall of Chancellor von Bethmann-Hollweg. The Social Democrats will renew their demand for a Democratic franchise and the government will possibly welcome this as tending to bring pressure on the dominant Conservatives.

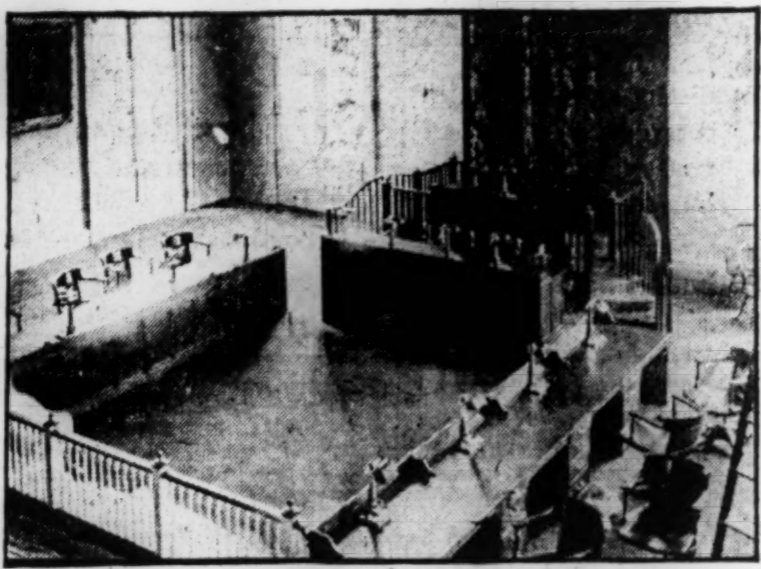

BOY BUILDS WIRELESS PLANT. Calvin Pierce, a high school boy and son of Assistant Postmaster Calvin P. Pierce of Beverly, Mass., has built one of the finest wireless receiving stations in the city at his home at Royal Side. He has two aerials and a plant.

NEW AID FOR GOV. HUGHES. ALBANY, N. Y.—Governor Hughes said Friday he would appoint Col. George C. Treadwell, his military secretary, as his private secretary, to succeed Robert H. Fuller.

SECURES CHELSEA TEACHER. Principal William C. Hill of the Chelsea high school has been appointed as principal of the Central high school of Springfield and will go to that city next fall.

NEW COUNCIL CHAMBER

Nine Boston councilmen will convene here for the first time on June 8; this renovated room cost \$5000.

NEW CHAMBER FOR BOSTON CITY COUNCIL.

Picture shows hall used by former lower branch of city government—fourth floor of city hall transformed and desks of the nine members arranged in a quadrangle with that of the chairman forming one side.

THE Boston city council, when President Walter Ballantyne calls that body to order at the next regular session on Monday, June 8, will begin doing business in the new chamber, the home of Boston's governing body of nine members, which came into existence with the new city charter.

This chamber is on the fourth floor of the old common council and who walks into the new quarters occupied for more than a score of years by what was the lower branch of Boston's governing body, the common council, now a thing of the past.

No one who ever attended a session of the old common council and who walks into the new quarters of the present city council could recognize the surroundings, so thoroughly have the rooms been renovated under the very efficient direction of George W. Morrison, superintendent of public buildings.

When Mayor Fitzgerald and the new city council of nine members were inaugurated under the provisions of the new charter on Feb. 7, they decided that the old aldermanic chamber on the second floor of city hall was not exactly what they desired for quarters, and as the result renovations of the fourth floor were ordered a month later, and the old common council room was taken over by painters, carpenters and furnishers, and now after three months of work Superintendent Morrison is about ready to turn the room over to City Messenger Edward Leary, who in his official capacity will be responsible for it as soon as the council takes possession.

The cost of the renovations will total \$5000. The new council chamber is rich in colorings, furnishings and appointments and will doubtless serve the needs of Boston until a new city hall is erected perhaps many years hence.

While appearing elaborate, the equipment of the new chamber is in perfect harmony and excellent taste. The colorings are in shades of gray, mahogany and green, with just a touch of gold in the ceiling which is the only feature of the old chamber which has been preserved.

The walls and ceiling are done in two soft tones of light gray with the gold leaf decorations on the ceilings. These decorations adorned the old chamber and it was found possible and practical to

HARVARD SHOWS REMBRANDT ART

The early Italian engravings which have been on exhibition in the print room of the Fogg Art Museum of Harvard in connection with the special loan exhibition of Italian paintings have been replaced by a selection from the etched work of Rembrandt, it was announced at Harvard today. The Rembrandt drawing, purchased some months ago, is still in the print room.

The etchings illustrate Rembrandt's treatment of all manner of subjects, some mere sketches, others finished with studied care and show his technique at different periods of his career.

VACATIONS FOR 35,000.

NEW YORK—Mayor Gaynor last night notified the Central Federated Union that he had given his approval to the Hoyt bill providing for a two weeks' annual vacation for all employees of city departments. Recording Secretary O'Brien of the C. F. U. stated that it would affect fully 35,000, including thousands in the street cleaning, fire and police departments.

TO PROMOTE WORLD PEACE.

WASHINGTON—Representative Robinson of Arkansas introduced Friday at the request of the Peace League a joint resolution providing for a joint assembly of the legislative bodies of all governments, to be held in the United States, "to promote peace and good will throughout the world."

\$120,000 FOR BUREAU OF MINES.

WASHINGTON—In a communication forwarded to the House today, the secretary of the interior asked for an appropriation of \$120,000 to maintain the bureau of mines, which will be established on July 1 under the terms of a bill just approved by the President.

PART OF SUBWAY CAVES IN.

A section of the roof of the Cambridge subway at the corner of Massachusetts avenue and Brookline street caved in at 9 o'clock Friday evening. The portion which fell was 50 feet long by 30 feet wide. Men working in the trench 40 feet below escaped the falling mass.

retain this expensive decoration. The wood work is in the same soft gray tones as the walls, with mahogany trimmings while the furniture, including the president's desk, eight desks and chairs for the other members, the clerks and messenger's desks and press tables, are in solid mahogany. Back of the president's desk, which is on the School street side of the building, is hung an elaborate plush drapery in harmonizing tones of green and gold, and the floor is covered with a Wilton velvet carpet of a rich green hue.

The electrical fixtures constitute a charming feature of the furnishings, the central chandelier being of a graceful urn shape suspended from the ceiling by heavy chains. It bears 18 tungsten lights. In addition there are four chandeliers of corresponding design, one in each corner with eight lights, while in the gallery are seven three-light fixtures.

The desks of the councilmen, the clerks and newspaper men are equipped with beautifully designed Emeraldite fixtures two cut glass inkwells being imbedded in the base of each.

The itemized cost of the renovations as near as can be computed before all the bills have been audited are as follows: Furniture \$2071, carpet \$829.75, electric wiring \$325, electric fixtures \$790, painting \$449, carpenter work and incidentals \$500.

The designs and plans for the renovations were supplied by R. Clifton Sturges of the schoolhouse commission and Arthur G. Everett, building commissioner, but Superintendent Morrison had complete charge of all of the work as well as the purchasing of the fittings and equipments.

This is, doubtless, the last important work that Superintendent Morrison will have charge of as superintendent of public buildings, as a successor to him has already been named, and, providing the civil service commission confirms him, will take the position on June 9, the day after the council moves into their new quarters.

Superintendent Morrison's friends are congratulating him on the excellent work that has been accomplished in the renovating of the council chamber and he can justly be proud of his last big job for the city of Boston.

At the Railway Terminals

Vice-President Campbell of the New Haven road in a letter to the different departments handling mail cars states that "the government's appropriation amounts to \$5,047,000 for railway mail service this year; that no rent will be paid for cars that are not sanitary and sound of material and construction. Each division will see to it that all the New Haven road's cars are brought up to the required standard."

The Boston & Maine road ran all of its through trains in sections today from the North station to accommodate heavy travel to the summer hotel localities.

The Boston & Albany road will handle tonight the 80 cars containing the effects of the Barnum & Bailey circus in three trains, leaving Troy, N. Y., at 11:45 p. m. J. O. Halliday, superintendent of transportation, New Haven road, with headquarters at New Haven, is in Boston for a few days looking after the May 30 schedule.

The Boston & Albany and New Haven roads doubled all of their important trains at the South station today for the purpose of handling the heavy auto-holiday travel promptly.

The passenger department of the Boston & Albany road arranged to give the Cleveland baseball club a record trip home last evening in dining and sleeping car equipment provided by the Pullman Company. The party left the South station on the American Express Company's fast train at 5:52 p. m. for Albany, where cars were transferred to the New York Central's western express, held for this connection, which was due to arrive in Cleveland at 10:45 a. m. today.

ANNOUNCE LAW SCHOOL DEGREES.

Boston University law school seniors who are to receive degrees are announced by the secretary. The degree of bachelor of laws will be conferred on 32, that of bachelor of jurisprudence on 11, master of laws on 5 and doctor of laws on 1.

SQUARE IN KEENE TO BE PAVED.

KEENE, N. H.—The city councils have contracted with Field, Barker & Underwood of Philadelphia to pave Central square with vitrified brick, laid in cement concrete, at a cost of about \$17,000.

SENATOR LORIMER ASKS FOR INQUIRY

He Scores Chicago Newspaper Which Brought the Bribery Charges Against Him—Denies Allegations.

WASHINGTON—With a demand for an investigation of the charges that bribery brought about his election, Senator Lorimer of Illinois submitted his case to the Senate today in a speech in which he scored the Chicago Tribune and the men who confessed to bribery. His resolution calling for an investigation was as follows:

"That the committee on privileges and elections be directed to examine the allegations recently made in the public press, charging that bribery and corruption were practiced in the election of William Lorimer to a seat in the United States Senate and to ascertain the facts in connection with these charges and report as fully as possible."

The resolution was referred to the committee on privileges and elections, of which Senator Burrows (Rep., Mich.) is chairman.

Senator Lorimer in a long speech reviewed in detail nearly 25 years of "warfare" in which he has been engaged with the Chicago Tribune. He had resisted the efforts of the editors, he said, "to control Republican politics in Illinois and as a result the newspaper had fought relentlessly to drive him out of power."

He asserted that when the Tribune said that he had offered or given money to any member of the Legislature to vote for him, it knew the assertion to be untrue. "Not one dollar was paid to any member of the General Assembly for his vote for me," said he.

He denounced Charles A. White, by whom an article in the Tribune accusing him of bribery was signed, and asserted that the article in question was "the work of a trained newspaper hand." He also condemned the references to Lee O'Neil Browne and the late Charles Luke, characterizing them as honorable men, deeply wronged by the accusations made.

Lorimer declared that those who made the charges had in view not only his political destruction but there was a "deliberate purpose to destroy a new banking association in Chicago," which he had been organizing with some of his friends.

WAKEFIELD HIGH WINS PRIZE DRILL

WAKEFIELD, Mass.—For the first time in five years company A of the Wakefield high school battalion won the tri-color at the twenty-fifth annual prize drill in the town hall Friday night. The Thayer medal for the winning captain was awarded to Captain Donald White. Other prizes and medals were awarded as follows: Senior drill in manual of arms, Wakefield medal, Corp. Ralph Christie of company A; the second prize, Richardson medal, Sergeant Proctor of company D, and honorable mention, Sgt. Alfred Wilkins of company A.

The prizes in the junior drill in manual of arms were awarded as follows: First prize, Russell medal, Priv. Edward H. Walton of company A; second prize, Southworth medal, Priv. Harold Jenkins of company D, and honorable mention, Priv. Earle Bears of company A. The Flanders medal for best progress during the year was won by Priv. Fred McKie of company A.

BOSTON BANKERS HEAR TRADE TALK

"Our Foreign Trade" was the topic of an address by Fred S. Kent, vice-president of the Bankers Trust Company of New York city, at the annual meeting of Boston chapter of the American Institute of Banking at the Boston City Club last night.

These officers were elected: President, H. E. Stone; vice-presidents, Lyman V. Banker, A. Oswald Yeames; secretary, William T. Killoren; treasurer, Charles T. Conway.

COAL MEN RAISE WAGES.

KANSAS CITY, Mo.—Fifteen independent coal operators and representatives of about 3500 coal miners of district 14, Kansas, have come to a working agreement, granting the Cincinnati convention demands.

"The Crown Has It."

PATRIOTIC SOCIETIES PLAN FOR MEMORIAL DAY'S OBSERVANCE

(Continued from Page One.)

o'clock, at which Comrade James Burroughs will deliver the address.

Mayor Fitzgerald announced Friday that he had decided to allow the various veteran organizations \$9068 for the observance of Memorial day. The money will go to 16 Grand Army posts, 11 Spanish War Veterans camps and eight other veteran organizations.

The amount was the same as that allowed last year for the various organizations, with the addition of \$50 for the John E. Riley camp of Spanish War Veterans, a newly instituted camp.

At Harvard the usual Memorial day exercises, in charge of the Harvard Memorial Society, will be held in Sanders theater at 12:15 p. m. on Monday. President A. Lawrence Lowell will preside, and the address will be given by John Farwell Moors of Boston.

Immediately before the exercises in Sanders theater, at 11:30 a. m., a memorial to the Harvard men who fell in the Spanish war will be unveiled in the Harvard Union. Henry James, 2d, will make a brief address of presentation, and President Lowell will accept the memorial on behalf of the university. At their conclusion members of the university and invited guests, with the Charles Beck post of the Grand Army of the Republic, will march in procession to Sanders theater.

The exercises in Sanders theater, as well as those in the Harvard Union, are open to the public. It is proposed that some of those who come to Sanders theater may like to bring with them flowers to be placed below the tablets in the Memorial transept.

To make the workhorse parade more interesting than ever a championship prize will be awarded in each class or division for the best horse or team of horses in that class. The only condition will be that horses to be eligible for this prize must have taken a ribbon at the parade of 1909. It is expected that the competition for this prize will excite much enthusiasm among truckmen, contractors, coal dealers, milk men, laundrymen, hucksters and others.

The horses will gather about 8 o'clock in the morning on Bay State road and Commonwealth avenue, near where Commonwealth avenue crosses the Back Bay, and the time from then until the parade at 10 o'clock is consumed by the work of the judges and the awarding of the prizes. The line of march is along Commonwealth avenue, from Brookline avenue and Beacon street to Massachusetts avenue. A reviewing stand accommodates several hundred spectators.

The Massachusetts Postoffice Clerks Association will hold its tenth annual convention at Fall River Memorial day. Eight delegates and about 100 postal clerks from Boston will go in a special car attached to the Fall River train leaving the South terminal at 10:30 o'clock. Among them are John A. McMahon, president of branch 5 of Boston; John F. Cippendale, M. P. Hogan, central office; M. J. Barry, Cambridge sta-

tion; James P. Smith, registry division, central office; Francis Bailey, substitutes force; Edward H. Powers, Newton branch; Thomas H. Brooks, Essex street station.

WORCESTER PARK LOCATION ARGUED

WORCESTER, Mass.—More than 100 South Worcester men were at city hall Friday night, to give their views to the park commissioners regarding a location for a playground in their section. There were 22 speakers. Four locations were advocated, and Stillwater pond and Maloney's field were most favored.

The hearing was called by the park commissioners after a trip through South Worcester. The commissioners viewed all the sites offered them, then decided they desired the views of South Worcester people.

CHINESE UPRISING SET SUNDAY.

CHANGSHA, China—Tomorrow is the time fixed in the unsigned anti-foreign posters recently circulated as the date for the general anti-Manchu uprising. The city is strongly patrolled and natives suspected of anti-foreign affiliations are closely watched. Members of the foreign colony have been warned to remain within the quarter set aside for them.

MR. SNEDDEN TO SPEAK.

David Snedden, state commissioner of education, will address the graduating class of 50 kindergarten and special teachers of Miss Wheelock's kindergarten training school, at the Central church, Newbury street, June 2, at 3 p. m.

tion; James P. Smith, registry division, central office; Francis Bailey, substitutes force; Edward H. Powers, Newton branch; Thomas H. Brooks, Essex street station.

YALE GIVES OUT ANNUAL AWARDS

NEW HAVEN, Conn.—Prize awards for the year were announced Friday in the Yale department of music. The Lockwood scholarship for vocal music went to Irving Goodspeed Beebe of New Haven and for organ playing to Pauline Voorhees of Westville, Conn.; the Stinson prize of \$100 for the best original composition to Walter Earl Hartley of Grand Rapids, Mich., and the \$50 prize for organ playing to Cecil Wright of Sandy Hook, Conn.

In the academic department the winner of the Laughlin memorial prize in English was James Edward Meeker of Bridgeport. John Francis Collins of Wallingford received the Scott prize in German, and the Albert Cook prize in poetry went to Elmer Davenport Keith for his poem on "The Echo."

BOSTON SENIORS IN PLAY TONIGHT

The senior class at Boston University will present the play, "The Bachelor's Romance" at 8 p. m. tonight in Whitney hall, Coolidge corner, Brookline. The following is the cast of characters: Miss Florence Young, Helen LeGrand; Miss Araline Jaques, Miss Clementina; Miss Olive Marshall, Sylvia Sonner; Miss Helen Byrne, Harriet Leivestor; Orville Poland, David Holmes, a literary critic; Russell T. Hatch, Martin, David's secretary; Bertram Hooper, Gerald Holmes, David's brother; Edward Martin, Mulberry, just a literary man; Allen R. Frederick, Mr. Savage; William H. Foster, Harold Reynolds.

WHAT A CONSTANT ADVERTISER SAYS!

Telegraphic Address BRIGHTNESS LONDON. — LONDON, PARIS, NEW YORK. —

Show Rooms & Offices: 108 FORE STREET, LONDON, E.C.

THE CROWN PERFUMERY COMPANY

AMERICAN DEPOT OF IMPORTATION, 130 EAST 20TH STREET, NEW YORK, May 26th, 1910

The Christian Science Monitor, Falmouth and St. Paul Streets, Boston, Mass.

Gentlemen:

You may be interested to know that we have completed the classification of replies received from our advertising for the first four months of 1910.

We find that "The Monitor" heads the list for the number of mail orders received from the consumer direct, and is second in the list of town newspapers in the total number of inquiries received. This is very gratifying to us and we take great pleasure in "passing the good word along" to all advertisers that we happen to meet.

We find that the replies received from "The Monitor" readers are written most legibly on and conform in every detail to the requirements of our advertisements.

There is always an evidence of refinement and intelligence in "Monitor" replies. We cannot speak too highly of your splendid paper and take much pleasure in recommending it to firms who contemplate advertising, and wish to secure the maximum of distribution at a minimum cost.

Yours very truly,
The Crown Perfumery Co. of London
By M. J. Sanders

CHICAGO TERMINAL AND BELT LINE ROAD MERGER PROJECTED

Combine Would Include Two
Belt Lines and Two Trans-
fer Concerns Worth a
Hundred Million Dollars.

SAVING IS INTENDED

CHICAGO—An effort is being made to unite the various belt line and terminal railroads of Chicago in order to expedite the movement of freight and decrease the cost. If the merger is accomplished it will mean the organization of a \$100,000,000 concern.

The nucleus of the organization, if it is effected, will be the following lines: Chicago Belt Line Railway Company, operating 124 miles, with a capital stock issue of \$1,200,000 and a funded debt of \$1,000,000; this line is owned by the Chicago & Western Indiana Railroad Company, which in turn is owned by the Chicago & Eastern Illinois, the Wabash, the Erie, the Grand Trunk and the Monon roads. The Indiana Harbor Belt Line railroad, owned by the New York Central and the Baltimore & Ohio; it operates 214 miles, has a capital stock issue of \$2,400,000 and a funded debt of \$5,700,000. The Chicago Terminal Transfer railway, recently purchased for about \$20,000,000 by the Baltimore & Ohio; this road operates 102 miles, has a capital stock issue of \$30,000,000 and a funded debt of \$16,000,000; and the Chicago Union Transfer Railway Company, operating 99 miles and having a capital stock issue of \$2,000,000. This line owns the great clearing yard known as the Stickney Tract. The C. U. T. represents an investment of about \$5,000,000. It is owned by the Chicago, Milwaukee & St. Paul, the Chicago & North Western, the Chicago, Burlington & Quincy, the Chicago, Rock Island & Pacific, the Atchafalaya, Topeka & Santa Fe, the Illinois Central, the Northern Pacific, the Chicago Great Western, the Chicago & Eastern Illinois and the estates of Marshall Field and H. H. Porter of Chicago and of D. Ogden Mills of New York.

The reasons for the proposed merger are to secure the transfer of freight cars between various roads and to and from shippers in the shortest, quickest and least costly manner; to equalize the cost of transfers; to reduce to a minimum the cost of track elevation by eliminating from use those tracks which are not essential; to greatly reduce the amount of switching that is now needlessly done.

ARMY PURCHASES ITS MEAT CHEAP

Big Packers Contract With
Federal Government at
About One-Half Ordinary
Retail Prices.

SAN ANTONIO, Tex.—The high price of meat apparently does not greatly affect government contracts. Tenders advertised by department headquarters at Ft. Sam Houston for the purveyance of fresh beef to the garrison in the department of Texas amply show this. The contracts for Fts. Sam Houston, Clark, Bliss, McIntosh and the Reno remount depot were secured by Swift & Co. at the following respective prices: a hundred pounds: \$8.82, \$10.50, \$8.83, \$9.97 and \$9.95. The Ft. Logan H. Roots, Ark., contract was secured by Armour & Co. at \$9.93 a hundred pounds and John A. Teberman of El Reno, Ok., was given the Ft. Still contract at \$8.40.

According to the contract only the highest grade of meat is accepted by the quartermaster, furnishing cuts, which according to the contract price, would range from a minimum of 4 cents a pound to 12½ cents a pound. The retail price of meat at the points named is little more than double that paid by the government.

The publication of the contracts has created quite a little of a sensation among retail butchers of this city. Compared with the contracts of last year the supply for 1910-11 is a little more than 1 cent higher a pound.

NEW BOARD WILL IMPROVE ROADS

LONDON—The development and road improvement funds act was passed last year, and the road board has now been formed for the purpose of examining, and, where possible, improving the facilities for road traffic and for the administration of any road improvement grant, present or future. Sir George S. Gibb is to be chairman of the board, which will include among its members Lord Pirbright, K.P., who is chairman to Harland and Wolff, Belfast, and interested in other steamship lines; Lord Kingburgh, lord justice clerk of Scotland, whose treatise on the subject of motor traction is familiar to some; Lord St. Davies, and Sir Charles D. Rose, Bart.

WATER POWER NOT CORNERED.
ST. LOUIS—That the "water power trust" has not cornered all the vast opportunities in the United States is the declaration of T. Comerford Martin, of New York. Mr. Martin says the amount of water force available in America for development at a reasonable cost is from 75,000,000 to 150,000,000 horsepower.

Artistic School Building in San Diego, Cal.

Brick and cement structure fashioned after one of edifices at the World's Columbian Exposition is one of many fine educational institutions in Western city.

SAN DIEGO, Cal.—San Diego possesses a number of excellent school buildings, of characteristic styles of architecture and modern appointments. The state normal school which is located here is constructed of brick and cement and is designed after the fashion

CALIFORNIA STATE NORMAL SCHOOL.

of one of the buildings at the World's Columbian Exposition, the White City, which was erected in Chicago for the fair in 1893.

The high school building, which is built on lines resembling an ancient castle or fortification, with turrets and

battlements, and with entrances resembling sally ports, is reputed to be one of the finest educational edifices in the country. It cost \$200,000.

The twelfth street school house is one of the new grammar grade school buildings, and cost the city \$90,000.

NEWS FROM THE CAPITAL

WASHINGTON—Are the members of the life-saving service, who patrol the coasts day and night in all kinds of weather, as much entitled to pensions after a period of enlistment as soldiers and sailors? This question is being decided now in Congress and the life-savers have found an ardent champion of their cause in Secretary of the Treasury MacVeagh, whose department directs their efforts.

Defining retirement as granted to the army and navy as "the acknowledgment by the government of a moral obligation on account of past meritorious service, and a compensation for the loss of earning capacity," Secretary MacVeagh writes to Senator Frye, chairman of the Senate committee on commerce, says:

"The life-saver's habits and course of life are very similar to those of the soldier and sailor. He is enlisted for a specified term of service after a rigid physical examination—to which is added a professional one not required of the soldier and sailor—is subject to rigid discipline, to constant guard duty the performance of daily drills, and, when occasion requires, to do battle. The nightly patrol of the life saver, however, involving long, difficult and wearisome marches in all conditions of weather, is one of especial hardship and exposure which finds no parallel in the

corresponding duty of soldier and sailor."

The secretary is equally in earnest in advocating the proposition to increase the pay of the men in the service 10 per cent for each five years' service. It is intended to place a premium upon experience and conscience in the service and a recognition of the inequality necessarily existing between the veteran and the beginner. In the absence of some such incentive the increased cost of living and the greater opportunities elsewhere, will make the men dissatisfied and increase the number of resignations.

An echo of the Indian wars was heard in the Senate a few days ago, when Senator Dixon of Montana called up the cases of Bull Snake and Old Coyote, Crow Indians with war records but no pensions. A committee recommended that Bull Snake and Old Coyote be paid \$12 each a month, but Mr. Dixon insisted on making the rate \$20.

"Old Coyote and Bull Snake," he said, "these two Crow Indians were wounded in battle with General Crook on the Rosebud Reservation fighting the Sioux 34 years ago this coming June 15. Both of them are in need at this time, and I do think \$20 a month under these circumstances is certainly a pitiful allowance for this great government to render to these Indians."

On that showing the rate asked for by Mr. Dixon was granted by the Senate.

Railroad agents in the West are sometimes plain and blunt in fixing rates as were the "road agents" of the old days in dictating terms, according to a story told by Senator Heyburn of Idaho. In one instance, at least, they carried out this simple plan.

"A stock raiser had a large ranch," said the senator, "and he had hundreds of head of fine stock ready for the market. He sent his agent to the railroad company to get rates. He had already made up his mind to ship so many cars of horses a week. They said, 'Where are these horses?' He told them, 'Well, what kind of horses are they?' He described them. 'What are they worth?' The man with some hesitation said, 'Well, they are worth so much.' 'How much are you getting for them?' Then he demurred. He said, 'Now, that is none of your business.' But they said 'It is our business; you will find it is our business if you want cars to ship them in.' The man finally had to tell them. They took a pencil and in his presence figured out his profit. They said, 'Your profit on these horses is so and so,' and they divided it in two. That is the practice. They said, 'We will furnish cars to ship your horses at that rate.' I know the instance."

BIG POWER PLANT IS NEARLY READY

WASHINGTON—Within a few weeks the \$1,000,000 heat and power plant that will supply the federal buildings on Capitol hill will be in operation.

The huge plant will furnish light, heat and power to the Capitol, the House and Senate office buildings, the Library of Congress, the new supreme court building when it is completed, and probably the marine building, the coast and geodetic survey and the botanic gardens.

The plant is situated halfway between the Capitol and the Potomac river. It is constructed of stone and brick, and contains two stacks each 212 feet high.

GIFT SADDLE FOR MR. ROOSEVELT.

GALVESTON—A saddle made by hand of Texas leather and Oklahoma timber and ornamented with gold will be presented to Col. Roosevelt by the Rough Riders.

COLORADO SUNDAY SCHOOL MEETING

DENVER—A meeting to make arrangements for the Colorado state Sunday school convention in Denver June 13-16 was held recently by the Sunday school superintendents and other workers of the city at the First Baptist church.

More than 2000 delegates are expected and ten Sunday school experts from other states will read papers. The railroads have promised a half rate, or one fare for the round trip.

BRATTLEBORO, VT., FALLS IN LINE.

BRATTLEBORO, Vt.—Brattleboro promises to go on record for a "safe and sane" Fourth of July and the dealers who have ordered fireworks have been notified that the statutes of Vermont make it a misdemeanor to sell firecrackers, rockets or red fire, or to have in their possession toy pistols.

TECHNICAL HIGH SCHOOL FAVORED

Special Investigating Commission Advocates Costly Building for Vocational Work in Syracuse.

A technical high school that would cost \$300,000 including equipment is advocated by a number of the members of the commission investigating the subject of technical education in Syracuse. This will provide advanced instruction in all lines of vocational education.

The commission was appointed by T. Aaron Levy, the president of the board of education and a professor in the college of law of Syracuse University. They are to gather statistics here and in other cities in order to determine what course the city shall follow.

Syracuse already has a technical high school, but this is inadequate for the demands made for this kind of education.

TEXAS REPORTS BIG PEACH CROP

TYLER, Tex.—The peach crop for this season will be the largest in the history of this section and it is claimed by persons who have visited all of the large orchards for the purpose of estimating the crop that 50 per cent more peaches will be moved than ever went out of this territory before.

The Morrill Orchard Company, near Morrill station, 50 miles south of here, on the cotton belt, and other orchards in that vicinity, expect to move fully 400 cars. The main counties comprising this fruit belt are Smith, Rusk, Cherokee, Henderson, Harrison, Upshur and Gregg.

NEW THEATER FOR SCRANTON.

SCRANTON, Pa.—Scranton is going to have another theater, says Charles Frohman, whose productions are played in houses controlled by the Klaw & Erlanger syndicate. At this theater Klaw & Erlanger attractions will be played, the syndicate having recently lost control of the Lyceum, which went over to the "open door policy."

DROP IRRIGATION PROJECTS.

WASHINGTON—No new irrigation projects will be started by the government within the next 10 years, says Director Newell, of the reclamation service. The bureau is now bending its energies to complete the work already begun. It hopes Congress will authorize the \$30,000,000 bond issue.

MUNICIPAL LEAGUE IS AGGRESSIVE FOR POLITICAL REFORM

National Organization Aims
at Betterment of City Ad-
ministration by Education-
al Methods.

COOPERATIVE WORK

NEW YORK—One of the most aggressive agencies in the cause of political progress and improved municipal conditions is the National Municipal League. With its active membership of 1900 and an affiliated membership of 200 chambers of commerce, boards of trade, civic associations and municipal of 165,000, this league is the strongest organization engaged in promoting interest in municipal affairs.

Setting forth the purposes of the National Municipal League, its secretary, Clinton Rogers Woodruff, says:

"The National Municipal League is an active agency for the betterment of American municipal administration, in that it is directly and particularly engaged in creating 'an educated and intelligent public' in the matter of municipal government. From the beginning of its activities in 1894 it has sought to promote a more general interest in municipal questions, and especially in their political and administrative aspects."

"Its first object has been to multiply the numbers, harmonize the methods and combine the forces of all who realize that it is only by united action and organization that good citizens can obtain the adoption of good laws and the selection of men of trained ability and proved integrity for all municipal positions, or prevent the success of incompetent or corrupt candidates for public office."

"The National Municipal League is engaged in what may be called a cooperative work in bringing local reform bodies, business organizations, public officers, educational associations, state and national societies into cooperation with each other in the question of municipal work, and with the league."

"Through its propaganda, through its insistence upon the moral, as well as the social, scientific and economic questions, and through its service as a clearing house in municipal affairs, the league is awakening interest throughout the country, and through its committees it is educating the interest so awakened and through its program is directing it into effective channels."

China's Military Embassy Reaches Germany Where It Will Study for Month

PRINCE TSAITAO AND SECRETARY. Uncle of Chinese Emperor and brother of regent is shown on the left and in front of his assistant.

BERLIN—The special Chinese military embassy, headed by Prince Tsaitao, brother of the Chinese regent and chief of the Chinese general staff, arrived in Berlin today.

There are 20 Chinese officers and experts on military organization in the embassy and it will remain in Germany for at least a month, giving detailed study to the German system of compulsory military service, which system has been adopted by China.

The Kaiser will probably receive Prince Tsaitao in audience on Monday.

Germany takes pride in the fact that China has chosen the German military system as a pattern for the Chinese army. With a population of 60,000,000, Germany has 4,400,000 soldiers. On the same basis China's 400,000,000 will eventually furnish the Celestial kingdom with an army of 30,000,000 trained men.

In return for Germany's tutelage of China in matters of war, this country hopes to secure most of the contracts for equipping the huge Chinese army. The Krupp gun contract alone that Germany has in sight runs far into the millions.

SWEDISH COLLEGE TO BE BUILT.

MINNEAPOLIS—The Swedish Missionary Association has accepted the offer of the Minnehaha Academy, giving a site of 14 acres and \$7000, provided the association will found a college and maintain it.

Farnsworth Farms Drained Everglades

FORT LAUDERDALE
FLORIDA

WE have decided to offer for immediate sale three hundred and twenty-one (321) ten-acre drained, diked, surveyed and staked Florida Everglade Farms.

Rock roads to land and other improvements. Land perfectly dry, on which crops can immediately be planted. We have gained a world-wide reputation by telling exactly the condition of our properties. All of our farms have superior improvements

What You Get

Immediate possession of an improved ten acre Farnsworth Farm, drained, diked, rock roads constructed, surveyed and staked—ready for planting.

Near railroad and canal.

The only surveyed, improved and ready farms that are being offered for sale in the Everglades.

SEND \$20.00 FIRST PAYMENT FOR CHOICE SELECTION, also name of friend who might be interested.

These three hundred and twenty-one (321) farms will be sold for \$650.00 each on the easiest terms ever offered. \$2.00 per acre down and \$1.00 per acre per month. Send for new plat and descriptive circular.

Exclusive section reservations made for agents.

Write for terms immediately.

GOVERNOR HUGHES ISSUES A CALL FOR AN EXTRA SESSION

New York Legislators Expect
Direct Primaries to Be the
Subject That They Will Be
Asked to Consider.

ALBANY, N. Y.—Direct primary legislation must be considered again by the New York Legislature, which is called to meet in extraordinary session June 20, in accordance with a proclamation issued by Governor Hughes Friday only three hours after the regular session came to a close.

The Legislature adjourned sine die at 2 o'clock. Nearly all of the members had left town before the Governor's proclamation was issued. Speaker Wadsworth and Majority Leader Merritt of the Assembly were the most prominent members of the Legislature in town at the time and they merely smiled, while refusing to discuss the Governor's proclamation.

Not until the Legislature meets at 8:30 o'clock Monday evening, June 20, will the members of the Legislature know definitely the purpose of the call. All that is known positively is that the Legislature will be asked to devote its attention again to direct primaries legislation. It would not be surprising if the Governor should ask the Legislature to revise the appropriation bills also at the special session.

PRODS CONGRESS ABOUT TREATY.

WASHINGTON—President Taft has sent to the House a message transmitting a report of the secretary of state detailing the legislation that Congress should make at this session, to carry out obligations of the United States under its treaty with Great Britain signed Jan. 11, 1909, for the settlement of their international waterway differences. The report says \$75,000 would not be an excessive appropriation.

HEAVY TIN PLATE SHIPMENT.

ST. PAUL—Tin plate at the rate of three cars a day is passing through St. Paul, consigned to factories in the West, for the making of cans to be used in the salmon and fruit industries. The movement is unusually heavy.

BRIEF CONCESSION FOR NOISE MAKING IS NEW YORK PLAN

NEW YORK—Fifteen minutes of noise, during which every lad in New York could fire off his entire stock of firecrackers and explosives, is proposed as part of a program for a model Fourth of July, a plan for which has been drawn up by the Playground Association of America.

The association would make the day one of great parades, speechmaking and athletic games, with a quarter of an hour at noon when the entire city might make as much noise as it pleased. At 12 o'clock, it is recommended, the signal for the noise-making could be given by firing salutes from the big guns of the harbor fortifications. In addition to the racket expected from the small boy there would be screeching of whistles and ringing of bells.

Another striking feature proposed by the association is that each child in the city might release a toy balloon with a small American flag attached at the moment when the guns of the harbor forts boom out their salutes.

A committee of 25, appointed by Mayor Gaynor, and an appropriation of city money to pay the expenses of the proposed celebration, are needed, according to the association. It is also pointed out that the day should be given over primarily to children, its chief features being a celebration in each of the 46 school districts of the city. In New York city this should mean approximately 15,000 children in each district celebration.

A parade of school boys and girls in each district is recommended as the best way to start the day. Each borough, the association believes, should also have its own parade in which the national guard, police and fire departments and various civic and patriotic organizations might take part.

These plans provide for an afternoon and evening program as follows:

NEW AUTO RECORDS ARE ESTABLISHED AT INDIANAPOLIS

Kincaide in National Car Makes New Record in 100-Mile Race for Valuable Trophy.

MORE RACING TODAY

INDIANAPOLIS—The second day's racing of the speed carnival at the Indianapolis motor speedway is being run today, and with the remarkably fast work of Friday, when several new records were established, it is expected more new marks will be set up before night.

The big event of Friday was the 100-mile race for a \$1500 silver trophy and a gold medal. There were seven entries and Kincaide driving a National car won. The time was 25.5, better than the former record for 100 miles, which was 1:24:08, made by Chevrolet at Atlanta, Ga. Merz at the wheel of a National was second and Lynch (Jackson) third.

At the end of the first 10 miles Aitken in a National led. He was supplanted by Harroun (Marmion), who, however, lost the lead in the thirtieth mile, when his engine became disabled. At the fiftieth mile Dawson was leading by a lap and had broken the record for the distance. Time 40:28:10. He was also leading at the seventieth mile, still ahead of the record when Aitken withdrew as his motor could not be repaired.

Dawson had to stop for a fouled spark plug and lost the lead to Kincaide in the eighty-fifth mile. At the ninetieth mile Kincaide's time was 1:15:31, which was 17 seconds better than the previous record. The National driver was never afterward headed.

The free-for-all at five miles was the most exciting of the day. It was a fight to the home stretch between Burman and Bragg, the former winning by 60 yards.

Aitken broke the American record for 10 miles for cars of 301 to 450 inches displacement. His time was 8:08:30. The previous record was 8:17:52, held by Chevrolet. Kincaide in a National clipped the record for five miles for cars of 301 to 450 inches displacement by 40 seconds. The Buick with Chevrolet at the wheel also made new figures.

Five-mile free-for-all handicap—Won by Greiner, National, scratch; Touney, National, 35s. second; Green, Stoddard Dayton, scratch, third. Time, 5m. 44.9s.

Ten miles, 231 to 300 inches piston displacement—Won by Harroun, Marmion, Dawson, Marmion, second; Fox, Pope-Hartford, third. Time, 8m. 16.8s.

Five miles, 301 to 450 inches displacement—Won by Chevrolet, Buick; Endicott, Cole, second; Frayer, Firestone, third. Time, 4m. 41.7s.

Ten miles, 451 to 600 inches piston displacement—Won by Aitken, National; Kincaide, National, second; Wilcox, National, third. Time, 8m. 25.9s.

Five miles, 601 to 750 inches piston displacement—Won by Kincaide, National; Dawson, Marmion, second; Harroun, Marmion, third. Time, 4m. 57.8s.

Five miles, free for all, amateurs—Won by Greiner, National; Touney, National, second. Time, 5m. 22.8s. Over 200 starters.

100 miles for silver trophy, value \$1500, and gold medal—Won by Kincaide, National; Merz, National, second; Lynch, Jackson, third; Dawson, Marmion, fourth; Harroun, Marmion, fifth. Time, 1h. 25m. 43.12s.

CARS REGISTERED

The following cars have been registered during the past week with the Massachusetts highway commission: Stanley steamers 4, Cadillac 3, Maxwells 3, Geo. N. Pierce 3, Buicks 3, Oldsmobiles 2, Peerless 2, Stevens-Duryen 2, American Locomotive 1, Autocar 1, Ford, 1, Flanders 1, Franklin 1, General Electric Company 1, General Vehicle Company 1, Rambler 1, Knox 1, Lane 1, Metz 1, Lear 1, Packard 1, Phelps 1, Pierce Arrow 1, Premier 1, Regal 1, Stoddard Dayton 1, White 1, Winton 1.

AUTO LAMPS MUST BE LIGHTED.

TOURISTS NOT AFFECTED BY TAX

New French Law Exempts Automobiles That Are in That Country Less Than Four Months.

Considerable misapprehension exists in this country apparently over the new tax on motor cars in France. The general impression, it would appear, is that the new schedule in force in that ideal touring country affects all tourists, irrespective of the length of time spent there.

Because of the large number of owners of its cars who visit Europe every year the Pierce-Arrow Motor Car Company of Buffalo has had a number of calls for information on the subject. From its Paris branch it has received a copy of a government ruling published in the Journal Officiel. This ruling holds that the tax does not apply in any way to cars whose consecutive stay in Europe is less than four months. The tax aside from that feature is divided into two parts. For a term of 360 days for a car of one or two seats the owner must pay 50 francs and for a car of more than two seats 90 francs.

In addition there is a horsepower tax which ranges as follows for cars of various powers: 1 to 12 horsepower, 5 francs per horsepower; 13 to 24, 7 francs per horsepower; 25 to 36, 9 francs per horsepower; 37 to 60, 12 francs per horsepower; 61 and over, 15 francs per horsepower. When the car is in France for less than a period of one year a number of months lacking. But, according to the Pierce-Arrow information, all cars staying in France less than four consecutive months are entirely free from the workings of the new tax.

Boating Notes

The cruising power boat Gardania, designed by Swasey, Raymond & Page for H. A. Knowles of Boston, was launched May 23 at the yards of Murray & Tregurtha, South Boston.

The Savin Hill Yacht Club held its formal opening May 21 and besides the members there were present a number of invited guests from other clubs. The membership of this club is about 275 and there are 140 boats enrolled.

The Honey Boy, a 55-foot power cruiser built for L. N. Lattimer of Seattle, was launched May 21 at Murray & Tregurtha and will be shipped to Seattle by rail in a few days. She was especially designed to enter the long-distance race from Seattle to Vancouver, B. C. She is 51.3 feet on the waterline, 10.8 feet beam, 3.6 feet draft, and has a 40 h.p. motor. The builders claim that a speed of 11 miles an hour will be possible.

The forty-second annual Memorial day interclub regatta will officially open the boating season in Massachusetts bay Monday. These are open races and will start off the South Boston clubhouse at City Point at 10 a. m. Among the class B boats to enter will be the two new boats, the Mavourneen owned by George Lee and the Amoret owned by C. B. and H. S. Wheelock, and three of the same boats entered last year, the Onda 2d owned by John Greenwood, Timandra owned by John Fallon and Wianmo owned by A. W. Stevens.

W. H. Ward's 30 h.p. Alice is nearly ready for the water and it is expected that she will also enter the races; also the Torment, owned by T. J. and J. F. Burke.

The Toppan Boat Mfg. Company reports that they have had a busy time for the last month.

Among recent shipments was one 16-ft. safety launch, equipped with a 2-horsepower dory, to H. Dicks, Everett; one 20-ft. smooth planked dory, equipped with a 3-horsepower engine with one of their folding spray hoods, and with all fittings necessary to make a power boat complete and ready for the water, to Robert Finney, Brookline; one 20-ft. safety launch equipped with a 5-horsepower engine with reverse gear and a very complete equipment, to Carl H. Page, Worcester; also one 16-ft. new type dory to Philip H. Muir, Williams Wharf, Mathews county, Va. This boat attracted considerable attention when being shipped as it was equipped with one of the new cabins over her engine, with canvas covered decks.

FRANKLIN TRUCK SHOWS UP FINELY

Accompanies Cars in Two-Day Reliability Tour Through New Jersey With Satisfactory Results.

In a two-day automobile reliability tour around New Jersey two Franklin touring cars, one of 42 and the other of 28 horsepower, made clean road scores, and a Franklin truck, which was utilized as a baggage carrier, proved to be as speedy as any of the contesting motor cars.

The run of the first day was from Jersey City to Atlantic City, by way of Lakewood, and the second day the motorists left the ocean shore, running inland through Hammonton and Trenton to Jersey City over a route which proved rough for most of the automobiles. Frequent depressions in the roadway, into which the motor cars pitched with heavy jolts, caused many tire blowouts and a broken axle. The Franklin motor cars, however, withstood the strain on the mechanism and came into every control on time.

A feature of the contest was the performance of the truck. Although not entered officially it started with the other automobiles at Jersey City, was the second to check in at the noon control at Lakewood and was well up among the leaders at the finish for the day in Atlantic City. On the return journey it was among the first to check in at Jersey City. During the two days it maintained touring car speed without incurring any of the luggage which it carried. At times it was going at a speed which nearly equaled the legal limit for the state of New Jersey.

The credit for its ability to hold its place in the line of contestants was given in no small part to the pneumatic tires with which the truck was equipped. It is maintained that with such equipment the service of the truck is largely increased, as pneumatic tires permit greater speed than solid tires, there being less jar to both load and vehicle, with a corresponding lessening of repairs and depreciation.

The engine of the truck was of the 18-horsepower air-cooled Franklin type. The carrying capacity of the car was 2000 pounds.

With the Automobilists

Followers of auto racing generally will be surprised at the announcement made by Ralph de Palma, the track champion, that he has joined the ranks of the free-lance drivers and in the future will not confine himself to any one make of car in contests.

R. E. Ross, chairman of the contest committee of the Quaker City Motor Club, has announced that the club will hold its fourth annual track meet at the Point Breeze course, Philadelphia, on June 4. Seven events are scheduled, all for stock chassis classified according to piston displacement.

One of the Boston entries in the Worcester hill climb next Saturday whose work will be watched with interest is that of John J. Kingsley, who has entered his 6-70 Thomas. Although Mr. Kingsley is an amateur in every sense of the word, he has had more or less experience in bicycle and motor cycle competition.

The directors of the Connecticut Automobile Association have elected the Waterbury Automobile Club to membership in the state organization. Gen. Wallace T. Fenn has resigned as chairman of the membership committee of the state association, and the directors elected W. T. Dill of New Haven to succeed the Hartford man.

Charles T. Terry, chairman of the legislative board of the American Automobile Association, has received many letters recently from prominent automobilists in many parts of the country stating that both personally and through their clubs urgent appeals have been made to their congressmen for favorable action on the federal registration automobile bill under consideration by Congress.

The automobilists of Portland, Me., have decided to conduct a hill-climbing contest on July 4, and unlike the majority of such events the entries of experienced drivers from factories are not to be solicited nor accepted if offered. The Portland men propose to make the affair a strictly local one and have made a rule that all competing cars

PLAN TO CHANGE ATLANTA TRACK

Management of Southern Auto Speedway Considering Resurfacing Present Course With Board.

ATLANTA—Motorists who follow the racing game will be surprised to learn that the management of the famous Atlanta motordrome here is seriously considering a proposition to resurface the two-mile course with boards. J. M. Nye, general manager of the Atlanta course, was in New York last week in conference with F. E. Moskovics, promoter of the Los Angeles board motordrome, who made a flying trip from the Pacific coast, and the two went into the matter thoroughly. Mr. Nye has returned to Atlanta and developments along this line are shortly expected.

The recent success of the motordrome at Los Angeles, Cal., where all world's circular track records from one to 100 miles were broken, has awakened interest in the wooden saucer proposition throughout the country and enthusiasts of Atlanta feel that with a wooden surface it would be possible to run the greatest races ever seen on any course.

It will be recalled that when the world's records were broken on the California saucer throughout the seven days of the meet and the two weeks of practice, not a single serious accident resulted. The safety of the wooden course was most conclusively shown, vindicating a theory of its builders.

A mile in 30s. was made there by Oldfield; De Palma covered five miles in 3m. 15s., and Robertson did 10 miles in slightly over 6m., in addition to which many other remarkable figures were made.

During the seven days there were more than 800 miles of stock car racing of all classes, which, considering both big and little cars, averaged over 75 miles an hour, while there were 95 miles of record trials, averaging 91 miles an hour. No other course in the world ever has shown such a speed performance with such a minimum of accident. The fact that Atlanta has proved to be a safely banked oval indicates that with a board surface it would be a world beater.

ATLANTIC BOATS ON LAKE ONTARIO

The discerning boat buyer on Lake Ontario is beginning to come to the Atlantic coast for his boats. The product of the Atlantic Company is especially well known, recent sales being represented by shipment of a 25-ft. gunnet dory to Association Island Corporation owning an island of 65 acres in Lake Ontario about 8 miles from Sacketts Harbor, N. Y.

This association is made up of the owners, who are mostly officers and managers of the subsidiary companies of the National Electric Lamp Association and the General Electric Company, those not of these companies being in the incandescent lamp business. A permanent camp is maintained from June to September for the business meetings and for the families of the stockholders. This is equipped to take care of 100 people who all sleep in tents which have electric lights and running water.

PORT JEFFERSON PLANS TO HAVE BIG AUTO HILL CLIMB

Will Be Fifteen Events in All and Are Sanctioned by the American Automobile Association.

HANDSOME PRIZES

NEW YORK—Perhaps no hill-climbing competition more interesting to automobilists will occur this season than the one that is to be held at Port Jefferson on Long Island, Saturday, June 25. The Automobile Club of Port Jefferson, under whose auspices the climb is to be held, already have issued entry blanks for the affair which has the official sanction of the contest board of the American Automobile Association. A perusal of the entry blank reveals a list of 15 events as follows:

No. 1—Gasoline stock cars, \$500 or under.
No. 2—Gasoline stock cars, \$501 to \$1250.
No. 3—Gasoline stock cars, \$1251 to \$1500.
No. 4—Gasoline stock cars, \$1501 to \$2000.
No. 5—Gasoline stock cars, \$2001 to \$2500.
No. 6—Gasoline stock cars, \$2501 to \$3000.
No. 7—Gasoline stock cars, \$3001 to \$4000.
No. 8—Free-for-all. All types and motive power. For special cup offered by the Belle Terre Club, known as "Belle Terre Cup."

No. 9—Gasoline stock chassis between 201 and 450 cubic inches piston displacement.
No. 10—Gasoline stock chassis 451 to 600 cubic inches piston displacement.

No. 11, 12, 13 are open to cars owned for 30 days previous to the contest by residents of Suffolk and Nassau counties.
No. 14—For amateurs. Limited to cars owned by members of the Long Island Automobile Club and the Crescent Automobile Club.

No. 15—For amateurs. Limited to cars owned by members of the Long Island Automobile Club and the Crescent Automobile Club.

It is to be wondered at that the Port Jefferson hill has not been selected for climb long ago as it is an exceptional one to test the "going up" abilities of cars. The course has been specially prepared for this first annual event under the supervision of the Suffolk county superintendent of highways. Peckskill gravel that has been rolled and hardened has been used in the building of the road, with the result that the surface is ideal for the purpose intended. Workmen are now busily engaged banking a slight curve at the top of the hill to insure absolute safety to contestants. The hill is 2000 feet long and has but two curves in its entire length. The average grade is 10 per cent, while the greatest grade is approximately 15 per cent.

A. R. Pardington, manager of the Long Island Motor parkway, has donated a cup which is to be contested for in event No. 15. Mr. Pardington expressed his opinion of the hill as a "live one for live cars."

THOMAS TALKS ON HIGH-GRADE CARS

Says That the Price on These Cars Has Greatly Decreased During Past Few Years.

"When will the price of high-grade motor cars decrease?" is one of the absorbing questions of motordom. E. R. Thomas, one of the powers of the industry, when asked the question, replied as follows:

"This is a question frequently asked, and in reply I can truthfully state that the price of high-grade motor cars has greatly decreased the last few years. To put it more clearly—the high-grade manufacturers are giving a great deal more for the money now than ever."

"I can speak, of course, more definitely of my own experience since the early days. It is hardly more than four years since the two and four cylinder vertical motors, in front, came into vogue, and these the public deemed a great advance in automobile construction—in fact it may be said that the real beginning of the automobile industry was only five years ago, for previous to that time there was no well established design, some of the best known makes using heavy horizontal motors located under the body—opposed horizontal or two-cylinder vertical motors in front."

"The public hardly realizes what great strides have been made in mechanical construction since that event. The design is more expensive—many manufacturers are using six cylinders; the quality of material is beyond comparison in tensile and torsional strength—and in many cases doubled and trebled in cost. It is so much tougher that in many cases from two to three times the machinery, men and room are necessary to produce the same quantity, finer workmanship and the closer finish, and better fits are now exacted—and the labor, therefore, must of necessity be more skilled and better paid."

"Five years ago two-cylinder cars were of small power and were selling at from \$2000 to \$6000. They were heavy, cumbersome, made largely of malleable steel and gray iron castings, with common steel frames, old, cheap tubular radiators, badly fitting and noisy running gears, plain bearings—the workmanship was crude. Bodies were cheaply upholstered. One machine and one man with the soft, cheap material could do three times the work that is now done."

This trophy, which now hangs in the parlors of the Chicago Automobile Club, has been once won by the teams representing each organization. The first year the trophy was offered it was captured by the drivers who carried the colors of the Chicago Athletic Association, and last year the automobilists won.

CONSIDERS PLANS FOR CHICAGO RUN

CHICAGO—Plans are being considered by the contest committee of the Chicago Automobile Club for the third annual interclub contest for the Chicago Automobile Club-Chicago Athletic Association trophy. The officials of the automobile club have asked the athletic organization officials to appoint a committee to meet the automobile club's contest committee for the purpose of selecting a date and arranging the details of this year's event.

This trophy, which now hangs in the parlors of the Chicago Automobile Club, has been once won by the teams representing each organization. The first year the trophy was offered it was captured by the drivers who carried the colors of the Chicago Athletic Association, and last year the automobilists won.

W. L. DOUGLAS \$3.50 SHOE

THE STANDARD for 30 YEARS

Millions of men wear W. L. Douglas \$3.50 common sense shoes because they are the most comfortable, easy-walking, long wearing and the best shoe value for the price in the world. They are made upon honor, of the best leathers, on perfect fitting lasts, by the most skilled workmen, in the latest fashions.

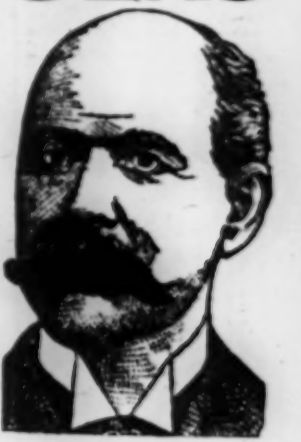

Quality counts. It has made W. L. Douglas \$3.50 shoes leaders everywhere.

W. L. Douglas \$4.00 and \$5.00 shoes equal Custom Bench Work costing \$6.00 to \$8.00, the only difference is the price.

W. L. Douglas guarantees their value by stamping his name and price on the bottom. Look for it. Take no substitute.

Ask your shoe dealer for W. L. Douglas shoes. If not for sale in your town write for Mail Order Catalog showing how to order by mail. Shoes ordered direct from factory delivered free.

Fast Color Eyelets. W. L. DOUGLAS, 100 Spark St., Brockton, Mass.

Boys' Shoes, \$2.50 and \$2.00

"DAN MERRITHEW"

By Lawrence Perry.

"A thoroughly enjoyable story has been written by Mr. Lawrence Perry in 'Dan Merrithew.' The hero is all that fancy can wish for, the girl is attractive, there are bold rescues, a fire at sea, a trip on a derelict, and a satisfactory ending. A story told with much spirit and snap, and no fault will be found with the love making."—*New York Sun.*

MYSTIC WHARF LUMBER BURNS

Fire in the buildings of the Export Lumber Company at Mystic wharves at an early hour today caused a loss of between \$60,000 and \$65,000.

Four wooden sheds were burned to the ground, and five freight cars loaded with hard pine and spruce lumber, as well as piles of lumber between the sheds, were destroyed.

Two barks loading with lumber for South American ports were saved by being flooded. They were the Atacama and the Charles Racine.

HYDE PARK POST TO HEAR SERVICES

HYDE PARK, Mass.—Timothy Ingraham post, 121, G. A. R., will hear the Rev. J. E. Norcross of Jamaica Plain at Blue Hill chapel Sunday afternoon, and the Rev. Asher Anderson, D. D., of the Congregational church in the Hyde Park Methodist church union meeting in the evening. The Sons of Veterans, high school battalion and drum corps, and Uniform Rank Knights of Pythias will take part in the parade at 8:45 o'clock Monday morning.

WARREN MASONIC ORATOR SELECTED

Ernest C. Marshall is to deliver the address at the Bunker Hill monument grounds on the occasion of the annual decoration of the Warren monument by King Solomon's lodge the evening of June 16. The topic of his address will be "The Civic Duty of Masons." Worshipful Master Bennett will preside at the exercises.

MOVE TO COMPEL STREET WIDENING

WAKEFIELD, Mass.—The selectmen have instructed Town Counsel M. E. S. Clemons to take steps to compel the Boston & Northern street railway to widen Water street from Vernon street to the Saugus town line, a distance of about two miles, and to carry the case to the courts if necessary. The road was to have been widened and double-tracked eight years ago.

World's Latest News of Finance and Industry

BETTER FEELING MANIFESTED IN LONDON MARKET

Reduction in Bank of England Rate Anticipated in the Near Future—Genuine Improvement in Trade.

ADVANCE OF JAPAN

LONDON—The stock markets have recently displayed much firmness. Anticipations of an early reduction in the Bank of England rate of discount, coupled with the conviction that there will be tranquillity in domestic politics for a lengthy period, caused a general recovery.

Renewed attention is being paid to home railways. Earnings have increased and will further increase proportionately to the expansion of trade.

The accompanying board of trade returns for April, 1910, constituting a record for both imports and exports and exceeding the previous best figures of 1907, bear witness to such expansion.

April. Increase. 1910. April, 1908. April, 1907.

Imports... 459,555,459 410,381,697 42,772,755

Exports... 35,292,215 6,333,157 875,319

Re-exports... 11,858,654 3,227,648 2,188,736

They prove beyond doubt that there is real improvement, although it must not be overlooked that the gradual rise in prices during the past year amounts to about 10 per cent all round. Rubber accounts for £3,823,590 of the increase in value of imports and for £1,250,900 of the increase in value of re-exports.

Among staple exports there is enhancement in the value of woolen goods by £855,000, cotton piece goods by £821,000, iron and steel and manufactures thereof by £735,000.

The following abstract of an article contributed to the Financial News by Count Okuma, formerly prime minister, foreign minister and finance minister of Japan, shows the very remarkable development of the banking system in Japan during the last half century:

"Rapid as has been the development of Japan within the past 50 years, finance, perhaps, shows the most remarkable changes. It is well within the memory of living men that taxes were paid in rice—bills of exchange and banks being practically unknown. The modern system of banking in Japan dates from the promulgation of the national bank regulations in November, 1872, based mainly upon the national bank act of the United States of America.

The regulations, in their original form, provided that the national bank notes should be convertible in specie.

HAY, GRAIN AND FEED

J. Walter Sanborn & Co. of the Boston Chamber of Commerce—With somewhat larger supplies arriving, prices have been prevented from advancing, but remain steady particularly on the upper qualities, which are in comparatively light supply.

There is considerable medium and poor grade hay offering and to effect prompt sales of such some concessions in price have occasionally been made. Western shippers claim the remaining supplies are very moderate and that they look for well sustained prices for the better grades.

Choice timothy, large bales, has sold \$23.50@24; regular No. 1 \$22.50@23; No. 2, \$22; No. 3, \$19@20; long rye straw, \$15.50.

J. E. Soper Company of the Boston Chamber of Commerce—The grain markets have had a good shaking out. Good, because it is now apparent that prices, especially for wheat, have been too high, on account of manipulation. While corn and oats have not declined as much as wheat, still they have declined considerably.

This sort of a market, as usual, has curtailed trading. It is probable, from our standpoint, that we will have some further decline in both corn and oats, but when things look as though the bottom had been reached, and some confidence can be felt in values, we should have fine business, as we believe that the retail trade of New England was never in such good position to take advantage of low prices as now.

It now seems that there are plenty of old oats to last until the new oats are harvested, and that they are worth practically no more than the new oats. The question now is: What prices will the growing crop of oats warrant? We have advised that it is probable that the crop will not be as heavy as the old one, and should any abnormal crop conditions materialize, it would change the complexion of things, and oats at these prices would look cheap.

We are advised that there is a great deal of corn back in the farmers' hands, but receipts in Chicago do not show this. For the past several years, when corn has got down to a figure not far from where it is at present, the farmers have stopped selling, and they may do the same thing now, especially until they are assured of a good crop of new corn. The quality of the fresh-shelled corn comes.

But when the issue of government loan bonds, amounting to 170,000,000 yen, for the capitalization of the hereditary feudal pensions, was undertaken, the regulations were revised to the effect that the bank notes shall be issued on the security of government loan bonds, and be convertible in government paper money.

ing along now is excellent, which accounts for the premium being paid for it over kiln-dried corn. Some four weeks ago, there was a premium existing on the kiln-dried corn.

There has been no change of consequence in the mill feed market. Bran and middlings are 23@50c. lower. Mixed feeds are practically unchanged and selling at a considerable premium over bran. We see nothing now to warrant higher prices for mill feeds for some time.

TO ASK APPROVAL OF BOND ISSUE

Stockholders of Missouri, Kansas & Texas May Be Called Together Soon to Indorse Directors' Plans.

NEW YORK—It is officially stated that all the details of the negotiations which have been in progress for several weeks for the sale of \$10,000,000 bonds of the Missouri, Kansas & Texas Railway Company have not been completed, but it has been understood for some time that only details remain to be closed.

It is expected that the stockholders will be called together in special meeting the latter part of July to vote upon a proposition, already approved by the directors, to increase the bonded indebtedness of the company to the extent of \$125,000,000 by the authorization of consolidated 30-year 5 per cent gold bonds in that amount.

These bonds, it is understood, will be dated April 1, 1910.

The management, in asking for the authorization of this amount of bonds, does not contemplate issuing a large proportion of them in the near future. As a matter of fact it is proposed to put out only the \$10,000,000 to which reference has been made.

It was learned definitely that the latter amount will be a part of the proposed new authorized issue for \$125,000,000.

The budget for improvements on the Missouri, Kansas & Texas Railway Company, which has been approved by the directors, calls for the expenditure of \$8,500,000 in round numbers. Of this amount \$4,000,000 will be used to pay for new equipment, \$2,000,000 for terminals, \$1,000,000 for the reduction of grades and \$1,500,000 for miscellaneous improvements. No opposition to the authorization of the new bonds is contemplated.

A definite announcement containing all the details of the new plan will be sent to the stockholders shortly.

MEXICAN BANKS' STRONG POSITION

Condition of the Financial Institutions of the Republic Indicates a Very Satisfactory Business.

In advices from Mexico City received here during the last few months—and prominent men at that center who have been in New York in the meantime have substantiated the statements—it has been asserted that the banks throughout the republic, particularly in Mexico City, are in an unusually strong position.

Rates of interest are lower than they have been in several years. To some extent this is probably due to the comparative dullness in general business, but the earnings of the National Railways of Mexico have indicated a steady expansion in trade, which, of course, always means an increased demand for funds.

Consequently, those who are directly interested in Mexican affairs and who best understand the situation attach much importance to the strong position of the financial institutions of the republic. They say that the suspension of two American concerns, one of them very small, in no way reflects the general financial situation.

The following is the April statement of the National Bank of Mexico, the leading bank in the whole republic. The showing which it makes is regarded as gratifying:

ASSETS.	
Gold	\$37,297,515
Silver	8,416,125
Subsidiary coin	3,614,221
Total	\$49,327,861

Michigan bank notes in circulation	97,675
Total	\$328,565,788

GOLD FOR CANADA.

NEW YORK—The average closing price has increased its order for gold for shipment to Canada to \$800,000. This, with the Bank of Commerce engagement, makes a total taking Friday for Canada of \$1,100,000 and brings the total this week up to \$1,650,000.

BUSINESS MAKES BETTER GAIN IN EASTERN SECTION

Improvement in Retail Trade Is Noted by Mercantile Agencies—Larger Volume of Pig Iron Transactions.

FOOTWEAR IS QUIET

Business in the West is better than in the East according to reports issued to the mercantile agencies by their correspondents. However, general improvement is noted throughout the country. Bradstreet's State of Trade says:

Retail trade has shown some gain at leading western markets, but is still classed as below expectations.

Liquidation of remaining small stocks of old clip wool is the feature in this market. Buying of new clip is conspicuous by its absence, and there will be a larger proportion of new clip consigned than for some years past.

Offerings at Boston have been made up largely of South American crossbreeds, and these with domestic fleeces have begun lower.

Concessions in pig iron prices, together with the knowledge that production is being restricted, have brought out a relatively larger volume of business, particularly of foundry iron at the East, although other centers have also shared in the movement.

Copper prices are nominally steady, but it is said that offers to do business would bring out concessions from those willing to make sales.

Wheat, including flour, exports from the United States and Canada for the week ending May 26 aggregate 3,594,144 bushels, against 3,182,809 this week last year.

In the western part of Canada trade continues active, but in the East business is quiet, though the undertone of things is healthy. At Montreal wholesale dry goods houses report that retail dealers are purchasing small quantities of goods to sort up their stocks.

R. G. Dun & Co.'s Weekly Review of Trade says:

Crop prospects are better, and this is plainly indicated by the downward tendency of prices. Visible improvement is taking place in the iron and steel trade.

Buying of cotton goods is still limited, and mills are still indisposed to accept long contracts, owing to unsatisfactory prices. Curtailment is growing as the crop season advances. The trend of trade is toward improvement, however, as reflected in fair sales at Fall River and New York, in the maintenance of the recent slight advances in values and in a more active interest shown by jobbers, from whom a better demand is anticipated when the government cotton report to be issued next week has been digested. In woollens and worsteds stock goods are being offered at concessions, and mills are conservative in the matter of operation on fall lines not under order. The yarn markets are steadier and a little more business is being done.

Trade in footwear continues slow and unsatisfactory. Leather is generally inactive. Trade in spits is especially inactive, and prices on these have declined materially. Business in the West is better than in the East.

BANK OF FRANCE PILES UP RESERVE

Part Played by Institution in International Money Market Is Outlined in Document Just Issued.

WASHINGTON—A striking study of the part which the Bank of France plays in the international money market has just been made public by the national monetary commission, in the form of a translation of the work of Maurice Paton on the Bank of France in its relation to national and international credit. It is pointed out that the bank acts essentially as a public institution, pursuing the essential objects of building up and protecting the national gold reserve rather than seeking profits for its shareholders.

The expense of maintaining an additional reserve and the cost of issuing notes against it represent a clear loss to the shareholders. If the holdings of gold were smaller, the amounts of assets and liabilities would decrease without interfering with the profit and loss account. Smaller holdings of metal would lead to frequent rises in the rate of discount, which are the main source of profit for a bank of issue.

In spite of these obvious advantages to the bank in getting rid of a part of its great stock of the yellow metal, the gold reserve has been allowed to increase until it amounts to about \$700,000,000, and is the largest stock held in any bank in the world.

M. Paton concludes that this reserve affords not only an insurance against crises, but also the surest guaranty against the recurrence of great wars and says that in the settlement of political or diplomatic questions the nation which is richest in gold is always the one which commands the most respect.

WORK PROGRESSES WELL ON THE GRAND TRUNK PACIFIC

More Than Half of the Three Thousand Seven Hundred Miles of Projected Line Will Soon Be in Operation—Great Preparations for Grain Movement.

NEW YORK—Of 3732 miles of the projected Grand Trunk Pacific system there is in operation 1017 miles of main line and 315 of branch line. There is under construction and contracted for completion this year 210 miles of main line and 440 of branch line.

Thus a little over half the mileage will be in operation within a short time. The longest stretch is from Ft. William, on Lake Superior, to Edson, 146 miles west of Edmonton, a distance of about 1300 miles. A portion of this from Winnipeg to Wolfe Creek, 917 miles including branches, and known as the Prairie section, serves a large grain growing and mixed farming country.

To facilitate its enormous grain movement, the company, in 1908, erected 44 grain elevators with average capacity of 40,000 bushels each, and some 50 additional elevators are nearing completion. The greater number will be completed to accommodate the next crop. A terminal storage and transfer elevator under construction at Ft. William, will have a capacity of nearly 10,000,000 bushels.

This same prairie section lies across the interior plateau of northern British Columbia, which embraces approximately 50,000 square miles of territory, containing rich mineral deposits and large beds of high grade bituminous and anthracite coal.

Cost per mile of construction of the prairie section was about \$35,000. Some \$2,000,000 worth of heavy bridge work remains to be done to preserve the low gradient throughout the section.

Three steamers have been placed in operation on the Skeena river, and these are now transporting supplies for mining and trading in the interior country.

Nearly a quarter million cases of salmon are packed annually on this river, which is paralleled by the road 110 miles.

The objective of the transcontinental system is Prince Rupert, an excellent natural harbor on the Pacific coast, some 500 miles northwest of Vancouver—the terminus of Canadian Pacific. From Prince Rupert it is planned to operate a line of steamers to Yokohama, which will be brought nearer to Pacific coast ports by about 500 miles than over existing passenger and freight routes.

Grand Trunk Pacific, when completed, will be practically a level from ocean to ocean, average actual grade being four tenths of 1 per cent. That the Rocky mountains break up in central British Columbia, thus creating many natural passes, makes possible the easy level maintained throughout.

In and about Prince Rupert the railway has acquired about 24,000 acres for the projected townsite and development of the port. One fourth of this development will be shared in by the province of British Columbia.

The western extension is marked by a rapid increase in population and realty values. Since 1906 this western section of Canada, beginning with Winnipeg on the east and including Calgary, Brandon, Edmonton and Edson as the western point, has increased in population nearly 70 per cent, the population in December, 1909, being close to 270,000. Building operations, confined to established towns, during the same period increased in value from \$14,500,000 to \$47,000,000.

The value of 1909 wheat inspected up to Dec. 31 was \$59,000,000, and total value of the year's crops and livestock was \$85,000,000, compared with \$73,980,000 in 1908.

EARLY BUYING OF STEEL BARS

NEW YORK—Makers of agricultural implements, including the International Harvester Company, are now buying steel bars for delivery as late as June, 1911. Most of the steel companies are making the price for these deliveries at \$1.45. Pittsburgh, which is \$1 a ton lower than the quotation for bars a few months ago.

It is said in steel circles that this early buying of agricultural steel is somewhat unusual. The buying has been heavy and represents the major part of the steel business at present, it is said.

Structural steel and rail buying are comparatively backward.

AVERAGE CLOSING OF STOCKS.

NEW YORK—The average closing price of 16 leading stocks Friday was 125 3/16, 3/4 lower than Thursday or 15 1/2 below the highest and 6 7/16 above the lowest of 1909.

STOCK EXCHANGES CLOSED TODAY.

CRYSTAL SPRING BLEACHING BONDS

FALL RIVER, Mass. — At a special meeting of stockholders of the Crystal Spring Bleaching & Dyeing Company it was voted to authorize the issue of first mortgage 5 per cent 30-year bonds to the amount of \$150,000.

The company's plant is located at Asanet, seven miles north of this city. Cotton goods are bleached, dyed and printed. The capital is \$125,000. William Fish, Jr., of New York, is president and controlling owner.

NO BOND ISSUE CONTEMPLATED

NEW YORK—Officials of the Pressed Steel Car Company say there is no truth in rumors of any contemplated bond issue or increase in the debt by the company. The last payment of \$500,000 on its debt matures Feb. 1, 1911, and when paid the company will have no bonded debt of any kind.

There is also no truth in the report that the company intends to build new works at Schenectady or anywhere else.

\$250,000.00

Two Hundred and Fifty Thousand Dollars is required to erect and operate our own manufacturing plant and to increase our output.

THE IMPERIAL POWER WASHER is a marvel of mechanical skill and ingenuity and it has been successfully operated for four years, and the demand for this machine by hotels, laundries, and other institutions requiring laundry machinery is increasing daily and is universal.

To ensure a greater volume of profit a larger plant is required. We offer to any individual or syndicate entire control and management who will subscribe the above amount. This business will bear the closest investigation, and to those interested we will supply further information and references.

BRYANT'S POETRY

SECOND ARTICLE

DISCUSSED
AND QUOTED

THERE were but two defined periods to Bryant's poetical life: the one of childhood, when his verses, if not intensely religious, were political and patriotic, the other beginning somewhere in his earliest teens, with his first acquaintance with Wordsworth. He said years afterward, that in reading Wordsworth's earlier poems all the springs of poetry seem to have been opened within him. His poem, "I cannot forget with what fervid devotion," records this turning point.

This second period lasted throughout his career, and its work places him as preeminently a nature poet, for more than one half of his poems deal with some manifestation of nature, and a large proportion of them do so directly and wholly. At the same time, there is scarcely any poet as deeply in love with nature in whose writings there is so little of the pantheistic strain.

One of his loveliest, and by an increasing number regarded as altogether his finest poem is "To a Waterfowl." Late on a winter afternoon the youth Bryant was trudging along the uphill path from his home to Plainfield, there to begin his unloved law practice. Many circumstances pressed heavily upon him, and he was feeling "forlorn and desolate." As he walked the sun set in a blaze of glory, and he stood still, arrested by the sight. As he gazed he became aware of a solitary bird winging its way along the horizon, and the lonesome boy recognized a sense of kinship with this other traveler.

"Whither, midst falling dew,
While through the heavens with the
last steps of day,
Far, through their rosy depths, dost
thou pursue
Thy solitary way?"

He perceived, too, that the bird was flying at a height which secured its safety—

"Vainly the fowler's eye
Might mock thy distant flight to do thee
wrong."

and that it had a sure destination, and did not fear nor falter, and could not fail.

"There is a power whose care
Teaches thy way along that pathless
coast—
The desert and illimitable air—
Lone-wandering, but not lost."

The tranquil thoughts kept coming, as he stood there, hope and courage filled his heart, in a confidence of the one atmosphere in which every creature of God moves, and when the bird was finally lost to sight, he knew it had been God's messenger to him.

"Thou'rt gone, the abyss of heaven
Hath swallowed up thy form; yet, on
my heart
Deeply has sunk the lesson thou hast
given,
And shall not soon depart."

"He who, from zone to zone,
Guides through the boundless sky thy
certain flight,
In the long way that I must tread alone,
Will lead my steps aright."

Upon reaching his stopping place his first act was to write these verses, which may live beyond anything he has written famous given us. The Verses poem is utterly After Long Walk original—there is no other from which it can be supposed to have drawn its inspiration, and in its completeness of melody of strength, it is about as flawless as a mundane thing may be.

"A Forest Hymn": "The groves were God's first temples." This impressive line is familiar to the ear wherever the English language is spoken; yet some have never gone farther than this into the lofty structure of blank verse to which it is like an open doorway. Stately passages are here:

"Father, thy hand
Hath reared these venerable columns,
thou
Didst weave this verdant roof. Thou
didst look down
Upon the naked earth, and, forthwith,
rose
All these fair ranks of trees. They, in
thy sun,
Budded, and shook their green leaves
in thy breeze,
And shot toward heaven."

"This mighty oak—
By whose immovable stem I stand and
seem
Almost annihilated—not a prince
In all that proud old world beyond the
deep,
E'er wore his crown as loftily as he
Wears the green coronal of leaves with
which
Thy hand has graced him."

And in contrast with the grandeur is delicacy and tender grace:

"Noiselessly, around
From perch to perch, the solitary bird
Passes; and yon clear spring, that, midst
its herbs,
Wells softly forth, and wandering, steep
the roots
Of half the mighty forest, tells no tale
Of all the good it does."

It is an unsatisfying task to separate fragments of such a poem as this for quotation, except in the hope of making it known to those who have hitherto passed it by. An unfortunate passage near the close, interpreting the fury of the elements as the wrath of God is the only jarring note, and this is followed by the sweet concluding lines:

"Be it ours to meditate
In these calm shades thy milder majesty,

And to the beautiful order of thy works
Learn to conform the order of our lives."

A poem of large horizon is "The Prairies" in which our western plains have received higher recognition than from any other poet:

"These are the gardens of the Desert,
these
The unshorn fields, boundless and beau-
tiful
For which the speech of England has no
name—
The Prairies."

Bryant wrote to friends while visiting his brothers in Illinois that he took a horse and rode a

Rides a Hundred Miles
Across Prairie
the prairies, and
this poem is the
outcome. The con-
cluding passage contains a noble image
of those to come who should people
these deserts. (Bryant evidently uses
"desert" here in the old English sense
of "uninhabited.")

"The bee
A more adventurous colonist than man,
With whom he came across the eastern
deep,
Fills the savannahs with his murmur-
ings. . . . I listen long
To his domestic hum and think I hear
The sound of that advancing multitude
Which soon shall fill these deserts.
From the ground
Comes up the laugh of children, the soft
voice
Of maidens, and the sweet and solemn
hymn
Of Sabbath worshippers."

Throughout Bryant's poems may be found passages and poems of reverie which "the gentle and voluble spirit of the air" awakened in him. The earliest of these and the best, because the most spontaneous, is "The Evening Wind," from which we call one stanza:

"Go, rock the little woodbird in his nest,
Curl the still waters bright with stars,
and rouse
The wide old wood from his majestic rest,
Summoning from the innumerable
boughs
The strange deep harmonies that haunt
his breast;
Pleasant shall be thy way where
meekly bows
The shutting flower, and darkling waters
pass,
And where the overshadowing branches
sweep the grass."

In a poem called "Musings," not to be found in the regular editions of Bryant's poems, but issued a few years since for the members of the Bibliophile Society of Boston, the poet's love for the stars is most melodiously voiced. The poem contains a reference to the comet of Encke, which appeared in 1825.

"I turned away
And looked to the glorious heavens afar,
Where the stranger orb in his flaming
car
Rode on his destined way."

From this mention of the comet and other internal evidence, it is thought that the poem was written about the time that Bryant, after long deliberation, had determined to break away from the law, and venture upon a purely literary life, which makes many of its passages the more interesting as reflecting the poet's own experience.

"I looked to the lovely vestal throng
Of shining stars and they smiled on
me
With a kind and gentle sympathy—
For I have loved them long;
From youth to manhood, I have loved
With each pure and bright divinity
To hold sweet commune: I have roved,
In boyhood's hour of glee,
And since the somber scarf of years
Was over me, full many a night
Beneath their canopy of light
And felt my soul grow pure and bright
As I gazed on them: . . .
I love them all: each one had power
To chase the shades of my dark hour;
Each one was dear; but yet, thou all
more sweetly shone
To me, my own loved Pleiades,
When glancing through the old elm trees
That proudly reared their leafy dome
Around my boyhood's peaceful home,
As the eyes of gentle sisters, they
Sent down their mild and tranquil ray."

Another poem of the heavens is his "Hymn to the North Star," which moves in an austere, majestic measure much resembling the procession of the plan- to the North Star" ets.

"The sad and solemn night
Hath yet her multitude of cheerful fires;
The glorious host of light
Walk the hemisphere till she retires;
All through her silent watches, gliding
slow
Her constellations come, and climb the
heavens, and go.
"Day too hath many a star
To grace his gorgeous reign, as bright as
they;
Through the blue fields afar,
Unseen, they follow in his flaming way;
Many a bright lingerer, as the eve grows
dim,
Tells what a radiant troop arose and set
with him."

In the third stanza of this poem some have seen a picture of the poet himself, as the first star to rise in the firmament of American poetry, who saw many lesser lights rise and set.

"And thou dost see them rise,
Star of the Pole! and thou dost see them
set.
Alone, in thy cold skies,
Thou keepest thy old unmoving station
yet,
Nor join'st the dances of that glittering
train,

Nor dipp'st thy virgin orb in the blue
western main."

But he, in the last stanza, joins him- self to a company that sees in the polar star a higher symbol.

"And, therefore, bards of old,
Sages, and hermits of the solemn wood,
Did in thy beams behold
A beauteous type of that unchanging
good,
That bright eternal beacon, by whose
ray
The voyage of time should shape his
heedful way."

Another phase of nature furnished him with "The Tides," of which he wrote: "It was written with a certain awe upon me which made me hope there was something in it."

It has lofty thought in it, conveyed with greater art than he evidences in more self-conscious moods. The divine fact behind a mysterious and resistless force of nature is discerned and voiced without trespassing by a hair's breadth upon the rule that a work of art must not be developed into a stated moral. The last three stanzas will imperfectly show this:

"O restless Sea, that in thy prison here
Dost struggle and complain;
Through the slow centuries yearning to
be near
To that fair orb in vain;
"The glorious source of light and heat
must warm
Thy billows from on high,
And change them to the cloudy trains
that form
The curtain of the sky."

"Then only may they leave the waste
of brine
In which they welter here,
And rise above the hills of earth, and
shine
In a serene sphere."

There are three love songs, pure and simple, among Bryant's poems, which, while not great in any sense, are still so graceful in their flowing numbers, and breathe such a tender and joyful affection that we could ill afford to lose them from his mass. In "The Song of Pittcairn's Island," it is the dusky tropic bride of the Saxon who speaks.

"Come, take our boy, and we will go
Before our cabin door;
The winds shall bring us, as they blow,
The murmurs of the shore;
And we will kiss his young blue eyes,
And I will sing him, as he lies,
Songs that were made of yore. . . .
"And I will learn of thee a prayer
To Him who gave a home so fair,
A lot so blest as ours. . . .
In the others, "The Hunter's Sere-
nade," and "The Arctic Lover," the woo-
ing is not yet over.

"The bower is finished, fairest,
Fit bower for hunter's bride,
Where old woods overshadow
The green savannah's side,"
sings the hunter.
"But I shall think it fairer
When thou art come to bless,
With thy sweet smile and silver voice,
Its silent loveliness."

While up among the ice fields the Arctic lover rejoices that the long night of winter is past, and entreats.

"See, love, my boat is moored for thee
By ocean's weedy floor,
The petrel does not skim the sea
More swiftly than my oar."

Bryant's war lyrics are very few; indeed, there are only two which can strictly be so classed. But these ring true. "Not Yet" was written chiefly to those friends in England who would willingly have witnessed our over-throw. "Our Country's Call" followed a month or two later, and both are informed with a glow of passionate patriotism. His only poem on slavery was a solemn thanksgiving upon the passing of the constitutional amendment abolishing it.

"The Battle Field" contains the well known verse:

"Truth, crushed to earth, shall rise again,
The eternal years of God are hers;
But Error, wounded, writhes in pain,
And dies among his worshippers."

Bryant made a number of translations from the German and the Romance languages, as well as from classical poets, but the crown of his literary life was his Homer. He was 72 years of age when he began carrying about with him a pocket copy of the "Iliad," and to occupy himself in translating it. Five years saw this accomplished. The "Odyssey" followed, done with more haste, therefore with less pleasure and not, it is judged, so well. But both works take high rank among English versions of the classics.

Upon the venerable poet's seventieth birthday the Century Club members gathered in notable assembly, to lay Venerable Poet their tributes at his Honored feet. The artists of By Century Club the club presented him with a portfolio filled with original work, and the poets brought their verse. Holmes, Whittier, Bayard Taylor, Thomas Buchanan Reed and others, with a perfect unanimity, honored the poet and the patriot. Lowell sent what he described as a "kind of palinode to what I said of him in 'A Fable for Critics,'" which is amusing reading still. Lowell's poem upon this occasion was the fine "On Board the 76," which nobly made amends, where none were needed, for the irresponsible loquacity of the "Fable."

In honor of his eightieth birthday

NAME COMMITTEES
OF COMMENCEMENT
FOR KINGSTON, R. I.

Program of Rhode Island
State College Will Begin
on June 5, with Address by
President Edwards.

FIVE DAYS FESTIVAL

KINGSTON, R. I.—The commencement week program of the Rhode Island State College will begin Sunday, June 5, and end Thursday night, June 9. In detail the program is as follows:

Sunday, June 5, 3:30 p. m. Baccalaureate address by President Howard Edwards. Sunday evening in Kingston Congregational church, cantata "Ruth," by A. R. Gaul, will be sung with the assistance of Miss Edith L. Glines, Mrs. F. R. Pember, Mrs. M. H. Tyler and W. S. Spencer, soloists.

Tuesday, June 7, 8:00 p. m., reading of the Kingston prize essays.

Wednesday, June 8, 2 p. m., Class day exercises on college campus. 8 p. m., faculty reception.

Thursday, June 9, 11 a. m. Commencement exercises in Lippitt Hall, oration by ex-Gov. George H. Utter; address by Gov. A. J. Pothier, and conferring of degrees by President Edwards. In the afternoon a meeting of the alumni will be held and the annual Alumni-Varsity baseball game played.

The program terminates with the annual commencement ball the same evening.

The graduating class this year will consist of: Paul Steere Burgess of Pawtucket, Randolph Haywood Carpenter of East Providence, Robert Winthrop Cummings of Orange, Mass., Harold Arnold Easterbrooks of Providence, Ralph Waldo Goodale of Leominster, Mass., John Ira Hardy of Groveland, Mass., Bertha May Heath of Lunenburg, Mass., Warren Henry of Hopdale, Mass., Amor Harris Kenyon of Uxuepaugh, Helen Scott Lamond of Uxuepaugh, Leroy Leidman Mounce of North Marshfield, Mass., George Abbott Peabody of Middletown, Mass., John Leland Sherman of Providence, Hiram Jameson Smith of Woonsocket, Albert Frederic Wagner of Berkely, Richard Howes Wheeler of New London, N. H., David Elbridge Worral of Woonsocket.

The faculty has appointed:

Reception committee—President and Mrs. Howard Edwards, Dr. and Mrs. Homer J. Wheeler, Miss E. J. Watson, Mrs. M. L. Chamberlain, Miss Helen B. Thompson, Prof. and Mrs. L. P. Dickinson, Prof. C. B. Coleman, Prof. and Mrs. W. S. Spencer, Prof. and Mrs. George R. Cobb.

Evening ushering committee—J. R. Eldred, Miss F. H. Myrick, H. S. James, Miss Lillian Tolman, Miss J. C. Thompson, A. L. Whiting, J. F. Morgan, R. A. Lichtenthaler, R. H. Waite, Miss E. E. Amison, Miss E. E. Meers, Miss Z. N. Constable, Mr. Falconer, Miss Gould, Mr. Southwick. Day ushering committee—Prof. John Barlow, Prof. A. E. Stone, Prof. S. H. Webster.

Marshall—Lieut. H. G. Stahl. Music—Prof. W. S. Spencer, Dr. B. L. Hartwell, Miss Grace Wells. Decoration—Miss M. D. Eldred, Prof. R. L. Wales, Prof. M. H. Tyler, Mr. Peaslee, Miss Grace Felker, T. C. Rodman. Grounds and buildings—T. C. Rodman, Prof. G. E. Adams, Howland Burdick, Prof. M. H. Tyler.

Alumni entertainment—Miss M. D. Eldred, Prof. G. E. Adams, Howland Burdick, J. R. Eldred, Miss L. C. Tucker. Refreshments and lunch—Miss H. B. Thompson, Miss H. L. Merrow, Miss L. C. Tucker, T. C. Rodman, Mrs. H. Edwards. Teams—H. Burdick. Printing—Miss L. C. Tucker, Miss E. J. Watson.

MR. MACVEAGH TO BE SPEAKER.

ST. PAUL, Minn.—Franklin MacVeagh, secretary of the treasury, will speak in St. Paul before the convention of the Minnesota Bankers Association June 22 and 23.

Bryant's friends, in New York and elsewhere, united in a splendid gift, a bronze vase wrought from special designs and covered with figures and traceries illustrative of his poems and of his journalistic work. Among these the immortalized water fowl occupies a conspicuous place. When the vase was presented, the vast audience, without request or signal of any kind, rose, spontaneously and reverently, a fitting expression of the loving honor in which the "Patriarch of American Poetry" was held in the hearts of the people.

"We, listening, learned what makes the might of words,
Manhood to back them, constant as a star. . . ."—Lowell.

A few of Bryant's nature poems have been reserved for a paper in the interest of the children, to follow

Nobody knows what the first loaf of bread resembled. It may have looked as does now the good old New England doughnut. But the term bread has come through the ages until everybody knows it is something to eat. Despite the fact that so many know how to bake bread enormous enterprises have grown rich selling it. ¶How? ¶By baking good bread and advertising it. If a thing so universally needed and so well known as bread must be advertised, or if advertising helps its sale

What About YOUR Business

Mr. Merchant?

You may not sell bread, but if you will pardon this, the "bread line" has held many a man who failed to see the value of publicity.

Constantly telling people about your merchandise teaches shoppers the value of your wares.

Great business success must follow advertising. It has long since been a commonplace of history how people once hesitated to give up the tallow dip for the candle, how they shook their heads at kerosene; how they scoffed at light coming through a pipe from a gas house; but did they oppose the ubiquitous incandescent light? Well, hardly. The world was then and is today learning about Progress.

Don't for a minute think bread got into the Chanticleer Red class of popularity at the first baking. It took time and money and today it takes brains even to introduce a new line of bread.

All things are not born to popularity. It takes time, money and publicity to get them talked about.

Think then what an uphill fight to make the shopping world want what you have to sell. This of course is taking into consideration that the goods have merit. Bad goods don't deserve to sell and one of the objects of this ad is to try to keep inferior goods from being advertised in this paper.

But any business must grow under the influence of advertising. An occasional ad will get some results, but think what well chosen and continuous publicity will do. Rightly placed it will make your name and wares a household word. If you don't believe it, think what these few letters tell you: "57 Va—ties." You know the firm name this represents. Advertising did it and is doing it.

What About Your Business

Mr. Merchant?

We know you are desirous of progressing and we believe The Monitor will help you get business.

¶If you have good quality goods The Monitor certainly gets into the homes of persons who want that kind of merchandise.

THE MAN WHO WROTE THIS "AD" WILL HELP YOU WRITE YOURS.

BOSTON, MASS., SATURDAY, MAY 28, 1910

INDIA'S NORTHWEST FRONTIER HOLDS BIG HAND OVER ENGLAND

Land of the Pathans Has Proved a Constant Source of Annoyance to Great Britain.

STILL MAKE RAIDS

LONDON.—If the northwest frontier of India has served in times past as a valuable training ground for the army of India, still it cannot be gainsaid that it has been a constant source of annoyance to the government of that country. Inhabited by those wild and warlike tribesmen who are known by the generic name of Pathans, it can hardly ever be said to have manifested an unbroken tranquility.

It is true that since Lord Curzon inaugurated the expedient of forming bodies of tribal militia in the various sections, things have considerably improved; but though the tribesmen as a whole have given little trouble since the general rising of 1897, still the frontier has not been free from petty raids issuing from the barren hills beyond the Indus valley. Such was the affair of March 11 at Pahari Khet, such too was the raid, early in the month of April, on the village of Muhammad Khet. In the latter case the raiders got away with a Hindu bania, or merchant, whom it is understood they mean to hold up for ransom.

The great offenders on the frontier are, and have been for many years past, the Mahsud Waziris, and they have made themselves latterly so troublesome that they have finally been refused admittance into British territory. This prohibition might have been somewhat difficult to enforce, but the British frontier authorities have got over the difficulty by giving any one who can catch a Mahsud from 10 to 40 rupees (\$3.20 to \$12.80). This means to all intents and purposes a cheap blockade, and if there is one thing above all others that is likely to bring the Mahsuds to their senses it is a blockade, for communication with the plains is indispensable to their existence. But the British authorities have not stopped at this. Realizing that the raids are directed primarily against the villages on the Indian side of the frontier, they have armed the villagers lately with good rifles, so that the latter are now on equal terms with any marauders who may come against them. This arming of the villagers has been carried out in Yusufzai, Kurram and Kohat, and has been attended with the most satisfactory results.

Nor has the government been slow to show its appreciation of loyal service, for it has bestowed on the Malik (headman) of Pahari Khet, who was largely responsible for the discomfiture of the marauders of March 11, a sum of 7000 rupees (\$2240), a rifle and a plot of canal land, rent free, for seven years. He has also been provided with a stone house and granted the privilege of a seat in durbar.

Much, however, as the measures taken by the officials of the frontier province are likely to be instrumental in holding the Mahsuds in check, still it is open to question whether even these expedients will produce so thoroughgoing and permanent a result as the railway which is already under construction, and which may be expected to reach Lakki, 20 miles south of Bannu, before the end of the year. The export trade of the Waziris, which consists of timber, firewood, grass mats, ropes, hides and clarified butter, is likely to benefit considerably and thus the great incentive of their restlessness, namely their extreme poverty, has every prospect of becoming a thing of the past. The people of the Bannu plains will also benefit and it should be remembered that Bannu is easily the most fertile district along the whole of the northwest frontier; and, thanks to the railway, an outlet will at last be found for the vast quantities of fodder, wheat, fruit and sugar cane produced in the neighborhood.

TEACHER SECURES HOMESTEAD TRACT

Boston School of Oratory Graduate Starts Log Cabin on 40-Acre Claim, Where She Will Settle.

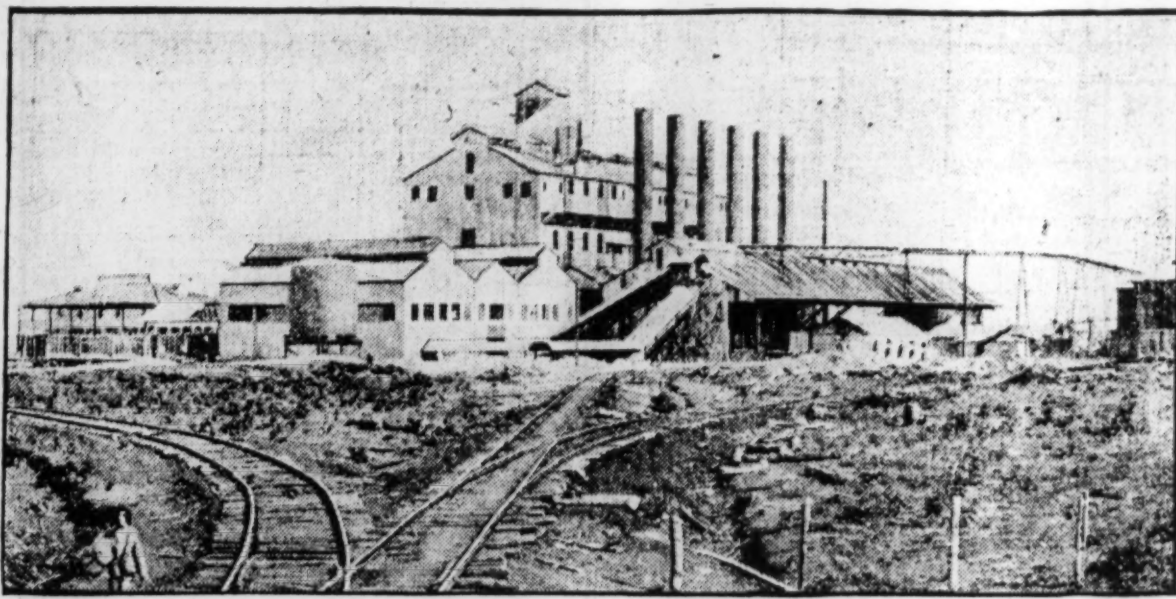

SPOKANE, Wash.—Miss Tessa Simpson, graduate of the Boston School of Oratory and teacher of English in the University of Idaho at Moscow until a few days ago, has filed on a 40-acre tract of agricultural land on the Coeur d'Alene Indian reservation, near Plummer, Wash., where she won a homestead in the drawing by the federal government last August.

Miss Simpson, who is a daughter of W. A. Simpson, a pioneer of the Clearwater country, has advised relatives in Spokane that she will begin ranching in June. She has put a crew of hewers at work building a log cabin, which will be ready for occupancy early next month.

Miss Simpson has arranged for moving her piano and furniture to the homestead.

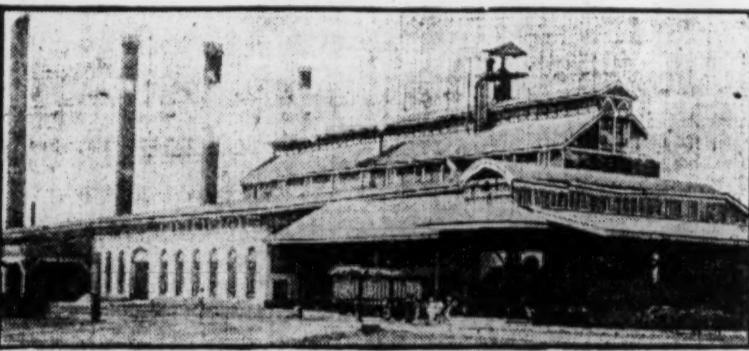

HOW SUGAR IS GROUND IN CUBAN MILLS

Second article describing a visit to a plantation treats with work at factories.

VIEW OF TYPICAL SUGAR MILL.

One of largest factories in Cuba which is located in the province of Matanzas and is said to have cost three quarters of a million dollars.

ONE OF THE "INGENIOS."

This manufactory is located in the province of Havana and runs night and day.

SUGAR is being ground during the present season in Cuba by 185 mills, the province of Santa Clara leading with a total of 70 mills while Camaguey comes last with only three. A visit to one of the largest and best-equipped mills, or "ingenios," as the Cubans call them, is described as follows by a number of a party that recently inspected one of the plantations, who last week told of a trip through the sugar cane fields:

"After dinner our host took us to the huge mill that, from the beginning of the grinding season in December until the commencement of the rainy season—that is, until May, or June, at the latest—is ceaselessly grinding day and night the juicy cane fresh from the fields except when the furnaces are cleaned.

"As we approached nearer we could see the cane being discharged from the cars by automatic machinery which fed the stalks into the mill on a conveyor, and we were told that from the time the cane was loaded on the cars it was not again touched by hand until, transformed into raw sugar, it was sewed up in bags ready for shipment.

"We first visited the crushing machinery where were a series of four

sets of three-roller mills and crushers. These grinding mechanisms seize the cane and press out the juice, after which the refuse of the cane passes on to the roaring furnaces which keep up steam to run the whole plant. This refuse is called 'bagasse,' and is practically the sole fuel needed for the manufacture of the raw sugar, only an insignificant amount of coal and wood being required to put the furnaces in operation at the beginning of the season.

"The juice from the cane, as it passes in succession through the heavy rollers, drips into a receptacle below and is carried in open troughs to the liming tanks, where, after being mixed with lime, it is pumped into the huge juice heater and heated to a temperature of 140 to 150 degrees and then delivered to the defecators, big round tanks with steam coils in the bottom. In these tanks the clear juice sinks and the scum remains on the top. The clear juice is drawn off and delivered to the evaporator. In the meantime, the scum, which in the old days was thrown away, is carried to the filter presses, where it is made into solid cakes (cachaza), which are used for fertilizer.

"In the evaporator a large per cent of

the water in the juice is disposed of, and the mixture that remains is finally drawn off to the Melladura tanks when it has reached a density of 28 degrees Beaume. From thence it is delivered to the vacuum pans to be crystallized into sugar. 'Massicuite,' they call the sticky mass that issues from these pans and is dropped into the mixer.

"There then remains but one more process and then the sugar is ready for shipment. This is the centrifugal, which throws off the molasses, leaving the raw sugar crystals, which are then run off into bags, each containing about 320 pounds of the brown, grainy substance. The time consumed from the moment the cane left ear to its conversion into the finished product of the mill is anywhere from 7 to 10 hours.

"The molasses from the centrifugals is then carried to the 'blow-ups' or defecators, back to the vacuum pans, where it is boiled down to what is called a 'string' consistency. It is then carried in molasses cars to the hot-rooms, where grains of sugar build up, after which this sugar is discharged into the second sugar mixer and put through the second centrifugals. The sugar extracted by this latter process is of a poorer quality, and is sold as 'molasses' or 'second' sugar. However, in mills where they produce only 96 test sugar this low grade product is re-melted and mixed with the first.

"From an average of 10.5 per cent of actual sugar formerly secured from sugar of 96 polarization, 12 per cent is now easily secured," remarked our host, as he led us once more out into the open. "This is the result of the introduction of improved methods and machinery, which have done wonders in rehabilitating the industry, which once more has taken its rightful place as the source of Cuba's greatest wealth."

(In the next installment the shipping and weighing of sugar will be described.)

PROFIT FOR AMERICAN CAPITAL IN BRAZIL

Opportunities for American capital in Brazil are considered excellent by Charles Johnston Post, who in American Industries, declares that "United States money and energy have progressed so far and so fast in the century or so of its existence that both are now forced to look for new fields in which to exercise their enterprise."

At the present time he thinks Brazil unquestionably offers a profitable field for the employment of capital. The country is vast, the resources are practically inexhaustible and conditions for industrial development are excellent.

To many persons Brazil is but the name of "one of those South American republics" and comparatively few people realize that it exceeds the United States in area. It has a coast line almost as long as the Pacific and Atlantic seaboard of the United States combined and can boast of one of the largest and in some respects the most wonderful river in the world. This river, the Amazon, is navigable for ships of large draught for thousands of miles from its mouth and serves a rich and commercial country.

The population of Brazil has risen from 10,000,000 in 1889 to 22,000,000 last year, and the imports which amounted in value to \$117,121,340 in 1902 had increased to \$203,899,100 in 1907. For 1908 the imports totaled \$170,181,490, and the exports \$211,737,183.

These returns not only indicate that the country is rapidly growing in population and wealth but indisputably prove that the government under which such prosperity is possible must be stable, progressive and satisfactory to the people.

The exports of Brazil while enormous at the present are mainly in the form of natural products and even in their rapid yearly increase but represent a fraction of the country's resources. It is here, declares Mr. Post, that Brazil can offer, and in fact does offer the greatest opportunities to outside capital for the establishment of manufacturing plants that will utilize the numberless raw products of the country and turn out the finished articles, not only for export, but for the constantly enlarging home consumption.

At the present time Brazil supplies the world with 80 per cent of its crude

rubber, yet it imports large quantities of finished rubber goods, which might as well be manufactured in the country and thereby save the costs of transportation, handling and custom duties. Let American capitalists, says Mr. Post, start a rubber factory in Manaus or Para and supply the national demand which would keep a large factory busy 12 months in the year.

The opportunities for the employment of American capital in the mining of iron ores are enormous and Brazil recently brought this to the attention of the United States by sending a special high commission to investigate the possibilities attending the proposed importation of iron ore into this country. Professor Brenner of Leland Stanford University, has in an exhaustive report upon the minerals of Brazil, stated that the state of Minas Geraes alone has there is sufficient high grade iron ore to supply the steel mills of the world for years to come. Brazil is anxious to have that ore turned to account. To capital that will mine it and either turn it into useful forms upon the ground, or ship it to the big industrial mills in the United States, she will make favorable terms; such terms indeed as are seldom granted.

There is a bill now before her Congress that provides for the removal of the export tax; the reduction of freight rates from the mines to tide water and the guarantee of 12 per cent dividend to any capital that may be invested.

The Brazilian railways in operation and projected require a large quantity of steel rails and these are being bought in Europe, whereas they would be bought at home should an adequate plant be established.

In the South—Sao Paulo, Santa Catharina and Rio Grande do Sul—there are vast wheat ranges that are now in process of partial development by an American syndicate. The opening up of these wheatlands brings up another opportunity for the establishment of an agricultural implement factory in the neighborhood of Rio de Janeiro. No better location for such an industry could be found, as Rio is contiguous to the markets of Southern Brazil, Argentina, Paraguay and Uruguay, and its establishment would be heartily welcomed.

With adequate capital and modern fa-

cilities the fishing industry could be developed to an enormous extent. Brazil has some 5000 miles of coast line, and thousands upon thousands of miles of rivers all containing the most remarkable varieties of fish known anywhere in the world. Prof. Agassiz after many exhaustive researches estimated that there were more varieties of fish in the Amazon river alone than in the whole of the Atlantic ocean. An English company recently obtained an important fishing concession and were Americans to show as much interest in the matter as they have in the Alaskan salmon fisheries millions of dollars could be realized annually in Brazilian waters.

There are but two paper mills in Brazil, and these are only turning out small quantities of coarse wrapping paper, yet there is a wealth of softwood in the vast forests that would make the best kind of pulp for fine paper, while the fibers of the cotton plant, which grows to profusion in Brazil, could be utilized for the manufacture of the finer grades of writing and calendered papers.

Almost any reasonable concession for the establishment of paper mills in any of the states can be secured by interested capital.

Hitherto there has been no effort made in the Brazilian Republic to utilize the fiber-yielding plants that abound in every section of the country.

True, there is one small factory in the state of Sao Paulo making rope from malvaceae, a fibrous plant from which a finer quality of cordage can be manufactured than can be obtained from hemp, but there is ample scope in utilizing this product alone to open up an industry that will rival anything in the country as far as financial returns are concerned.

Canhama is another plant that is remarkable for the tensile strength of its fibers, and the European market will take all that can be prepared for shipment at a price of \$200 a ton for the finest quality and from \$60 to \$100 for the second quality. Even to cultivate this plant would yield rich returns, but a fortune awaits those who will establish rope-walks for the manufacture of what would prove an excellent cordage.

For the past five years the Germans have practically controlled the supply

ATTEMPT OF ARMY ENGINEERS TO RAISE MAINE STARTS SOON

Tremendous Task Will Be Taken up Under New Chief of Corps Bixby Early the Coming Summer.

PLAN GREAT CARE

WASHINGTON.—It is the purpose of the engineer corps of the army to take up the work of raising the battleship Maine, in Havana harbor, at an early day, so that it may be finished as soon as possible. Gen. W. I. Marshall, now chief of engineers, will retire on June 11, for which reason the active work of making plans and supervising the task will fall to his successor, Col. W. H. Bixby, now on duty at St. Louis. The bill appropriating \$100,000 for this work has already been approved by the President, and is therefore the law of the land.

The Maine has been at the bottom of Havana harbor since Feb. 15, 1898, during which time there has been much speculation as to what will be revealed when the wreck is brought to the surface. It is still a question whether the explosion which sent the battleship to the bottom occurred from the outside or from the inside. The Spaniards always have claimed that the explosion was caused from within, but the rest of the world has inclined to the belief that it was caused from without. The engineer corps of the army will raise the wreck in such manner as to determine this question for all time, for such determination is of the utmost importance because of its bearing on the causes leading to the Spanish-American war.

Not only does the United States desire to use the turret of the Maine as a monument, but there are other sentimental reasons why the government does not want dynamite used in the handling of the wreck. General Marshall says that in raising the hull it may be necessary to employ a tub or colliery. Then the ship would be pumped out and made as light as possible, repaired temporarily and made so she could be floated, provided the injuries to the hull are of a character to permit this.

Eight days after the wreck Congress set aside \$200,000 for the raising of the vessel and the saving of as much of the machinery and armament as possible. A private wrecking company undertook the work, but gave it up after a week, having recovered four 6-inch guns, the paymaster's safe, two 6-pounder guns, two searchlights, a steam cutter, the breech mechanism of the aft 10-inch guns and 100 shells. This bit of salvage cost the government \$54,043.94. Subsequently the government made private contracts with other private wreckers for the raising of the Maine, but after more or less effort each enterprise was abandoned.

DRINKING CUPS ON SOUVENIR LIST

Paper drinking cups have been added to the list of souvenirs for tourists crossing Kansas on account of the new law excluding common drinking cups from the trains, says the Kansas City Times.

A tourist from the Pacific coast showed one of these as he stepped from a Santa Fe train last night. The cup is four inches high and is made of two strips of paper pasted together at the edges, which fold flat when not in use. It can be used only once or twice.

MEMORIAL TO MARSHALL FIELD.

CHICAGO.—The source of an anonymous contribution of \$50,000 to the Young Men's Christian Association in its recent \$350,000 campaign is divulged by Cyrus H. McCormick, who states that it was donated in memory of Marshall Field by his brother, Joseph N. Field, of London.

of monazite which is found in the sands of Bahia and Espirito, and from which the metal thorium is obtained. This is used extensively in the manufacture of incandescent burners.

The Brazilian minister of finance has recently announced his determination to allot publicly to the highest bidder the concession for the development and exploitation of these monaziferous beds and this will be an opportunity for the American capitalists to secure their possession, erect laboratories on the spot to extract thorium and dominate the world market.

Besides these there are countless other ways capital could be profitably employed and in short to quote from a correspondent of the London Times, "In the thoughts Brazil should figure as a country of vast area, of immense, although stagnant, natural resources, a prolific producer of the certain vital raw materials of commerce, offering wonderful prospects for industrial enterprise, but needing capital, wanting population, and all the help in money and material which more highly-developed countries can give to the trio in the industrial arts. In a word Brazil is still in many respects a sleeping giant."

St. Botolph Club Fosters Arts

Educators, artists, musicians, authors and professional men among members.

BOTH literature and art are fostered by the St. Botolph Club of Boston, which numbers among its members many professional men, artists, writers, educators and musicians, and stands for more than mere sociability. The art exhibits held at the clubhouse from time to time are well remembered by those who have viewed the beautiful works that are always to be seen at them.

The specific purpose of the St. Botolph Club as given by its constitution is that of promoting social intercourse among authors and artists and others connected with or interested in literature and art. As has already been stated the membership list covers a much wider scope than that specified by the constitution. Some of its members are actively interested in the subject of parks and other fields of public improvement in which the results obtained bring benefits to mankind in one way or another.

A few of the prominent artist members of the club are Thomas Allen, Dwight Blaney, Emil Carlsen, William Worcester Churchill, Cyrus E. Dallin, Henry Hammond Gallison, Ignaz Marcel Gauguier, Philip Hale, Arthur Merton Hazard, Wilton Lockwood, Herman Dudley Murphy, William McGregor Paxton, Charles Hovey Pepper, Gino Lorenzo Perera, Alexander Pope, Frederic Porter Vinton and Charles Herbert Woodbury. Among the musicians are Arthur Foote, Carl Faeltlen and Timothee and Josef Adamowski. Other prominent members include Edward H. Clement, Prof. A. Lawrence Rotch of the

Blue Hill observatory, Laurence Minot and Robert Treat Paine. It has several hundred resident members and one of the largest non-resident membership lists among Boston clubs.

The St. Botolph Club was founded early in January, 1880, and in May of the same year opened its first clubhouse at 85 Boylston street. A little over seven years later the present clubhouse at 2 Newbury street was opened, which has been the club's home ever since. The present officers are: President, Thomas Leonard Livermore; vice-president, Henry Lefavour; treasurer, Charles Alfred King; secretary, Thomas Tlestone Baldwin. An election of officers takes place June 1.

Guests of members who live more than 30 miles from the city and have no business in Boston may stay at the clubhouse for any length of time up to one month. No member is entitled to invite more than two guests at the same time and the same persons may not make their home at the clubhouse as guests again for three months. If a member's guest lives within 30 miles of Boston and has business in the city he must not, according to the by-laws, stay at the clubhouse for more than one day at a time and not often more than every three months even for that length of time, except to attend an entertainment in a private room. Once a year is the limit for visitors under this provision to attend a meeting of the club.

The interior of the clubhouse is homelike and many valuable paintings adorn the walls. There is also a fine library.

QUARTERS AT 2 NEWBURY STREET, BOSTON.

Interior of this clubhouse that includes bay windows each side of flagpole is homelike and contains a fine library and many fine paintings.

ASK FOR PURCHASE OF HISTORICAL ART WORK BY CONGRESS

NEW YORK.—A Brooklyn man, James Duffy, 23 Madison street, is the owner of a historical oil painting that descendants of veterans of the Mexican war are asking Congress to buy for the national Capitol at Washington. It was painted by a famous artist of war scenes in 1855, and those interested in the movement declare it would make a fine companion piece to one by the same artist now hung in the Capitol near the entrance to the Senate chamber.

The painting is entitled "The Assault and Capture of the Gate of Belin," and represents that famous attack upon the City of Mexico on Sept. 13, 1847, in which the New York state volunteers had such a notable part.

It is the work of J. Walker, whose "Chapultepec" already adorns the Capitol walls. It is a much larger canvas, and, by everybody who has seen both, it is considered a finer example of the artist's genius. The resolution offered by Representative Calder places a value of \$15,000 upon the painting.

There have been only three owners of the painting since it left the artist's brush. The first was August Belmont, the first of that name, whose connection with the Seventh Avenue railroad in its early history is well known. For many years it hung in the railroad offices in Manhattan, and when Mr. Belmont sold his paintings it was bought by President Forsyth, the head of the railroad. From Mr. Forsyth it passed into the hands of his brother-in-law, Major Gaines, and from Major Gaines Mr. Duffy purchased the painting.

NEW DAKOTA ROAD TO OPEN.

ST. PAUL.—Trains will be running regularly out of Moberg, S. D., in a few days over the Cannon Ball branch of the St. Paul road. There are a dozen new towns along the line.

LORD CURZON FINDS MEN'S ENVIRONMENT ILLUMINATING STUDY

STRATFORD-ON-AVON.—Speaking at the meeting of the trustees of the "Shakespeare trust," to the chair of which, lately occupied by Sir Theodore Martin, he has succeeded, Lord Curzon recently dwelt on the light thrown on the lives of famous men through the study of their houses.

He spoke of the hut in Holland in which Peter the Great once lived, of the cottage where Milton composed part of "Paradise Lost," of Walmer castle, connected with the history of so many famous men, having been the official residence of the wardens of the Cinque Ports, of whom he had himself been one, and finally of Longwood in St. Helena, which he himself visited during a holiday.

Quite half, probably three quarters, of the stories of the wretchedness of Napoleon's life here, he declared, were undoubtedly due to the ignorance of biographers who never had the faintest conception of "the beautiful and exquisite character of the surroundings in which the Emperor was placed," and so he went on to explain that in order fully to appreciate the beauty of Shakespearean verse it was necessary to know something of the Warwickshire lanes, in which so many of the poet's days were passed.

ASK ENJOINING OF RATES.

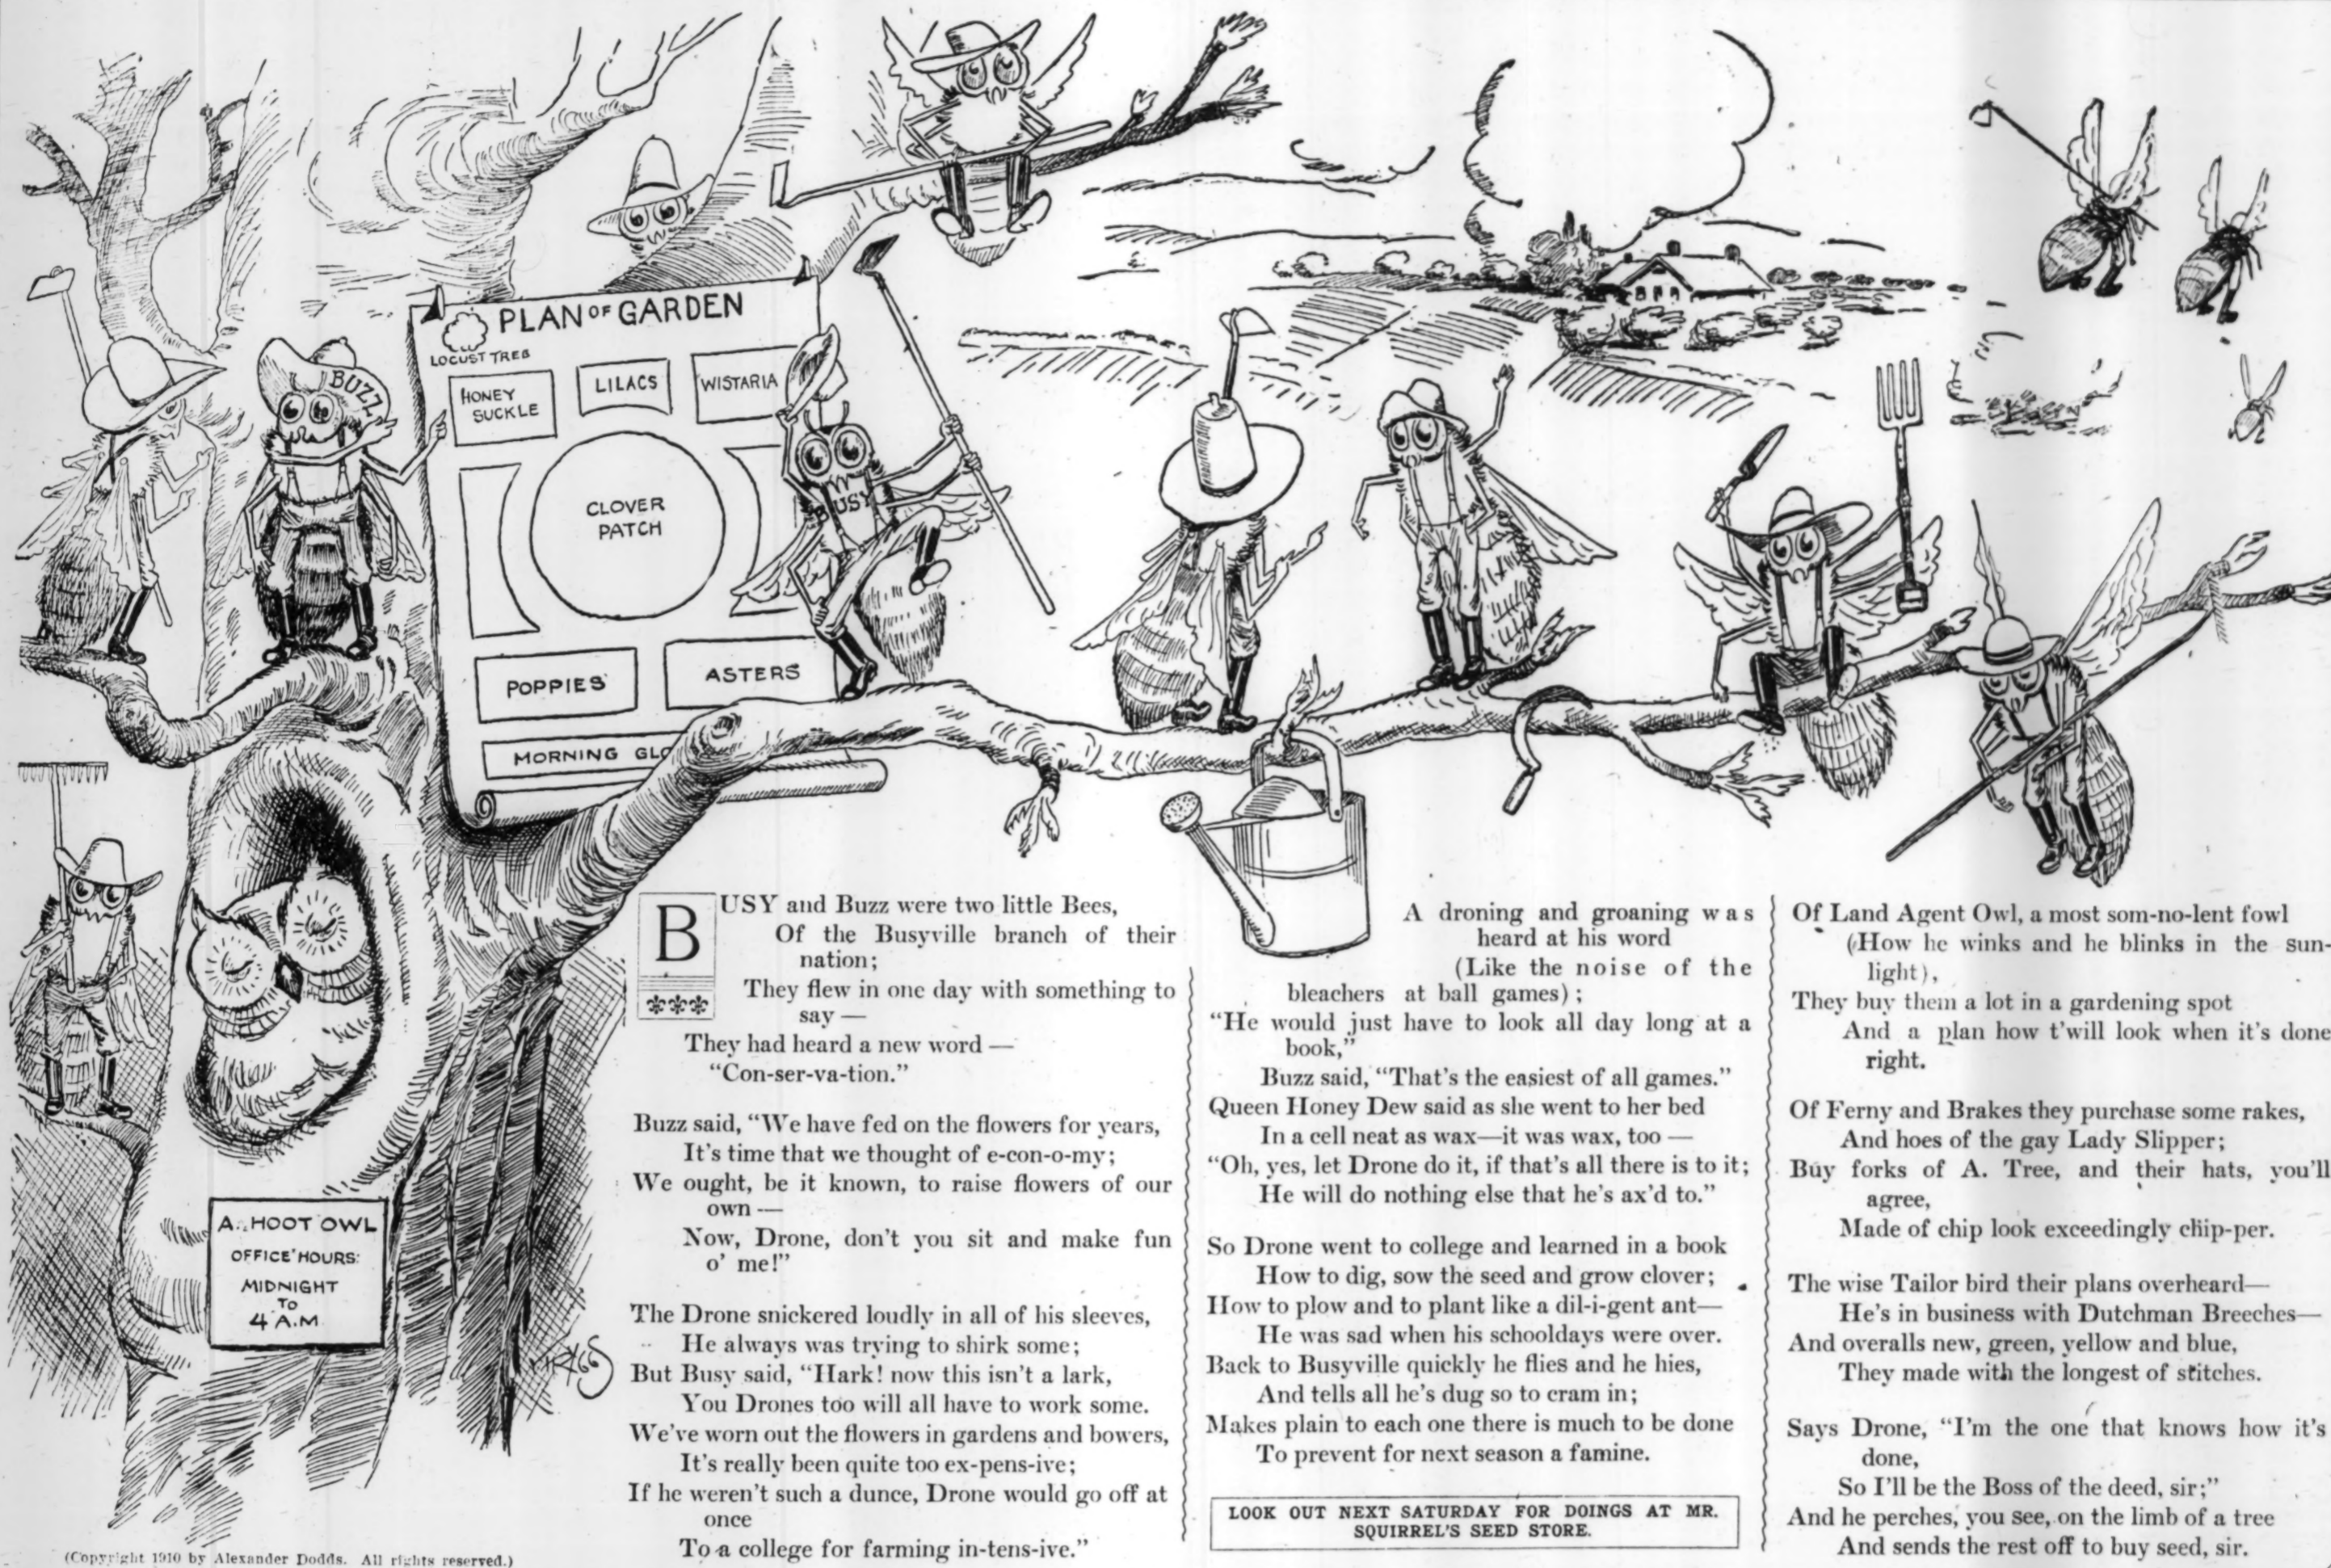

CHICAGO.—A delegation of shippers from the Central West will appear before Attorney-General Wickersham in Washington next Tuesday urging the government to ask the federal courts to enjoin the railroads from putting a rate increase into effect June 1, on the ground that it was agreed to illegally.

THE CHILDREN'S PAGE

THE BUSYVILLE BEES

Drawings by FLOYD TRIGGS
Rhymes by . . . M. L. BAUM

BUSY and Buzz were two little Bees,
Of the Busyville branch of their nation;
They flew in one day with something to say —
They had heard a new word —
"Con-ser-va-tion."

Buzz said, "We have fed on the flowers for years,
It's time that we thought of e-con-o-my;
We ought, be it known, to raise flowers of our own —
Now, Drone, don't you sit and make fun o' me!"

The Drone snickered loudly in all of his sleeves,
He always was trying to shirk some;
But Busy said, "Hark! now this isn't a lark,
You Drones too will all have to work some.
We've worn out the flowers in gardens and bowers,
It's really been quite too ex-pens-ive;
If he weren't such a dunce, Drone would go off at once
To a college for farming in-tens-ive."

A droning and groaning was heard at his word
(Like the noise of the bleachers at ball games);
"He would just have to look all day long at a book,"

Buzz said, "That's the easiest of all games."
Queen Honey Dew said as she went to her bed
In a cell neat as wax—it was wax, too —
"Oh, yes, let Drone do it, if that's all there is to it;
He will do nothing else that he's ax'd to."

So Drone went to college and learned in a book
How to dig, sow the seed and grow clover;
How to plow and to plant like a dil-i-gent ant—
He was sad when his schooldays were over.
Back to Busyville quickly he flies and he hies,
And tells all he's dug so to cram in;
Makes plain to each one there is much to be done
To prevent for next season a famine.

LOOK OUT NEXT SATURDAY FOR DOINGS AT MR. SQUIRREL'S SEED STORE.

Of Land Agent Owl, a most som-no-lent fowl
(How he winks and he blinks in the sun-light),
They buy them a lot in a gardening spot
And a plan how t'will look when it's done right.

Of Ferny and Brakes they purchase some rakes,
And hoes of the gay Lady Slipper;
Buy forks of A. Tree, and their hats, you'll agree,
Made of chip look exceedingly chip-per.

The wise Tailor bird their plans overheard—
He's in business with Dutchman Breeches—
And overalls new, green, yellow and blue,
They made with the longest of stitches.

Says Drone, "I'm the one that knows how it's done,
So I'll be the Boss of the deed, sir;"
And he perches, you see, on the limb of a tree
And sends the rest off to buy seed, sir.

Children's Camera Contest

LITTLE David Edward Marrs is seen in today's camera picture "Feeding Grandma's Chickens." With the photograph, Miss P. E. Lillierap sends this sketch:

THE LITTLE PRINCE.

Out in the sunset land, facing the Blue Pacific, there is a hill, named long since the Golden Hill. During the long summer days, the dried grass and sage and yellow sands of the hill shine and shimmer like gold in the sunlight. In winter, the deep golden poppies cover the hill with a satiny robe like the evening sky at sunset.

But when white men came here first, they said: "Why do the Indians call this Golden Hill? They must have dug their gold from it."

So they took spades and picks and

dug and dug into the sides of the hill, but they found no gold, and were unable to perceive its beauty.

By and by, the grandmother and grandfather of little Prince Heart-of-Gold saw the hill, and they said: "What a fine place the Golden Hill will be for our home and for our little prince to visit us! How pretty his golden hair will look among the poppies! We shall have hens for him to feed, as little Heart-of-Gold loves living things and is kind to them."

So they went to live on Golden Hill, and built for themselves a quaint little home, and houses for the chickens. After all, they found gold—gold in the eggs the little prince's hens laid, but far

more precious gold in the little prince himself.

Honorable mention—Greeley Price, Muncie, Ind.; Mary Dabney, Hood River, Ore.; Irene M. Price, Richmond, Ind.; Winifred L. Adams, Newton, Mass.

In The Monitor's camera contest, \$1 will be paid for the best photograph received each week. The subjects may be historic places, quaint houses, parks, picturesque landscapes, marine views, river views, old bridges, school gardens, playgrounds, or children at play. With the photograph should be sent a title and the location of the view.

If a suitable descriptive story of not over 200 words comes with the picture and is used it will be paid for. Write name and address plainly and enclose stamps if return of the picture is desired. Send to "Children's Page," The Christian Science Monitor, Falmouth and St. Paul streets, Boston, Mass.

POPCORN BALLS.

Two cups molasses, one cup brown sugar, tablespoon vinegar, piece of butter size of an egg. Make candy in a large kettle; pop the corn, salt it, sift through fingers so that unpopped corn can slip through. Four quarts popped corn may be required. Stir all the corn in the kettle. Then heap it on buttered platters or make into balls.

EIGHTEEN CARATS, NOT CENTS.

Jeweler (to new boy)—Did you sell anything while I was out, Johnny?

New boy—Yes, sir. I sold six plain gold rings.

Jeweler (very much pleased)—Good, my boy. We'll make a first-class jeweler of you one of these days. You got the regular price, of course?

New boy—Oh, yes, sir. The price was marked on the inside 18c, and the gentleman took all there was left, sir.

MONITOR BOOK OF GAMES

GOING TO JERUSALEM.

GOING to Jerusalem is a game in which the players sit at first in two rows of chairs, placed closely back to back, in the middle of the room. A march is played on a pianoforte, or some one not in the game may sing or whistle. As soon as the music begins all rise and march in line around the chairs. While they are marching some one who is not playing takes away one chair from the end of the line. The music stops suddenly and all who can do so sit down.

Of course one player is left standing, as one chair has been taken away, and that player is out of the game. The music begins again, and the game goes on, a new chair being taken away each time, until

only one player is left. He is said to "get to Jerusalem."

Rules of the game:

1. No one must touch a chair while marching, on penalty of being put out of the game.
2. If two players sit on the same chair at once, the umpire shall decide which has the right to it, and in case of doubt may order the players to march again.
3. The person who removes the chair shall act as umpire.

FORFEIT.

Place your hands behind you and guess who touches them. You are not to be released until you guess right.

TRIP AROUND THE WORLD
Westward from Boston—X

WELL, boys and girls of The Monitor, here we are still in Japan. Let me tell you something about the Japanese holidays. The Japanese New Year comes on the 9th of February, when the houses are decorated and great feasts are enjoyed. The Festival of Dolls is observed on the 3d of March. It is a day specially intended for the girls, who then take out all the dolls that belonged to their mothers and grandmothers and play with them. The boys have their great day on the 5th of May, when the Feast of Banners is celebrated. There is a procession through the streets of boy soldiers, carrying flags and banners and flourishing toy swords. Every Japanese boy has a banner bestowed upon him at his birth. These banners are shaped in the form of animals and fishes.

The Feast of the Lanterns and the Feast of Chrysanthemums are celebrated in the fall. The chrysanthemum is Japan's national flower, and she raises many beautiful varieties.

Entering a Japanese school, we find the teacher sitting cross-legged on the floor, with a small low desk in front of him. The children all sit on the floor in the same manner, forming a half circle in front of the teacher. Every child is studying aloud, but there is no unpleasant sound, for all Japanese children speak very softly. They stand up with their backs to the teacher to recite, and begin to read at the lower right-hand corner and read from the bottom to the top. They have about twice as many letters in their alphabet as we have in ours and besides these there are many queer characters that stand for whole words and sentences. They write with little brushes, which they dip into the ink. The Japanese language is one of

BOYS' "WIRELESS" SOCIETY.

Twenty ambitious Kansas City boys, says the Star, have organized the Kansas City chapter of the Collins Wireless Society, named in honor of the inventor, A. Frederick Collins. All the boys have been devoting their leisure time to the study of wireless telegraphy and most of them have well equipped wireless stations. Bernadotte Anderson is president of the society, which purposes to equip a central station to enable its members to study wireless telegraphy and to communicate with other cities by that means.

IN A JAPANESE GARDEN.

The Japanese are experts in landscape gardening and get wonderful effects on an estate of small extent.

"FEEDING GRANDMA'S CHICKENS."

Photograph taken near San Diego, Cal. Award to P. E. Lillierap, Boston.

The Monitor prints one or two games each Saturday. Cut out and paste in blank book and soon you will have a good collection.

Dramatic and Musical News and Reviews

PLAYHOUSE NEWS

BOSTON THEATERS NEXT WEEK.

For the final event of the theatrical season in Boston we are to have an entirely new play called "The Prosecutor," Monday evening, at the Hollis street theater. The Colonial will close Monday evening with the two holiday performances of "Where the Trail Divides." Next week "Charley's Aunt" will be put on at the Castle Square and "Camille" will be played at the Majestic. "The Man From Home" at the Park and "The Goddess of Liberty" at the Shubert continue their indefinite runs.

Hollis—"The Prosecutor."

"The Prosecutor," a four-act drama of modern city life by Franklin Searight, dramatized from William Hamilton Osborne's popular novel, "The Red Mouse," will be the attraction during the supplementary season at the Hollis Street theater, beginning Monday night. In "The Prosecutor" will be found, it is promised, "a love interest that is absorbing, scenes of comedy that are diverting, and all in the midst of a maelstrom of civic and personal activity that almost engulfs the characters in its depths. The police and the criminal (and this includes the man higher up), the reformer and the practical politician wage a warfare that provides many thrilling climaxes."

The play is distinctly modern and of the realistic school. Some of the characters are said to be modeled after prominent men in public life. The story of the play, which differs materially from the novel in many places, has not been made public, but judging from the locale and the general theme, the play ought to be intensely interesting. "There is no preaching in the play, but many of the vivid scenes will cause people to think." The cast, which has been selected to present "The Prosecutor," is notable for the capable and efficient players that it contains. Orrin Johnson and Emmet Corrigan, who head the list, have long records as stars and as featured players in many of the most successful productions of the last decade. Among the other players are: Katherine Emmet, Harriet Worthington, Millicent Evans, Rapley Holmes, William Owen, Charles Lane, Henry Carlin, Edmond Soraghan, Charles E. Verner and John Shepping. The stage direction has been in the hands of Lawrence Marston, who staged the recent revival of "Jim the Penman," "The Prince of India," "The Round-Up," and "Rebecca of Sunnybrook Farm."

"Charley's Aunt," which Mr. Craig is to produce at the Castle Square next week, is a play of wonderful runs. In London, in Australia, in America, and even in many European countries it has amused the public for week after week and month after month without cessation, and it would be impossible to count the millions of people who have laughed and grown merry over its humors. It is all a huge joke, a succession of eccentric situations, and the gambols of a young man in female garments add not a little to its fun-making propensities. Mr. Craig is putting it on at the Castle Square because he knows how much it pleases the public, and because he is sure it will be doubly welcome after an absence of several seasons. It is around the part of Lord Fancourt Babberly that the plot of "Charley's Aunt" revolves, and who is better fitted than Donald Meek for that role? In it he will repeat the success he made as Aunt Abby in "The County Fair" a few weeks ago. Mary Young will play the heroine, and the cast will include, as usual, the John Craig Stock Company.

June 6—"THE MIKADO"

Mme. Tetrazzini Will Sing
Only in Chicago Next Year,
Says Arthur Hammerstein

MME. TETRAZZINI.

Operatic star agrees to sing for the Metropolitan company in West, says London cable.

LONDON—Arrangements were concluded Friday night under which Mme. Tetrazzini, Oscar Hammerstein's erstwhile operatic star, will appear in opera in America next season. This result is brought about by Arthur Hammerstein, who, arriving on the Provence Thursday, came straight to London in response to a telegram from Director Dippel, and saw the prima donna last night.

"I have induced Mme. Tetrazzini to sing only in Chicago for the Metropolitan," said Mr. Hammerstein. "I have also arranged with Sammarco to sing there."

Andreas Dippel, who sails on the Lusitania today, refused to discuss operatic matters, saying that a full statement would be given out on his arrival. Mr. Hammerstein and Mr. Selisburg left for Paris Friday night. They will meet Oscar Hammerstein and Gatti-Casazza at a conference today.

MANKATO UNDER COMMISSION.
MANKATO, Minn.—A. G. Meyer, the incumbent, was elected mayor over Charles T. Taylor by a majority of 200 in the first election here under the commission form of government. He was the candidate of the business men, as were the four councilmen named. The new officers were sworn in on Thursday.

THE TWIN OPERAS

"Cavalleria Rusticana" and "I Pagliacci."

SURELY never was more distressful news crowded into a single evening than the audiences for "Cavalleria" and "Pagliacci" are let in for. Here are two brief and rapid pictures (nowadays may be time the speed of a picture, but it is remembered) of the extreme opposite of "high life," the canvases crowded full of tragedy almost without alleviation. "Pagliacci" perhaps ranks a greater favorite with the musical folk, partly because it has relief and the music up to a certain point is brilliant. But the Sicilian story piles the agony so high that the momentary gaiety of Lola's song has properly enough to be heard out of sight of the audience, obscured by the anguishes of Santuzza. The wonder is that Mascagni spared us the horrors of the climax itself and sends the two men off the stage for their final fatal bout. But this is done plainly to increase the impression; no most desperate situation was ever yet so bad as imagination paints it. Squarely faced any horror anywhere takes on a certain grimy grotesque if not actually comic quality. We know it is too ridiculously awful to be true.

The Aborn Opera Company is singing "Cavalleria Rusticana" and "Pagliacci" this week at the opera house (how glib now the phrase "the opera house" slips from the Bostonian tongue, but it cannot be said that they are singing in English. Some of the singers very frankly stick to their native Italian text and certain of the Saxons wander from one language to the other as they chance to be addressing an Italian actor or an American. This serves somewhat to obscure the plot, not a bad thing, everything considered. From their brevity one might refer to the two little dramas as curtain raisers—especially as certain of the important musical moments in each occur off the stage and have the actual effect of raising the curtain, and one may say the hair of the hearers.

Mascagni's personal story was well known enough in the nineties, when his little masterpiece first was flashed upon a gaping world, gaping in two senses, it was said. Critics saw the world was yawning its weariness over the heavy earnestness of Wagner or his imitators and forgot to close its mouth when the hurried climax of "Rustic Chivalry" was offered them—for the work seems indeed all climax. Here was the real secret of the success of the strolling musician and piano teacher: he offered his close packed, highly colored little canvas at a time when the people were tired of the

"ROBIN HOOD."

On Monday, May 30, the Aborn regime at the Boston Opera House will take up comic opera. Opening with a special Decoration day matinee Monday, the Aborn Comic Opera Company will begin its summer run with Reginald de Koven's and Harry B. Smith's famous comic opera, "Robin Hood." The cast includes a number who appeared in the same roles with the famous former operatic organization, the Bostonians, in this piece. Miss Estelle Wentworth as Maid Marian, Miss Louise Le Baron as Alan-a-Dale, George B. Frothingham as Friar Tuck, Josephine Bartlett as Dame Durden and Sabery D'Orseli. Other well-known and favorite artists in the cast will be George L. Tallman as Robin, Phil Branson as the sheriff of Nottingham, Forrest Huff as Littlejohn, Harry Hermanson as Guy of Gisbourne, and Francis J. Boyle as Will Scarlet. "Robin Hood," with its quaint and familiar characters, humorous libretto and tuneful score, including such numbers of real musical worth as "O Promise Me," "The Jet Black Crow," "The Tinker's Song," "The Armorer," Robin's serenade, Marian's forest song, and many others, is a happy selection for the inaugural week of comic opera. For the second week, Gilbert and Sullivan's "The Mikado."

CONSERVATORY NOTES.

The concert by advanced students of Josef Adamowski's ensemble classes took place Friday evening and proved one of the most attractive of the concerts of this season at the New England Conservatory of Music. It was essentially a chamber concert, held in Recital hall. The soloists were: Pianoforte, Misses Barbara Bates and Marion L. Tufts, Messrs. Sam Charles, Julius C. Chaloff and Herbert Seiler; viola, Misses Carrie L. Aiton and Annie L. Haigh; violin, Misses Carrie L. Aiton, Josephine T. Durrell, Annie L. Haigh and Ellen S. Stites; Robert Berne; violoncello, Misses Helen J. Moorhouse, Mildred Ridley and Virginia Stickney.

The annual tennis tournament on the courts behind the Conservatory dormitories began Friday.

The sale of Neume, the year book of the senior class at the Conservatory, is unusually brisk. The jokes, grinds and cartoons are regarded as about the best that have appeared in any recent Neume.

A recital by pianoforte pupils of Miss Helen Douglas and Miss Mary C. Bowers will be given in the New church parlors, Highland avenue, Newtonville, Saturday afternoon, June 4, John Hermann Loud assisting. The pupils' program will include works by classic and modern composers, as well as exercises in sight reading. Mr. Loud will play selections from Weber, Chopin, Godard and an original composition.

STRAUSS AS CONDUCTOR.

The appearance of Richard Strauss as conductor is thus described by the reviewer for the London Musical Standard:

"It is doubtful if there be any other living conductor who proves himself so great a master in the handling of tempo rubato. It is derived from real musical insight, and thus never has the effect of being arbitrary. The holdings back are often almost minute. Still they are positively existent. What takes place at a Strauss rehearsal we cannot say, as we have never been fortunate enough to be present at one. But it must be clearly understood that the splendors of Strauss' conducting—and the connected effect produced—are very far, indeed, from being imagined on our part. The master appears to have a magic wand, and the men fall in with its rhythmic indications with a readiness that seemed almost marvelous."

"Strauss' conducting of his master work 'Eurydice' has not been overpraised at all. He must deeply love the music; evidently it is not a case of mere pose. The performance was not in the least exaggerated; it was simply we had a great composer conducting in a great manner music that appeals to him. The whole concert was a great lesson in conducting. We can only hope that some of our own conductors will ultimately show a similar control of the orchestra and a similar insight. It is doubtful, however, in regard to the latter quality, for there are not many Strauss about. The musical greatness of the man comes out in his conducting; there is no need for him to exaggerate, or insist on noisy playing! Enough has been said for the present."

A recital was given in Steinert Hall Friday evening by pianoforte pupils of Frank O'Brien, wherein the students showed commendable progress in mechanical skill and in the perception of chord and tone values.

The program: Saint-Saens, First Mazurka; Moszkowski, "Cradle Song," op. 38, No. 2; Chaminade, "Pas des Amphores," Frederick P. King, Widor, "Moreau de Bal"; Saint-Saens, Song Without Words, B minor; Godard, Second Mazurka, Miss Theodor E. Treiber, Grieg, "Auf den Bergen," op. 19, No. 1; Schumann, Romance, F-sharp major, op. 28; Chopin, Polonaise, op. 40, No. 1, Francis J. Cronin, Weber-Liszt, "Invitation to the Dance," Chaminade, "The Flatterer," Godard, "En Courant," Miss Esther M. Sharkey, Beethoven, Concerto, C minor, op. 37; Allegro Con Brio, Largo, Allegro, Miss Margaret A. Kent, Frank O'Brien assisting.

CONCERT OF AVIATION MUSIC.

PARIS.—A German orchestra is coming to Paris to give concerts that will be confined to music inspired by aviators and aviation—waltzes, polkas and marches.

EDUCATIONAL

MANOR SCHOOL

STAMFORD, CONN.

A boarding school for boys. Upper and Lower Schools comprise all grades from primary to college preparatory. Graduates now in all leading colleges. Work thorough, systematic and effective. Instructors college bred. Location overlooking Long Island Sound, unsurpassed. Buildings modern; hot and cold water in every bedroom. Bowling alley, shower baths, large gymnasium, athletic field, tennis courts. Manual Training Department. Atmosphere homelike and wholesome. Careful and sympathetic attention given to the needs of each individual boy along the lines of moral development.

For information and booklet, address

THE ALLEN SCHOOL

A school where boys are taught to be self-reliant. Individual instruction. Thorough preparation for college or business. For catalog, address Mrs. K. West Norton, Mass.

the tenor's best song sung off the stage, a trick to use the church as a contrast to the passionate scene before it; a trick to give the Sicilian song of Lola over and over again in different ways, a trick to add Wagnerian orchestration to tunes that may be whistled. Of the work Grove says, "The vulgarity of the music was condoned for the moment for the sake of the admirably constructed libretto. The public welcomed the crisp action and direct emotional appeal of the work."

After the tremendous ovation the work received in Rome, all Italy acclaimed her new composer. The King gave him the Order of the Crown of Italy, an honor not conferred on Verdi till middle life, medals were struck in honor of Mascagni, and he was welcomed back to his native Leghorn with torchlight processions. All this for a youngster of 26. "L'Amico Fritz," his next work, showed more refinement and was better written, but it had only a success of esteem. "I Rantzau," given at Florence, was even less successful—the libretto was dull. "Iris," a disagreeable Japanese story, was the best work after the "Cavalleria," and has much skill in handling the libretto, though it is full of glaring plagiarisms from Wagner, says Grove. His next work was produced in seven cities simultaneously—a bit of daring reclamation.

Boston had "Cavalleria" in 1891 with Emma Juch a very good Santuzza; though one fancies her realization of the sad and sordid story and of the wretched heroine must have been far enough from Calvé's intense realism in the part. In 1892 we had Emma Eames in this character—a thing not to be fancied at all; and in 1893 Nordica sang the role, after a concert program in which Seals and Campanini appeared with her. Chicago heard the work and said: "There is beautiful and striking melody, and the harmony is original and strong." In Philadelphia, the staid, every number was encored and the prayer twice. Queen Victoria commanded a performance at Windsor in the Waterloo room to celebrate some royal visitations from afar.

Meantime another young Italian had been striving for success more strenuously than Mascagni seems ever to have done. He was a Neapolitan, about 30 years old. Viewing Mascagni's success, he resolved on one more desperate effort. Instead of working out a long, laborious task, he would give the public a second scene to allow for the passage of time, the work having originally required two acts. One critic has said that the score of "Pagliacci" is a trick to have

cess Mendes of Paris set about to sue the Italian for stealing a story of his for the plot, but Leoncavallo was able to convince him that he had never heard of the French work, but had seen the story in real life. It had come before his father as justice at Cosenza.

One critic remarks here that there is a Grecian tendency in this miniature tragedy, in that Canio acts more as embodied fate than as the outraged husband. "Nedda" is a pretty little piece of frivolity, the Columbine of the party of strolling players, of which Canio, her husband, is head. She flirts with Silvio, a man of the place where they are now playing, and Tonio, the clown, a former lover of hers, betrays them to the husband. Her story is acted in a play among them all, and she plays the part to the bitter close, falling under the husband's dagger. Nedda's utter inconsequence, the gaiety and lightness of her music, the growing sense of fear that darkens across her mood—all this gives this character decisive quality which lifts it quite out of the ordinary line of operatic roles. One recalls in especial the performance of Sigrid Aronson, so long a favorite at the Opera Comique in Paris. Her Nedda was sensitively played indeed. In this work again is the "trick" of the long scene before the curtain. There is more variety in the score if less intensity than in "Cavalleria Rusticana." The instrumentation especially is superb, and of course the music of the prologue has a quality that is popular in an excellent sense.

Leoncavallo's more ambitious operas lack the finish and effectiveness of this work and his "Zaza," another smaller opera, his "La Bohème" was fairly successful, though its often charming music suffered by comparison with Puccini's rendering of a like story. His "Rakoczi" meant to be his most ambitious work, and "The Medici" are not successful.

Today's Navy Orders

The following navy orders were posted today at the Charlestown navy yard: Midshipman E. G. Lange to the battleship Nebraska, Pay Director J. S. Carpenter from navy department and wait for orders. Paymaster W. T. Wallace to the retired list, Paymaster G. P. Dyer to the armored cruiser Colorado, Paymaster W. T. Gray from the armored cruiser Colorado and wait orders, Paymaster D. V. Chadwick to bureau of supplies and accounts, navy department.

MONIC ORCHESTRA.

News of Art, Artists, Pictures and Galleries

IMPORTANT papers were read on topics of interest and progress pertaining to the fine arts and civic improvements at the three days' convention of the American Federation of Art which was held in Washington last week. Among the delegates present were: Edwin H. Blashfield, representing the National Academy of Design; Paul W. Bartlett, representing the National Sculpture Society; William Laurel Harris, secretary of the National Society of Mural Painters; Charles F. Jackson, representing the Eastern Art and Manual Training Teachers Association; William Sloane Coffin, president of the Art in Trades Club, New York; Marvin F. Scaife of the Carnegie Technical Schools of Pittsburgh; and F. Allen Whiting of Boston, secretary of the National League of Handicraft Societies; Arthur Fairbanks, director of the Museum of Fine Arts, Boston; Edward Robinson, assistant director of the Metropolitan Museum of Art, New York; Arnold W. Brunner, president of the New York chapter of the American Institute of Architects; James William Pattison, secretary of the Municipal Art League of Chicago, and others.

The following directors were elected for the ensuing year: C. D. Seymour of Hartford, Conn.; C. Grant La Farge, architect, New York; Herbert Adams, sculptor, New York; Elmer E. Gurnsey, painter, New York; David Knickerbocker Boyd, architect, Philadelphia; Florence N. Levy, art writer, New York; Glenn Brown, architect, Washington; Hennen Jennings, Washington, D. C.; Henry Kirke Porter, Pittsburg; A. J. Parsons, chief of the division of prints, Library of Congress; C. W. Ames, president of the St. Paul (Minn.) Institute of Arts and Letters; Theodore N. Marburg, president of the Municipal Art Society of Baltimore; Halsey C. Ives, director of the St. Louis City Museum; C. D. Norton, assistant secretary of the treasury; Thomas Nelson Page, writer, Washington, D. C.; N. H. Carpenter, secretary, Schools of the Art Institute of Chicago; Lloyd Warren, architect, New York; Dr. James P. Haney, director of art in the high schools of New York, and J. Horace McFarland, president of the American Civic Association.

At the store of C. E. Cobb & Co., 346 Boylston street, Boston, are to be seen some colored casts that are very similar in character to those made so cleverly in Florence, Italy. These are hand painted in this country, various subjects being treated in a most attractive way. The

cost of importation has heretofore been a hindrance to this art being sold to any great extent in America. It enhances the initial value of a cast many times and as treated by the Florentines and now in this country, is likely to find its way into the hands of art lovers.

The excellent portrait of Mrs. Julia Ward Howe, painted by her son-in-law, John Elliot, is attracting much favorable attention at the Art Museum where it has been on public view for the past few days. The figure is seated, the likeness and coloring are alike strong and virile and reflect with fidelity the characteristics of this remarkable woman.

The picture occupies a conspicuous position in the upper main corridor of the Museum.

THE ROYAL ACADEMY.

LONDON—On the title page of the catalogue of the Royal Academy is to be found a fine quotation from Jean Francois Millet, which sets a standard for art, true and undeniable. "Le fond de tout est toujours ceci: qu'il faut qu'un homme soit touché d'abord pour pouvoir toucher les autres."

Obviously the necessity is not that every picture should make an appeal for sympathy to the emotions, but that its purpose should be so definite, its aim so certain, its ideal so true as to strike no uncertain note in composition or color, to tell its story in no doubtful tones, to have no confusion of thought, and so to create none in the mind of the beholder.

"Qu'il faut qu'un homme soit touché d'abord pour pouvoir toucher les autres," so it may rest with the painter to present definitely his idea, but to this idea the spectator must bring an intelligent alert appreciation for good work, which is not satisfied with what a picture gives at the first glance, but is content to let it render an account of its intentions and unfold its aims, if it has them, by degrees. The test of many a picture lies in its capacity to do this, to give out in fact and grow upon the affections. Here where the pictures are massed together in lines four and five deep, the brilliant new gold frames touching one another, the eye is distracted from the regard of one by the color of its neighbor, and the mind obliged to wander from one line of thought to another, from poetry to bathos, from the noble to the banal, from landscape to portraits, it is not an easy task to be entirely just. This condition of things seems to do violence to

the judgment, and make a sane and lawful criticism almost an impossibility. Many modest works which might "toucher les autres" under calmer conditions pass unnoticed and remain undiscovered in the uproar of the academy.

The exhibition of 1910 is on the whole a distinguished one, notwithstanding the fact that the number of portraits is excessive. The quantity of gentlemen unknown to fame who have been painted in red coats or municipal red gowns may indicate that some artists are making a fairly good income by portrait painting, but it does not tend to naturally enrich the record of art for the year. However, some of the portraits are of a very high order. Notably William Orpen's two great works and G. A. Storey's "Portrait of the Painter's Mother." The reserve of genius is in Orpen's work, there is no haste about it, and no conceit, he paints with a master's hand, simply putting down facts with unerring insight into their value. "The Hon. Sir Eric Barrington" and "Sir Maurice Fitzgibbon" are both magnificent examples of the art of portraiture. No part of the canvas is left to take care of itself, no chance effects are relied upon to make up the whole, but a fine sense of balance guides the entire undertaking, so that the pattern of the floor and of the walls is not indicated, but put down just as it was. Mr. Orpen knows how to do it, he shirks nothing and fears nothing and trusts nothing to luck, and the result is an absolutely authoritative statement of high art. G. A. Storey's painting of his mother is another really beautiful work of art. "George Alexander" has been painted by Sir Luke Fildes, not very successfully, and "Edwin A. Abbey, R. A." by the late Sir W. Q. Orchardson, is a very living, forcible and refined portrait.

Napier Hemy, whose admission to the full honor of royal academicians has just been announced, comes forward this year as a marine painter of the first class. His mastery of the watery wastes of sea is well known, but his "Plymouth" is an exceptionally fine piece of work even for him. "The Vegetable Shop" in the first room, by Stanhope Forbes, another of the new academicians, is a charming note of color, and his group of fisher people in "The Pier Head" is without affectation, manfully and firmly clear, a fine, broad piece of work. The figures are in full sunlight, a group of idlers watching the boats go out. The only energetic thing about them is the artist's handling of the subject.

Algeron Talmage's "The Mackerel Shawl" is an interesting picture, attracting great interest in the thousands of casual visitors who pass through the rooms hourly while the academy is open, people who, paying no attention to the many instructive and intellectual exhibitions which are to be seen in London all through the year, yet crowd the academy to overflowing for three months in the summer. Their opinion of art is freely expressed and is often quaintly wide of the mark. This does not detract from the merits of "The Mackerel Shawl" which is really a good specimen of Mr. Talmage's work and a clever picture. It includes a looking-glass, an adjunct to so many paintings of this year that we might well be said to live in the mirror age. William Orpen's picture of Sir Eric Barrington has a round mirror in which, incidentally, the painter himself is to be seen at work.

J. J. Shannon's portrait of "The Duchess of Buccleuch," although a little tight in the handling, is a dignified and acceptable painting. A remark overheard, made by one who appeared to be acquainted with the subject of the picture, seemed fairly justified: "It is like her but has no charm, and she has so much charm." He sends as his diploma work an attractive portrait of his daughter, and in the first gallery has an agreeable painting of "Miss Sylvia Myers." Sir Luke Fildes, Sir Hubert von Herkomer and Walter W. Oulless are all represented by portraits of interest, and Maurice Greiffenhagen by a remarkable piece of characterization in his painting of "Maurice Hewlett, Esq." "June at the Farm," by Elizabeth Forbes, is among the pictures that one is grateful for, so also is Lucy Kemp-Welch's "Young April," a strong, free painting of a great white horse, a little black colt and the half length figure of a girl in a blue dress. Mrs. Stanhope Forbes' picture is delightful in broad effects of sunshine and shade. Mrs. Laura Knight has made a great success this year and is now fully recognized as an artist of great promise. Oil paint as a medium suits her better than water color. "Flying a Kite" and "Boys" are both amazingly fine pieces of work. Out in the open air, untrammelled, unconventional, original, they are big things, most agreeable to remember.

Even in writing the history of the first three rooms of the Academy some very good things have to be recorded. John S. Sargent has taken a holiday

from portrait painting, and is apparently reveling in a new field of work. Always a fine colorist he finds in these fresh subjects a latitude and scope for the expression and expansion of his power in this direction. "Glacier Streams" is glittering with light and life. The first effect of looking at this picture is fairly a surprising one. It takes possession of the wall on which it hangs, and seems to catch and carry all the light. A stream of gleaming silver descends from rocks above, which rise jagged and forbidding against a glimmering sky. The picture is wonderful, almost repellent in its forcible truth and insistence on the harsh quality of light from the shining surfaces, and in the warm fierce color of the rocks, as doubtless they appear in the clear rare atmosphere of the higher altitudes. Mr. Sargent has accepted the "natural and large sublime" that Ruskin speaks of and has painted the "everlastingly terrible" which nature in her solitude presents. Another picture of his, "Albanian Olive Gatherers," is scarcely less marvelous in effects of light and shade, but here the light falls on delicious greens and blues, and on the figures of the olive pickers, and presents a scene of warmth and activity. A really masterly piece of work. "Frank Bramley's 'And Mocks My Loss of Liberty'" is worthy of attention, if only for the gay little figure of a sprite who sits on a stone in the sun. A painting of a great chalk cliff and the eddy and swirl of the tide catching the reflection of light and color as it ripples out to sea again, called "Golden Bay, Lulworth," is an example of David Murray at his very best. "Cutting Furze Bivins," by H. H. La Thangue, is a particularly vigorous example of this fine artist. "Holiday in Essex," a remarkable and epoch making picture of George W. Lambert, is sufficiently possessed of fine technical qualities to satisfy the most exacting critics in any age. Mr. Stott's "Good Samaritan" is another picture which delights, filled as it is with a true pathos, quite Rembrandtesque in sentiment and handling. "A Wood Nymph," by George Clausen, a rugged bit of strong fresh work, and "Larmorna," by S. J. Larmorna Birch, are pictures that should not be missed.

Sir Alma Tadema's delicate miniature painting is to be found in its accustomed place in the large gallery. This year his picture is called "Voices of Spring" and is an exquisite example of his highly finished work.

SPRING NEEDLE KNIT

"GAUZRIB" is just out. The finest, sheerest and daintiest underwear fabric ever made. Every woman who sees it is delighted. "GAUZRIB" is made into garments for women only. It is the most original and stylish underwear to be found anywhere at any price. Delightfully elastic and glove-fitting—dainty and durable. Launderers perfectly.

"GAUZRIB" garments are finished with three and one-half inches of genuine hand-crocheted lace. We guarantee fabric, finish and workmanship. As it is not yet for sale at dealers, send \$2.00 for a sample vest, and after receiving it, you will want several more. If not satisfactory money will be refunded. Illustrated booklet and sample of fabric sent on request, but you will save time by ordering one or two at once and enjoy them.

Cooper Manufacturing Co.
BENNINGTON, VERMONT.

In Shops of Those Who Advertise With Us

The plan now adopted by the Paine Furniture Company of offering summer cottage furniture "in the white," to be finished later in any color selected, is sure to afford satisfaction and pleasure to their customers. This allows every one a free hand in working out harmonious interiors and gives a particular interest to housefurnishing. At the present time the Paine Furniture Company is showing a great variety of simple, effective designs, reproductions of Colonial and Dutch models, which are not only pleasing but moderate in price.

Macaular Parker Company is now displaying a lot of finely tailored suits in smooth finished and rough faced blue serges, just the thing for warm weather. They are cut in the latest style and having been made in their own workshops the utmost care has been given to their finish. Prices range from \$20 to \$35.

Under the trade name of "Gauzrib," the Cooper Manufacturing Company, Bennington, Vt., have put on the market a new underwear for women. The fabric is fine and sheer forming a garment glove fitting yet elastic, dainty and durable. The manufacturers guarantee fabric, finish and workmanship. As Gauzrib is too new to have a large distribution, write for the illustrated booklet which will tell you how to obtain it.

Heads of families and others who are desirous of acquiring a permanent summer home should give careful consideration to the exceptional inducements offered by the Standard Construction Company of 511-512 Tremont Temple, Boston. Their proposition particularly appeals to persons of refinement who have not means, or do not wish to invest large sums in summer homes, and yet would find a place of their own in a locality where they could have all the advantages of bathing, boating, fishing, etc., amid congenial surroundings. All interested should at once communicate with the Standard Construction Company and obtain full particulars.

If you purpose re-staining and varnishing the floors of your house this spring or summer use Campbell's Varnish Stain prepared by Carpenter Morton Company, 77-79 Sudbury street, Boston. It is easily applied and produces beautiful imitations of natural wood finished in varnish, such as cherry, walnut, mahogany, light oak, dark oak, rosewood and green.

The Davis East India House, 373 Boylston street, Boston, have still a few left of their dainty pattern waists. All are beautifully embroidered, some on heavy linen, some on fine batiste. Each one is unique and in perfect taste.

The surprising announcement made by the "Continental," that they had purchased the suit stock of A. B. Kirshbaum & Company's Guaranteed Clothes, and would dispose of it at bargain prices, has drawn unusual attention to this great clothing store, and this has been intensified by the further notification that during this sale the management

would offer their overstock of Hart, Schaffner and Marx clothes at reduced prices. It is not often that a double bill of such extent and excellence is offered by a men's clothing establishment.

Many women who would otherwise take pleasure in making their own dresses and shirtwaists are deterred from doing so by the difficulties they encounter in obtaining a good fit by the usual trying-on method with the aid of a looking glass. To obviate this trouble, S. N. Ufford & Son, 144A Tremont street, Boston, have perfected an adjustable dress form which renders the work of dressmaking at once easy and satisfactory. Their "Empress" dress form can be adjusted to 50 different shapes and sizes; may be lengthened or shortened at waistline, and raised or lowered to suit any desired skirt length.

"Ward's," 57 Franklin street, are selling a new writing paper called the Robin's Egg Blue at 15c per pound, and envelopes to match at 1/2c per package. At these prices this paper is a great bargain. Ward's "Arts and Crafts" writing paper, a recent novelty, is having a large sale.

With the advent of warm weather the straw hat has become the correct thing in the way of men's headwear. George L. Griffin & Sons, 404 Washington street, are, as usual, in the foreground with a large and varied stock of "Griffin's straws," suitable for men of all ages. In their store you can get split and semitailors, Mackinaw, Milan and split soft roll straws at from \$2 to \$5; beautiful genuine Panamas \$5 to \$25 and up to \$100 if desired.

The new and finely appointed costume and dress department at C. F. Hovey Company is splendidly adapted for showing their large stock of costumes, silk, lingerie and wash dresses. The specially priced silk dresses in striped taffetas, pongs, foulards and rajahs—new, fresh styles in assorted sizes—\$25 should command the particular attention of those in search of bargains. The special silk waist sale also offers an unusual opportunity of obtaining the finest garments in changeable silk. Fine striped taffetas and foulard at greatly reduced prices.

MILLIONAIRE PAYS UNDER PROTEST

NEW YORK—Highly indignant over what he termed the "outrageous" action of the customs officials, Henry C. Stuart, millionaire of Elk Garden, Va., Democratic nominee for Congress in the ninth Virginia district, today drew a check to the order of the collector. He indignantly notified that official that he was "paying under protest" duty of \$2500 on his wife's clothing, and declared that he would appeal. The Stuart's arrived on the Mauretania.

The collector's office later issued a statement that the affair was due to a misunderstanding of the law on the part of the Stuart's, and that the trucks would be released when the duty was paid.

Iowa Lawyer Nominated As New Assistant Attorney General by the President

WILLIAM S. KENYON.

Member of the bar, who is slated to have charge of the trust prosecutions.

WILLIAM S. KENYON of Ft. Dodge, Ia., who was recently nominated by President Taft as assistant attorney-general, vice Wade H. Ellis, is considered well fitted for the position and is regarded as a man of unusual capacity. He will have charge of the trust prosecutions in the department of justice of the government.

MR. HINDS LEADS IN MAINE CAUCUS

PORTLAND, Me.—Asher C. Hinds, parliamentarian of the national House of Representatives, won an apparent victory over Frederick Hale, son of Senator Hale, Friday evening, by securing the delegates from five of the nine wards in this city in the Republican caucus to elect delegates to the congressional convention.

The struggle between these candidates to succeed Congressman Allen, who declines another term, has been hotly contested, with powerful influences lined up on either side. Portland is entitled to 75 delegates, including three at large, expected to be for Mr. Hinds. The convention will be held June 30.

ITALIAN MINERS DEPORTED. DURHAM, Ga.—Twenty-five Italian miners, accused of intimidating the officials of the Durham Coal & Coke Company's mines here and arrested by state troops sent here by Governor Brown, were later forcibly deported without trial.

PANAMA CANAL IN ITS SIXTH YEAR PROGRESSED RAPIDLY

Authoritative Figures to Date From the Inception of the Work Show That Excellent Advance Made Augurs Well for Opening on Scheduled Time.

WASHINGTON—The sixth year of the stupendous work of building a canal across the Isthmus of Panama to connect the Atlantic and Pacific oceans ended on May 3 and in that time so much has been accomplished that the costly waterway may be opened to the commerce of the world in 1914. The official estimate places it a year later in order that there may be no miscalculation.

The progress of the work may be seen in the important features of the canal. These are the cut through Culebra, the locks at Gatun, Miraflores and Pedro Miguel, the building of the Gatun dam and the creation of Gatun lake.

The excavation record by years since May, 1904, is as follows:

May 1 to May 1.	Cubic yards.	Cu. Yds.
1904-1905.....	648,911	
1905-1906.....	2,964,935	1,298
1906-1907.....	7,365,433	12,294
1907-1908.....	24,197,267	29,378
1908-1909.....	38,038,898	30,270
1909-1910.....	32,672,505	42,832
Total.....	105,888,072	54,136

Of the total remaining, the amount to be taken out by dredges is 29,232,052 cubic yards, and the amount by steam shovels is 38,827,617 cubic yards.

Of the 18,051,278 cubic yards excavated in the central division 14,888,427 cubic yards were taken from Culebra cut. The record of excavation in the cut since May, 1904, follows:

May 1 to May 1.	Cubic yards.	Cu. Yds.
1904-1905.....	648,911	
1905-1906.....	1,250,570	
1906-1907.....	4,851,895	
1907-1908.....	11,285,217	
1908-1909.....	13,980,430	
1909-1910.....	14,886,427	
Total.....	46,913,450	

There yet remain to be excavated from Culebra cut 31,128,845 cubic yards, and the work is advancing at the rate of 1,240,000 cubic yards a month, that being the average monthly excavation since May 1, 1909. The work of dredging is practically confined to the Atlantic and Pacific entrances of the canal.

The construction of the dam across the Chagres river at Gatun was continued during the year in three sections—the dry and hydraulic fill of the eastern half of the dam; the lining of the spillway with concrete; and the dry fill of the western section. Two parallel ridges of rock and earth stretch across the valley, from hill to hill, and between these ridges the hydraulic fill is being made. In the east half of the dam the hydraulic fill is at 53 feet above sea level, which is within 62 feet of the final height. In the western section the hydraulic fill has just been begun. Of the total of approximately 10,000,000 cubic yards of this fill to be made, 3,000,000 cubic yards have so far been placed in the eastern section.

All the old channels of the river are closed by the dam and the water is flowing through the spillway. Low water in Gatun lake is at 10 feet above sea level, which is 10 feet higher than the original surface of the river at Gatun. The first concrete was laid in Gatun locks with the permanent handling and mixing plant on Aug. 24, 1909. During the first four months of its operation the plant underwent a number of changes brought about by the working conditions, and by Jan. 1, 1910, it had reached an efficiency not anticipated before July 1 of this year. An indication of the way in which the plant gradually found itself is given by the amount of concrete laid each month since the work was begun, the working day being from 8 to 12 hours:

The laying of concrete is advancing at the rate of 2500 cubic yards a day; and there yet remain to be placed about 1,850,000 cubic yards. The first concrete was laid in the docks at Pedro Miguel on Sept. 1, 1909, when a temporary mixing plant was put in operation. The installation of the permanent mixing and handling cranes has not yet been completed, only three of the six cranes being in operation. There remain to be placed at Pedro Miguel 807,000 cubic yards of concrete, and at Miraflores 1,505,000 cubic yards. At Miraflores the lock site is ready for the placing of concrete, and preparations are in progress for the installation of the cantilever crane mixing and handling plant.

In both the locks at Gatun and Pedro Miguel the iron work is being placed as the concrete laying advances, a large quantity of the castings are on the large ready to be set, bids have been asked on the gates, and plans for the operating machinery are nearing completion.

RADCLIFFE'S ENGLISH CLUB WILL PRESENT SHAKESPEARE PLAY

The English Club of Radcliffe College will present for its annual out-of-door play this year Shakespeare's "Love's Labor's Lost." It will be performed on the grounds of Bertram Hall, Cambridge, on Friday evening, June 3. There will also be a private performance on Wednesday evening, June 1, for which special invitations have been sent out.

The cast is well chosen and consists of girls well known in Radcliffe and Cambridge dramatics. It is as follows: Ferdinand.....Marjorie Smith Biron.....Marian Gragg Longaville.....Alma Gray Dumaine.....Inez McCaffrey Boyet.....Erica Thorpe Mercade.....Louise Dodge Don Amado.....Eleanor Danforth Sir Nathaniel.....Louise Burleigh Holofernes.....Carolyn Solis Dull.....Carolyn Bulley Costard.....Gladys Wells Moth.....Dorothy Streeter A forester.....Ruth Holden Princess of France.....Virginia Tanner Rosaline.....Anna Bourke Maria.....Marguerite Beck Katherine.....Ruth McIntyre Jaquenetta.....Pauline Sawyer The play is being coached by St. John Perret of Harvard.

MEXICO FORCING WATER PROJECT

WASHINGTON—Senor Don Francisco de la Barra, the Mexican ambassador, had a long conference with Secretary of State Knox Thursday on the equitable distribution of the waters of the Rio Grande for irrigation purposes.

By a convention signed May 21, 1906, the United States agreed to complete a dam near Engle, New Mexico, and as soon as the dam was completed the United States was to deliver to Mexico a total of 60,000 acre feet annually. It is now understood that the United States government is ready to see that the project is pushed to completion.

MUNICIPAL AUTO CATALOG.

NEW YORK—The aldermen of New York are going to inquire about the city's automobile squadron. A resolution was introduced at Tuesday's meeting for a committee of nine to report the purchases by the departments of automobiles and the purposes for which the machines are used.

WIRELESS VIA PIKE'S PEAK.

DENVER—According to information received here, a wireless telegraph station will be established soon on the top of Pike's Peak. It will be used as the midway transmitting and receiving point in an effort to send wireless messages from the Atlantic to the Pacific coast.

WOMAN BECOMES U. S. CITIZEN. PASSAIC, N. J.—Mrs. Maria Emma Lindenstruth, editor and publisher of the Passaic Wochenblatt, a German weekly, became a citizen of the United States on Thursday, being the first woman in New Jersey to take out citizenship papers.

ARTHUR L. SPRING WILL SPEAK. Assistant Corporation Counsel Arthur L. Spring has accepted an invitation to make the address at the closing exercises at St. Luke's school, Wayne, Pa., on the afternoon of Wednesday, June 8.

NEW YORK BOTANICAL GARDEN ABLOOM

Visitor now enjoying flowers that are at their best.

NEW YORK—Early summer visitors to the New York botanical garden in Bronx park find that many improvements have been made since last fall by the director, Dr. Nathaniel L. Britton. Early in the spring much outdoor work was started and now the gardens are looking their best.

New construction has been mainly at the northern part of the grounds and is still in progress there, including the completing of paths through the collection of willows and elsewhere in north meadows as well as approaches to the upper driveway bridge and at the same time the planting of strips along the main driveway and the filling and draining of marshes.

Work is also going forward on the completion of the main driveway east of the Bronx river, to connect with the Bronx boulevard at the southeastern corner of the grounds, this street being now under construction by the department of public works. This Bronx boulevard will bound the garden along its entire eastern side. Toward the northern part of the grounds a high retaining wall has been necessary and is now being

MUSEUM IN BRONX PARK.

This building contains the indoor collections and is visited by thousands of persons annually.

ing rapidly built. Most attractive views of north meadows will be had from this street, the height of the wall being in places about 20 feet.

An object of much attention just now is a large century plant coming into flower, which has been placed in the center of the conservatory court, near the elevated railway station. Visitors to the garden find much of interest in

the botanical museum entrance to which is free. Here are the collections of economic botany, showing vegetable products and the uses to which they are put. The collections include the famous Torrey herbarium, deposited by Columbia University and valued at \$175,000. In value and completeness the garden is a rival of the Kew gardens in London and the Jardin des Plantes of Paris.

American Dry Farming Methods to Be Introduced To Help Restore Palestine to Former Prosperity

Aaron Aaronsohn, Who Is to Direct Work, First Found the Prototype of Modern Wheat in Asia.

COMPANY IS FORMED

SPOKANE, Wash.—Dr. Aaron Aaronsohn, who recently left Washington, D. C., for Palestine, where he will assume charge of the Jewish agricultural experiment station at Haifa, announces that this station will cooperate with the dry farming congress in the assembling and dissemination of agricultural information of educational value and in encouraging the introduction of dry farming methods in Palestine. It is expected that a report on the preliminary work for the establishment of this station will be presented at the fifth dry farming congress in Spokane, the first week in October.

Dr. Aaronsohn, who is international vice-president and corresponding secretary of the dry farming congress for the division for Turkey, passed the greater part of the last year in the United States studying agricultural conditions and methods. He attended the fourth dry farming congress at Billings, Mont., last October, when he made the first public announcement of his discovery of the prototype of our modern wheats in the wild wheat of Palestine.

This discovery is regarded by experts as one of the most important of the century resulting from agricultural research. He explained his plans for a proposed experiment station in Palestine, and as a result of the strong endorsement given he was enabled to announce the formation of an American company pledged to the establishment and support of the proposed station.

The Jewish Agricultural Experiment Station was incorporated under the laws of the state of New York, with Julius Rosenwald, Chicago, president; Prof. Morris Loeb, New York, vice-president; Paul M. Warburg, New York, treasurer; Miss Henrietta Szold, New York, secretary; Dr. Cyrus Adler, Philadelphia; Samuel S. Fels, Philadelphia; Louis Marshall, New York, and Judge Julian W. Mack, Chicago, directors, and Dr. Aaronsohn, managing director. Jacob H. Schiff and J. Rosenwald contributed \$20,000 for initial equipment, and, together with Paul M. Warburg, I. N. Seligman, Isador Straus and others, guaranteed a minimum budget of \$10,000 for maintenance.

A site has been secured seven miles from Haifa, where a tract of 125 acres has been obtained. Station buildings will be erected at once. The equipment secured in America includes the latest instruments for soil investigations and meteorological observations and records will be made in the same manner as in the United States weather bureau, this being the first introduction of these methods in Asia Minor.

The station will be under the general management of a board of trustees, mostly residents of this country. Dr. Aaronsohn, the director, is a graduate of the agricultural school at Grignon, and has been conducting investigations, mainly under the patronage of the Turkish government, in Palestine and the surrounding region for a number of years.

Both research and practical illustration work are contemplated, the general object being the improvement of agriculture among the Jewish colonists and farmers of the region. A special line of investigation is to be the following up of Dr. Aaronsohn's discovery of wild prototypes of cereals.

Dr. Aaronsohn found the wild prototype of wheat on the slopes of Mt. Hebron and had discovered other wild grains in the dry regions of Palestine which lead him to believe that this region produces the original plants from which our modern cereals have been developed.

Agriculture has been carried on in Palestine since the earliest times of which history gives any record. The conditions are essentially suited for dry farming. Irrigation is practiced to a limited extent along the streams, but the topography of the country prohibits extensive irrigation projects. The soil is fertile and the climate peculiarly favorable to agricultural development.

DR. AARON AARONSOHN.
Expert agriculturist who will manage the dry farming experiment near Jerusalem.

A recent summary of the possibilities of the region and a forecast of its future are given in Dr. Henry Van Dyke's "Out of Doors in the Holy Land."

"It is indeed not impossible that wise methods of colonization, better agriculture and gardening, the development of fruit orchards and vineyards, and, above all, more rational government and equitable taxation, may one day give back to Palestine something of her old prosperity and population. If the Jews really want it, no doubt they can have it. Their rich men have the money and the influence and there are enough of their poorer folk scattered through Europe to make any land blossom like the rose, if they have the will and the patience for the slow toil of the husbandman and the vine dresser and the shepherd and the herdsmen."

"But the proud kingdom of David and Solomon will never be restored; not

Movement to Crown Holy Land With Industry, but Not Power, Aided by Jewish Men.

PLAN MEETS FAVOR

even the tributary kingdom of Herod. For the land will never again stand at the cross-roads, the four corners of the civilized world. The Suez canal to the south and the railways through Lebanon and Asia Minor to the north have settled that. They have left Palestine in a corner, off the main traveled roads. The best she can hope for is a restoration to quiet fruitfulness, to placid and humble industry, to olive-crowned and vine-girdled felicity, never again to power.

"And if that lovely reconsecration comes to her, it will not be on the stony heights around Jerusalem; it will be in the plain of Sharon, in the outgoings of Mt. Ephraim, in the green pastures of Gilead, in the lovely region of 'Galilee of the Gentiles.' It will not be by the sword of Gideon, nor by the scepter of Solomon, but by the sign of peace on earth and good will among men."

Such a "lowly reconsecration" is contemplated by Mr. Aaronsohn and the patriotic Jewish-Americans who are making possible the establishment of the Jewish agricultural experiment station. Mr. Aaronsohn has seen the results of dry farming in the western plains and former desert of America and has determined to apply the principles of our modern agriculture to the rehabilitation of the grain fields and vineyards of his mother country.

He believes that with the principles of dry farming and modern methods of cultivation applied to the fertile valleys and hillsides of Palestine these ruins of ancient cities, whose broken marble columns, "saturated with the sunshine of a thousand years," stand mute monuments of departed power and grandeur, may again be surrounded with fields of yellow grain soaked with the sunbeams of smiling summer whose harvests will be the foundation of an "olive-crowned and vine-girdled felicity," the symbol of a nation's permanent prosperity.

GOVERNMENT ISSUES NEW GUIDE BOOK FOR STUDENTS OF STARS

WASHINGTON—The boom in astronomy, brought about by the recent visit of Halley's comet, has caused the government, through the hydrographic office, to issue a book to aid the American skygazer in picking out and naming the constellations and stars.

The book, which on account of the demand for it is sold at 75 cents a copy, will "relieve navigators of the difficulty of recognizing stars" and "provide for a wider use of stellar observations in navigation." It is called the "Star Identification Table." It contains 364 pages, and is officially Publication No. 127 of the hydrographic office.

By means of this identification table, the government says, "the observer is made independent of any previous knowledge of the name of the star he observes," and is enabled at once to identify any star that is bright enough to observe at all."

NEW YORK—Observers in this city had a fine view of Halley's comet Friday night. It was the first clear night here since it appeared in the western sky. Its tail stretched in a fanlike shape half way over to Jupiter, or directly east. The tail seemed to be a few yards long to the onlooker. The nucleus looked like a hazy star and the tail like a pale whitish cloud.

Crowds gathered all over the city to watch it. The roofs of hundreds of houses gave evidence that it was a night of skygazing. Hundreds lined Riverside drive.

AWARDS ANNOUNCED IN EXHIBITION OF ART WHICH ENDS TODAY

The annual exhibition of the school of the Museum of Fine Arts closes at 4 o'clock today. The exhibition has been pronounced unusually successful, including a large number of works of merit in oils, crayons and casts. The following awards of prizes and mentions were announced today:

Ayer prizes, advanced painting class: Women's prize for portrait, Emily B. Waite, \$50; men's prize for portrait, William James, Jr., \$25; Howard E. Smith, \$25.

Sears prizes—Portrait, \$50, Marjorie Conant; mention, Helen Blum. Life drawing, \$50, Edna L. Marrett; mention, Suttuth Goff, Earl E. Sanborn, Fred A. Demmler. Cast drawing, \$50, Gladys M. Hinkley; mention, William Ohlsson.

Kimball prizes—Frederick W. Allen, \$50; Cecil A. Lucile, \$25; Helen Greenleaf, \$25, and Duell P. Clapp, \$25, and John F. Paramini, \$25; 3; mentioned for improvement, Gertrude E. Allen.

Awards previously announced during the exhibition of work in the beginners' class in portrait painting, under Frank W. Benson, were a special prize of \$50 to William R. Davis and mention for the work of Mildred C. Barnes, Harry Farlow and Robert Logan.

The senior class will hold its graduation exercises June 1, at the Stuart Club, 308 Newbury street, when the Thayer prizes will be announced.

MR. MORGAN GOES TO LONDON.
PARIS—J. P. Morgan left here Friday for London.

AFFILIATED SOCIETY MEETINGS ARE TO BE EDUCATION FEATURE

School Peace, Home Economics, Teachers' Federation and Religious Organizations Will Gather.

EACH HAS PROGRAM

The preliminary program prepared by the local committee on the National Education Association's convention in this city July 2-8, gives the arrangements of the affiliated organizations which hold their meetings with the National Education Association, as follows, subject to change:

SOCIETIES MEETING WITH THE NATIONAL EDUCATION ASSOCIATION.

I. THE AMERICAN SCHOOL PEACE LEAGUE.

President, James H. Van Sickle, superintendent of schools, Baltimore; treasurer, B. C. Gregory, superintendent of schools, Chelsea, Mass.; secretary, Mrs. Fannie F. Andrews, 405 Marlborough street, Boston.

The standing committees of the American School Peace League will hold meetings during the Boston convention, the time and place to be determined by the chairmen and announced in the official program for the N. E. A.

A public meeting of the league, to which all persons are invited, will be held. Invitations have been extended to Prof. P. P. Claxton of the University of Tennessee, Senator Thomas P. Gore of Oklahoma and Sir William Mulock, chief justice of Canada, Ottawa, to be speakers at this meeting.

The annual business meeting of the league will be held at a time and place to be determined by the executive committee.

The headquarters of the league, during the convention, will be announced in the final program of the National Education Association.

II. AMERICAN HOME ECONOMICS ASSOCIATION.

President, Mrs. Ellen H. Richards, Massachusetts Institute of Technology, Boston; vice-president, Miss Isabel Bevier, University of Illinois, Urbana, Ill.; secretary-treasurer, Benjamin R. Andrews, Teachers College, New York.

Special meeting of the association for members of the National Education Association. Association headquarters: Margaret Cheney memorial room, Institute of Technology, 30 Trinity place. Room for meetings will be announced in the official program of the N. E. A.

Tuesday afternoon, July 5—Sectional meeting, Miss Helen Kinne, chairman. Topic: "Presentation of Subject Matter in Household Science and Arts to Elementary Pupils."

Wednesday afternoon, July 6—Topic: "Methods of Teaching Household Science and Arts in Secondary Schools."

Note: All members of the Home Economics Association or of the National Education Association who wish to attend the meetings of this society, or desire information regarding accommodation, are invited to send their names in advance to the president at the address named in the above list of officers. Speakers to be announced in the official program of the N. E. A.

III. FEDERATION OF STATE TEACHERS' ASSOCIATIONS.

President, Charles S. Foos, superintendent of schools, Reading, Pa.; secretary, W. W. Remington, East Side high school, Denver.

Tuesday afternoon, July 5—Address by the president, "Aims of the Federation," by President Charles S. Foos, superintendent of schools, Reading, Pa.; discussion led by Elmer Ellsworth Brown, United States commissioner of education, Washington, and W. W. Remington, East Side high school, Denver. Activities of the state association, by N. R. Baker, district superintendent of schools, Birmingham, Ala.; S. P. Willard, agent of the state board of education, Colchester, Conn.; J. Fred Olander, chairman, state board of examiners, Pierre, S. D.; Charles B. Boyer, superintendent of schools, Atlantic City, N. J.; E. H. Mark, superintendent of schools, Louisville, Ky.; William E. Wilson, principal of Washington State Normal school, Ellensburg, Wash. General discussion.

Thursday afternoon, July 7—Affiliation of teachers' associations: "The California Plan," by L. E. Armstrong, San Francisco; "The Virginia Plan," by J. H. Binford, executive secretary of the Virginia Cooperative Education Association, Richmond, Va.; "The New York Plan," by Frank D. Boynton, superintendent of schools, Louisville, N. Y. General discussion; reports of committees on permanent organization, by E. Mackey, supervising principal of city schools, Trenton, N. J.

IV. RELIGIOUS EDUCATION ASSOCIATION.

President, William H. P. Faunce, president Brown University, Providence, R. I.; vice-president, William H. Maxwell, superintendent of schools, New York; secretary, Henry F. Cope, 193 Michigan avenue, Chicago.

Topic: "Conferences on the Religious Element in Current Education." Teachers and all others interested in the religious values and opportunities of public education (using religion in the broad and universal sense) are invited to attend these conferences. Several speakers will be announced in the official program of the N. E. A.

PREPARE TO ABOLISH SUNDAY WORK IN 250 BIG U. S. STEEL MILLS

Members of the American Institute at Banquet in New York Discuss Gradual Labor Curtailment.

AID FOR EMPLOYEES

NEW YORK—The American Iron and Steel Institute, about which little has been heard since its organization two years ago by the leading iron and steel men of the country, decided Friday night at a dinner in the Waldorf-Astoria on steps looking to the gradual curtailment of Sunday work in the plants of its members in the United States.

A committee will be appointed in the next few days by Chairman E. H. Gary of the United States Steel Corporation, president of the institution, to examine means of bringing about such curtailment of Sunday work. It was recommended that the plan for the gradual elimination of Sunday work in most of the departments of the United States Steel Corporation, begun by that organization a few weeks ago, be used as a guide to the committee in its investigation. There is little doubt that the plan will be adopted by the 250 steel and iron plants represented in the membership of the institute.

The subject of a general curtailment of Sunday work in the steel and iron plants of the country was introduced after dinner by W. B. Dickson, second vice-president of the United States Steel Corporation. Mr. Dickson spoke on the general theme of the relation of the employer to the employee as concerns Sunday work, and said that the subject was one which had been giving the steel manufacturers much thought of late.

Mr. Dickson said that he favored the establishment of a six-day week. It was just to the employees, he said, and would in the end be of benefit to the employers. A six-day week, he explained, would mean a vast additional expense to the steelmen, but he said that he and his fellow-officials of the United States Steel Corporation were quite sure that the move was an advisable one.

The plan for the six-day week, said Mr. Dickson, could be worked out to the best interests of both employers and employees. It could be done to a large extent, he thought, by so arranging the shifts that only a small force would be obliged to work in some of the departments on Sunday, and that the ones who worked one Sunday would not work the next. The details of the plan will all be worked out by the committee to be appointed by Judge Gary.

Mr. Dickson's suggestion gave the cue to the speakers who were later called upon. Each expressed himself as in sympathy with the plan and assured his hearty cooperation if the result of the committee's investigation showed that it could be feasibly accomplished without crippling the mills.

Among those who spoke besides Judge Gary and Mr. Dickson were Charles M. Schwab, head of the Bethlehem Steel Company; Willis L. King of the Jones & Laughlin Company; E. A. S. Clarke, president of the Lackawanna Coal and Iron Company and O. P. Letchworth.

Judge Gary, as toastmaster, outlined the general objects of the American Iron and Steel Institute, which, he said, were to effect means of communication between the men in these trades upon questions bearing upon the business. The institute is patterned after the English organization of a similar nature, which has been in existence many years. Although the American institute was

The plan for the six-day week, said Judge Gary, had never been able to get together in a formal manner until yesterday. Judge Gary was reelected president and the following officers were also reelected: First vice-president, Powell Stackhouse; second vice-president, Willis L. King; third vice-president, Charles M. Schwab; treasurer, Edward Bailey; secretary, W. J. Filbert. The following directors were also reelected: Edward Bailey, E. A. S. Clarke, Willis L. King, Samuel Mather, John A. Topping, T. J. Drummond, W. J. Filbert, J. C. Mober, W. A. Rogers and J. F. Welborn.

Among the steel men who attended the meeting and the dinner last night were E. C. Felton, president of the Pennsylvania Steel Company; John A. Topping, president of the Republic Iron & Steel Company; George G. Crawford of the Tennessee Coal & Iron Company; J. B. Butler, Jr., J. A. Campbell of the Youngstown Steel & Tube Company, Thomas Lynch, president of the Frick Coal Company; B. F. Fackenthal of the Thomas Iron Company; W. B. Schiller, president of the National Tube Company, and Edward Bailey, president of the Central Iron & Steel Company of Harrisburg.

RECORD PARCEL DELIVERY.

WASHINGTON—A record delivery of a parcel post package has been reported to the postmaster-general. The package was placed in the mails at Bremen, Ger., May 2, and delivered to the addressee at Seattle, Wash., on May 14, 12 days. This is the best time ever reported for mail of this character.

TIME TO BUILD ALASKA ROAD.

WASHINGTON—By a bill passed in the House an extension of one year is granted to the Alaska Short Line railroad to begin building its 330 miles of road across southwest Alaska, from Cook's Inlet to Anvik. With this provision the company has until June 1, 1911, to begin work.

Summer at the Pacific Beaches

Climb the Rockies in Colorado, go down the trail at the Grand Canyon of Arizona, and see lovely Yosemite.

These are vacation attractions offered by the Santa Fe.

CRIMSON NAMES EDITORIAL BOARD

The Harvard Crimson announces today the election of members of the editorial board for the remainder of this and the first half of next year, as follows:

President, T. H. McKittick, Jr., '11; managing editor, D. C. Nugent, Jr., '11; secretary, R. F. Duncan '12; members of board, F. Ayer, Jr., '11, H. MacNider '11, A. Stevens '11, A. Wheeler '11, F. D. Sachs '11, E. A. Winsor '11, F. D. Huntington '12, H. deWindt '12, S. Underwood '12, S. T. Farquhar '12, W. K. Macy '12, W. S. Witmer '12, R. W. Williams '12, H. L. Groves '12, C. M. Storey '12, R. C. Piper '12, R. M. Blackall '12, W. M. Whitehead '13, R. W. Bennett '13, J. Coulson, Jr., '13; business manager, A. Sweetser '11; assistant business manager, S. H. Bowles '12.

STANDARD BUYS GAS LAND.

PITTSBURGH—The Standard Oil Company, through its Hope Natural Gas Company, has closed a \$1,500,000 deal with the Manufacturers Light & Heat Company for the latter's great holdings of undeveloped gas territory in West Virginia.

STEAMSHIPS

All-The-Way-By-Water TO NEW YORK

METROPOLITAN LINE. An unbroken night's rest from City to City over the most fascinating Salt Water Route in the World. Harbor, Ocean, Sound and River. Turbine Steamships.

HARVARD AND YALE

Boston to New York, \$4.00. Through tickets to all points. Fare the same as via Long Island Sound Lines. Week days and Sundays. Leave Boston, Ind. Wharf, 4 p. m. Same daily schedule from Pier 9, North River, near foot Rector st., N. Y. Due either City 8 o'clock next morning. Through tickets at Wharf, also at Tourist Offices on Washington St., Boston.

Most Delightful Trip from Montreal

13 DAY VACATION CRUISE \$50.00

Berth and Meals included (First Cabin), to Charlottetown, Prince Edward Island, Sydney, Cape Breton, St. John's, N. F., and return. Steamers Roseland and Bonaville of the Black Diamond S. S. Line sail from Montreal every Saturday; 9 days at sea; 4 days ashore; no hotel bills; stop-over allowed. For illustrated pamphlet "O. A." write A. T. WELLES, G. P. O. Montreal, Canada, or BOWRING & CO., New York, N. Y.

June, a delightful month for the

12 DAY VACATION CRUISE \$60.00

Berth and Meals included (First Cabin) To Halifax, N. S., and St. John's, N. F. by the large steamers Borna and Florio; sail every Saturday; Marconi wireless, Bilge Keels.

RED CROSS LINE.

Take this trip to the land of the Evangeline and wonderful Newfoundland. Eight days at sea—four days in port—you may live on the steamer all the time—stop-over allowed if desired. Send for illustrated Pamphlet "Z." All tourist agencies, or BOWRING & CO., 17 State Street, N. Y.

INSPECTOR LAUDS HUMPHREY BILL

NEW ORLEANS—George Uhler, inspector-general of the steamboat inspection service of the United States, spent one day here on his way to Galveston in the interest of his service.

Mr. Uhler declared that he thought the Humphrey bill is the best measure yet proposed for restoring the American merchant marine service. He recalled the time when he was engineer on the Morgan line between this city and New York, when ships were lying four deep at the wharves in New Orleans for several miles up the river, and when it was not uncommon for the vessel to distribute as much as \$16,000 on a single trip to New Orleans.

Mr. Uhler served 11 years as president of the American Marine Engineers Beneficial Association, which he gave up to accept his present appointment.

A TRIP AROUND THE WORLD

BY MEANS OF PICTURES AND SHORT SKETCHES ALONG AN INTERESTING ROUTE IS NOW ONE OF THE SEVERAL ENTERTAINING FEATURES TO BE

FOUND ON THE Boys' and Girls' Page of THE MONITOR EVERY SATURDAY IN THE

CAMERA CONTEST

For the most acceptable photograph received from its youthful readers each week The Monitor will give one dollar.

The photographs sent in may be of children at play, school scenes, historic places, picturesque views, quaint houses, city or country scenes, either characteristic or unusual. Microprints are not available.

If a descriptive story of not over 200 words is sent in and published, it will be paid for. Put a title on the picture, write your name and address plainly and enclose stamps if you wish photograph returned.

Forward to "Children's Page," The Christian Science Monitor, Boston, Mass., Falmouth and J. St. Paul Streets.

INSURGENCY IS NOT NEW FOR CONGRESS AS HISTORY SHOWS

WASHINGTON—Students of American political history have discovered in their reading that quite as formidable an insurgent movement as that of the present day sprang up away back in the early forties, when the government was adopting the sub-treasury system, and was attended with dire results so far as the party in power was concerned. With a change of names and dates, the language used to describe what took place then would come near fitting the present situation.

The difference between the insurgency in connection with the sub-treasury and the tariff insurgency of the present time is noteworthy. The sub-treasury insurgents finally lost out and were for the most part retired from Congress by disappointed constituents. The present day tariff insurgents seem in many instances to have the support of their constituents, and the chances are that their number will be increased in the next Congress, or that the Democrats will have a majority in the House.

So far as political excitement is concerned, the days of 1840 and the years succeeding were a good deal like the present time. The country was sharply divided over the sub-treasury idea, and because of the long and vigorous campaign against the Bank of the United States by Jackson, the people were generally well informed on financial questions. They quickly took sides, and watched the proceedings of Congress with sustained interest. As insurgents appeared they were greeted with derision, and as fast as opportunity arose they were retired to private life. But in the end the country accepted the sub-treasury system and has lived under it ever since.

VISCOUNT TERAUCHI WILL BE RESIDENT GENERAL OF KOREA

TOKIO—It is authoritatively stated that the resignation of Viscount Sone, resident general in Korea, has been accepted, and that Lieutenant-General Viscount Terauchi will succeed him, at the same time retaining his portfolio as imperial minister of war. Isaburo Yamagata, the adopted son and heir of Field Marshal Yamagata, will be appointed deputy resident general in Korea. The official announcement of these changes will be made shortly.

It was stated in January last that Viscount Sone had left Seoul for Tokio for the purpose of explaining his Korean policy to the imperial government, and that, if the government failed to approve of it, he probably would resign. It was said later, however, that the minister general had no intention of relinquishing his post.

TWO THOUSAND LIVE MAINE LOBSTERS TO BE PUT INTO PACIFIC

BOOTHBAY HARBOR, Me.—The United States fish hatchery at this place has just shipped 2000 live lobsters to be distributed along the Pacific coast for propagation purposes.

All the lobsters are contained in a specially prepared refrigerator car and are in charge of Supt. E. E. Hahn of the government hatchery, who is accompanied by Mrs. Hahn.

A departure is being experimented with at this hatchery in the collection of 450,000,000 flounder eggs, from which 800,000,000 fry have been liberated. Besides this 30,000,000 cod eggs have been collected which produced 21,000,000 fry, also 2,000,000 haddock eggs which produced 1,500,000 fry. There are now 106,000,000 lobster eggs in process of hatching. The government is now building a new 80,000 lobster pound at Pemaquid which will be the best in the country when completed.

BOSTON THE HOST OF SHOE DEALERS

Boston has again been selected as the place for holding the regular summer meeting of the Southern Shoe Wholesalers Association, of which John W. Craddock of Lynchburg, Va., is president and John A. Faulkner of the same city is secretary. The date of the meeting is Saturday, July 9, at Hotel Somerset, at 10:30 a. m. There will be forenoon and afternoon sessions and a dinner in the evening.

DEMAND FOR SMALL BILLS.

WASHINGTON—There is a demand throughout the country for paper money of the smaller denominations, which the treasury is unable to meet, and the banks have been asked to exchange \$10 silver certificates for bills of lesser figures.

MONITORIALS

By Nixon Waterman

THE MAN THAT PAYS.

Oh, you who are toiling and tilling
To gladden your bins with grain,
The whole world is joyfully willing
To give you your share of gain.
'Tis pleasant to know you are getting
Rewards for the harvest you raise,
But when your prices are setting,
Remember the man that pays.

Oh, you in the marts of the city,
Who sell to the ones who need;
For the hungry crowd have pity,
To that "still, small voice" give heed.
Let "live and let live" be your dealing,
Be the motto directing your ways,
Nor banish from business all feeling,
Remember the man that pays.

IT LOOKS THAT WAY.

Helter—What do you think of this proposition announced by Captain Scott who is to command the British expedition to the south pole, to use a motor sled for the purpose of reaching the desired spot? Skelter—It strikes me it is a very clever idea. The south pole being at the extreme bottom of the map it will be down hill all the way, and it looks as if he ought to be able to coast to his journey's end. But it will be up-hill work getting that sled home again.

BY THE GREEDY TRUSTS.

The way in which the prices of Foodstuffs are being boomed,
The "Ultimate Consumer" may
Be ultimately consumed.

TOO ERRATIC.

The ones who trail the comet say
The main thing that's the matter
Is "now you see it and now you don't,"
Especially the latter.

A thing may be one thing under some conditions and another thing under other conditions. For instance, "Uncle Sam's" drydock, Dewey, at Manila, having sunken in the sea, it is not that kind of a dock any more.

TOWARD THE LIGHT.

This Christian world will build with joy,
When kindly reason rules,
Less warships fashioned to destroy
And more and better schools.

It is said that the experimenters in the employ of the Federal Government have succeeded in making a high grade paper from corn stalks, and that it may soon be produced at a price that will make it available for newspaper purposes. It seems as if paper of that material ought to be just the kind for newspaper use since corn has ears which if employed aright should make its stalk interesting.

NOT THE FOLDING KIND.

At times the river gaily sweeps
Toward valleys far ahead,
But when it tires, then it sleeps
Within its own soft bed.

THOSE SUMMER CARS.

The Light One—Don't you think that the street-car fares should be reduced? The Heavy One—No, I am willing to leave the fares up where they are if they will only make the running-boards a little lower.

If the authors of some of the addresses delivered at the recent Mohonk peace convention knew whereof they were speaking it is to be surmised that even a war cloud may sometimes possess a silver lining—for the concern manufacturing battleships and army and navy supplies.

NO DOUBT OF IT.

Putson—Is Gilson much of a hand to borrow trouble?
Calls—Yes, indeed! He is always asking the next door neighbors for the loan of their auto.

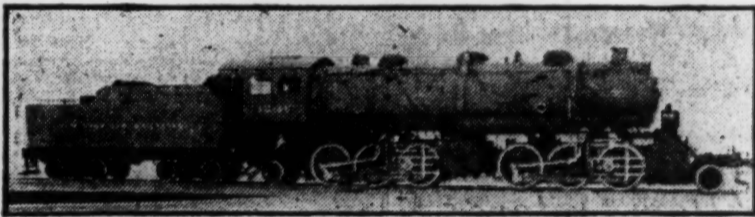

Since the Patent Office building at Washington is becoming so crowded there is but little room for additional models to be shown, wise inventors who desire to have their products exhibited there will make their devices of the folding, collapsible, tuck-away-out-of-sight kind.

TO SAVE CAR FARE.

The worried "commuter" now views, in alarm,
His higher rail rates, with a frown,
And the cry we've been hearing of "Back to the farm!"
May be changed soon to, "Back to the town!"

Giant Engine for Boston & Albany

Powerful freighter to be used on heavy Berkshire grades.

MALLET ARTICULATED COMPOUND LOCOMOTIVE.

This machine is really two built together and has a drawbar pull of 66,000 pounds.

A NEW Mallet articulated compound engine that is really two locomotives in one with a capacity for hauling freight of 50 per cent more than the present locomotives in use in the East is soon to be permanently in use on the western end of the Boston & Albany railroad between Albany and Hinsdale, where some of the heaviest grades in the East are encountered. It has already been tried out successfully on the New York Central.

This new type of freight locomotive is the first one to be seen in the East. It has a draw bar pull of 66,000 pounds, and is capable of hauling over the steep Berkshire grades 2150 tons of freight. On a level track it could haul 125 loaded freight cars, which is 50 more than the heaviest freight locomotive can haul, and weighs loaded nearly 155,000 pounds. It

is 84½ feet long and has six pairs of drivers, each 57 inches in diameter.

There is one boiler and two sets of cylinders, the steam passing through the rear cylinders first going into the forward cylinders, thence into the exhaust and then into the stack. The locomotive is equipped with the Walschaert gear, one of the distinguishing features of which is its flexibility in going around curves. A perfectly rigid locomotive of this length could not be used on curves, but the boiler of this locomotive sets on both groups of drivers and there is sufficient play to permit the engine to take the curves easily. It is the invention of a French engineer, M. Mallet, and typifies the tremendous advance made in the size and weight of locomotives in the last few years.

What Other Editors Are Saying

THE selected editorial comments today deal with the centennial celebration of the independence of Argentina and the flourishing condition of that South American nation:

NEW YORK SUN—In a century of government it has learned how to govern, and today the Argentine Republic stands with Brazil at the pinnacle of South American peace and prosperity.

BOSTON JOURNAL—Argentina began the centennial celebration of her independence by opening a world's fair at Buenos Aires and by laying the keel of her first dreadnought at the Fore River yard in Quincy. Argentina is flourishing in every direction. Her commerce and her industry are extensive; her cities are full of enterprise and confidence; her progress is notable along educational as well as industrial lines. Buenos Aires is one of the finest cities in the new world.

PROVIDENCE (R. I.) JOURNAL—Argentina has forged ahead in recent years along the path of peace, order and industrial development. It has a population larger than that of Canada, 17,000 miles of railway, and federal revenues of more than \$100,000,000. Its expansion has been a triumph for the south-of-Europe pioneer, and its high position among the nations of the earth is a splendid tribute to the ability of the Latin as empire-builders in favorable latitudes.

SPRINGFIELD (Mass.) REPUBLICAN—Argentina, the first of the South American states today in the esteem of the rest of the world, a country of immense possibilities as well as of ample

prosperity and stability at the present time, merits more attention than it receives from the great republic of the North. Our trade relations with it should be closer. The future should see the two nations more intimate rather than more remote in their friendship.

BOSTON TRANSCRIPT—The celebration of the hundredth anniversary of independence by Argentina in her capital city will continue until December. It will bring the republic into the world's notice as no previous event in its history has done. In proportion to population Argentina is the greatest agricultural country in the western hemisphere. At least one-fourth of her entire population is engaged in the cultivation of the soil and in stock raising, and even the United States is forced to acknowledge her as to a considerable extent a rival in this fundamental industry.

BUFFALO COMMERCIAL—The growth of the Argentine Republic since it threw off the Spanish yoke has been steady. Since 1895 there has been a remarkable increase in population and prosperity incident thereto. The republic now has about 7,000,000 inhabitants, as against less than 4,000,000 15 years ago. This increase is due largely to immigration from the most progressive countries of Europe, including France, England and Germany. British and German capital have also contributed largely to the growth of the country, and great strides forward have been made in railway transportation and foreign trade.

MILLS OF SPOKANE PREPARE BOXES FOR RECORD FRUIT CROP

SPOKANE, Wash.—Mills in Spokane and throughout the inland empire are working day and night on apple, peach, cherry, plum and berry boxes, more than 10,000,000 of which, each holding 50 pounds, will be required to pack the fruit crop in eastern Washington and Oregon, north and central Idaho, western Montana and southeastern British Columbia the coming summer and next fall. Packed with fruit these packages would fill 15,675 freight cars, or 625 trains of 25 cars each. The value of the crop is estimated at from \$15,000,000 to \$20,000,000, and may reach a higher figure.

Fully 3,000,000 boxes will be delivered to orchardists in the Wenatchee valley in central Washington, and it is predicted that not less than 2,500,000 boxes will be used in the Yakima valley. Walla Walla and Okanogan valleys will take up to 1,500,000 boxes, while the berry and tree fruit growers in the upper Columbia country say their orchards will run at least 500,000 boxes. A million boxes will be delivered in the Palouse district in southeastern Washington and western Idaho, the Blue Mountain country and the Spokane and St. Maries valleys and other nearby points. Other belts in Washington and Oregon have orders in for 1,500,000 boxes.

Reports from the fruit belts in the Clearwater country, in northern Idaho, and the Bitter Root country, in western Montana, are that the outlook is bright for record yields of apples and other fruits. Growers in the southeastern part of the province of British Columbia report that every indication is that the apple crop will be larger this year than ever before in the history of the industry.

BOARD IN PARLIAMENT FORMED TO ADVANCE WOMAN SUFFRAGE

LONDON—Several members of Parliament belonging to all parties have constituted themselves a "conciliation committee for woman suffrage." They aim at settling the question on a plan acceptable to all grades of suffrage advocates.

As a practicable minimum they will introduce in the House of Commons as early as possible a bill enfranchising women holding such house property as would qualify them if they were men to vote. The promoters of the bill regard it merely as a working compromise, not as an ideal solution. It would add a million new voters to the register.

The committee contends that the present House of Commons, like all since 1870, shows a majority in favor of woman suffrage.

MR. TAFT DECIDES TO TRAVEL ALONG

President Says He Will Not Cancel Engagements Because Fund Is Held up But Will Pay Own Expenses.

WASHINGTON—President Taft says he will not stop traveling just because the House refused to make the \$25,000 expense money usually given a President "immediately available." Instead he says he will keep up his journeys about the country and if necessary will pay for them out of his own purse.

The President told callers Friday night that he would not cancel the engagements he has made for a trip to New York on Monday next and the jaunt through Ohio and Michigan which is to begin next Thursday. The jump to New York, it was figured out, will cost Mr. Taft about \$400 and the other trips several thousand.

OHIO'S GOVERNOR KEEPS HANDS OFF

COLUMBUS, O.—The demand made by William J. Bryan that Governor Harmon force the Democratic state convention to select a candidate for United States senator will not be heeded by the governor. He is opposed to naming a senatorial candidate at the convention, which meets on June 21, because he believes it would engender enmities and jeopardize the success of the party.

He and his friends construe the demand of Mr. Bryan, made through the Commoner, after Mr. Bryan had sailed for Europe, as indicating that the latter favors nominating Governor Marshall of Indiana at the next Democratic national convention, rather than Ohio's chief executive.

EXPORTS TO CANADA GROW.

WASHINGTON—Exports of domestic merchandise from this country to Canada during the first 10 months of the current fiscal year were greater by \$45,000,000 than in the same period of the previous year.

PLAN A LAUNCH REGATTA.

CHESTER, Pa.—There is a movement on foot among the owners of naphtha launches in this city to have a launch regatta on the Delaware river in the near future.

NEW YORK'S MAYOR NAMES COMMITTEE ON FOURTH OF JULY

NEW YORK—With the appointment by Mayor Gaynor of a special Fourth of July committee, New York is assured an "old-fashioned" celebration of Independence day, at which educational and instructive features will predominate and take the place of the mere noise that has characterized the observance of the day in Manhattan in the more recent past.

Parades of military forces, policemen and firemen; exercises with addresses by prominent orators and fireworks in the evening are among the features on the tentative program. It is also likely that the recommendations of the Playground Association of America for special exercises in all the school districts of the city for the boys and girls will be adopted as part of the general plan. On the committee named by the mayor are the following well-known citizens, representing all classes and sections of the city:

Jacob H. Schiff, Gen. Walter Howe,
Henry B. Tower, Marcus M. Marks,
Gen. Charles F. Roe, Rear Admiral E. H. Gen. G. W. Wingate, C. Leutze,
Luther H. Gulick, Edmund Wetmore,
James E. Sullivan, Gen. G. B. Lord,
Jacob Ellis, Edward J. Shalvey,
Mrs. Isaac L. Rice, Alex. Frankenstein,
Alderman S. Marx, M. Samuel Stern,
Thomas I. Crane,
Leo F. Hammer, W. P. Larkin,
Nathan Straus, J. H. Burroughs,
Mrs. C. H. Mackay, Dr. W. E. Fitch,
Dr. W. H. Maxwell, W. A. Johnston,
John H. McCooey, A. H. Spencer,
Eugene A. Pullin, Alderman Frank L. Dowling, Tristram B. Johnson,
Morris Coker, John D. Rockefeller, Jr.,
H. C. C. Schumak, Robert J. Kenworthy,
Patrick J. Conway, Herman A. Metz,
Charles F. Murphy, Harry Higgins,
Joseph Vesely, Thomas B. Leahy,
Charles F. Grison, John L. M. Allen,
Mrs. E. L. Winthrop, Gen. J. G. Eddy,
Charles R. Lamb, Jacob Brennan.

The first meeting of the committee to map out a program will be held next Wednesday afternoon in the council chamber of the city hall. Newspapers of the city have accorded the plans of Mayor Gaynor and others for a quiet Fourth much praise, extracts from some of these editorials being as follows:

New York Tribune: We are glad to see that the plan for a rational celebration of the Fourth of July, which the Tribune has advocated, is gradually taking shape.

New York World: Mayor Gaynor rightly refuses to modify the decision against the sale of fireworks for the Fourth of July. Yet it is equally right that Young America should have some method of celebrating—something to take the place of fre crackers and torpedoes. . . . An old-fashioned Fourth would aid in impressing upon New York's vast juvenile population, so largely of foreign parentage, the real significance of Independence day.

The Evening Sun: "The revival of the spirit of Americanism"—what loftier and more admirable end could be desired, and by what means could Independence day be so fitly celebrated? If this can be done by parades of the United States army and navy, the national guard and all sorts of civic and patriotic societies, by processions of school children and by an elaborate display of fireworks provided by the city—by all means let us have such a celebration. The experiment could surely do no harm.

BREAKS GUN RECORD ON NEW BATTLESHIP

NORFOLK, Va.—Coxswain J. R. Edwards of Illinois, 21 years old and serving his first enlistment, has made for the new battleship, the South Carolina, a new world's record for big gun shooting, which incidentally emphasizes the superiority of United States naval marksmanship.

With her forward turret 12-inch guns she made 16 "bull's-eye" target hits out of 16 shots in 4m. 51s.

Upon the arrival of the South Carolina at the navy yard from the drill grounds, it was said aboard the ship that the record gun work by Coxswain Edwards was made with the 12-inch guns in the vessel's No. 4 after turret. Lieutenant McMillan, officer of the deck, declined to give out details.

Captain Fechteler has as ordnance officer, Lieut. Comdr. T. T. Craven, formerly attached to the Kentucky. His report shows that the hits a gun a minute were 1.01, making the final minute 50.50. The extraordinary feature was that 55 of 60 great 12-inch projectiles hit the bull's-eye. Three of the four turrets on the ship made 100 per cent of hits; in other words, every shot found its mark.

NAMES JAMES A. MCCANN.

NORTH ADAMS—Mayor John H. Waterhouse has appointed James A. McCann, president and principal owner of the P. J. Boland Company, as licensee commissioner for the six-year term to succeed John F. Condon, whose term expires June 1.

MILL COMPANY RAISES WAGES.

MINNEAPOLIS—Every one of the 2000 employees of the Washburn-Crosby Milling Company has been notified that on May 30, an 8 per cent increase in wages will become effective. This is the dull milling season, but the increase was made voluntarily.

A Subscription to

The Monitor

Will Bring You
the Following:

Full Page of Editorials Every Day

giving comment on the current world happenings of importance.

A Page of Cable and Correspondence News

every day, based largely on special information from The Monitor's own representatives in foreign countries, in addition to which are scattered through the paper various interesting and valuable illustrated articles dealing with special subjects, also sent by The Monitor's own foreign representatives, giving a foreign service of unusual interest and value every day.

Home Forum Page

that stands unrivaled by any American newspaper, every day.

A Page of Financial News

every day, giving critical and informative articles on current matters of value to investors and general business men.

A Page of Clean Sporting News

every day. A comprehensive report of athletics in the leading colleges all over the country. News of all important events from The Monitor's own correspondents in the leading universities and colleges, with a special page of college news every Friday.

A Double Page Department of Fashions and Household Interests

every Wednesday and Saturday. Authoritative and adequate departments of Art, Music and the Theaters on alternate days through the week.

Daily Symposium of Comment

of leading editors throughout the country on the principal news event of the moment.

A Unique Page for Children

every Saturday, specially prepared in The Monitor office and including a clean series of comic pictures and rhymes, puzzles, games, photographic contest, travel trips, and similar features.

Book Reviews

and authoritative literary notes every Monday.

The Monitorials

By Nixon Waterman three times a week.

Unique Column for Librarians and Booklovers

every Wednesday, prepared by Sam Walter Foss, well known poet and librarian of the Somerville public library, under the title of The Library Alcove.

These features are in addition to a careful presentation of the national and sectional news of the world every day, based on reports of the Monitor's own correspondents throughout the United States, and the complete news service of the United Press Associations for the United States and foreign countries.

REAL ESTATE NEWS

Monday, Memorial day, will find many persons looking for summer cottages, building sites for both summer and winter homes and rents, and realty brokers everywhere hereabouts expect one of the busiest days of the year. Atwood & Patten, Niles building, have issued an attractive little booklet, describing Willoughby Park at West Gloucester, Mass. The book contains many fine half-tones of views at the park and its immediate vicinity and persons looking for seashore sites would do well to look over Willoughby Park. Procter Brothers are the Gloucester agents.

The local market this week has held the strong tone which has characterized trading for the past two months or more. Many valuable properties have changed hands in all districts and the suburbs. One of the important city sales involves the Charles Head building on State street, shown in the accompanying illustration, taxed on a valuation of \$160,000.

With building operations in New England running nearly \$4,000,000 in value of contracts awarded, ahead of the corresponding period of 1909, as they are today, and far in excess of anything in the past decade, it can be seen that the prospects for real estate are exceedingly bright.

LATE CITY PROPER TRANSFERS.

Helen L. Jordan has sold the two estates numbered 91 Pinckney street and 124 Myrtle street, Beacon Hill, to March G. Bennett who buys for investment. The Pinckney street parcel is assessed as a whole on \$13,500, \$6400 of which amount is on the 1,701 square feet of land and \$7100 on the 4 1/2-story brick dwelling. The total assessment on the Myrtle street property is \$7200, of which \$3700 is on 1221 square feet of land and \$3500 on the dwelling. Codman & Street were the brokers in both transactions.

The sale has gone to record involving two four-story brick houses at 58 Lowell street, running through to 65 Billerica street, West End, the Boston Penny Savings bank selling to Jacob Swartz. They occupy 1879 square feet of land, with a total rating of \$16,700. Of this amount \$7000 is on the land.

In the South End the three four-story and basement brick houses and a total of 2700 square feet of land numbered 28, 30 and 32 Rochester, near Albany street, have been conveyed by Abraham Watchmaker to Eddie Gordon. The total assessed valuation of the property is \$21,000, of which \$5400 is the rating on the land.

TWO BIG ROXBURY SALES.

Dr. Francis F. Whittier and Arthur P. Crosby, trustees, have conveyed to Thomas B. Griggs title to the brick apartment house numbered 433 Brookline avenue, near Longwood avenue, Roxbury, assessed for \$24,300.

Another conveyance in the Roxbury district closed by the John P. Weber estate involves seven three-story octagon front brick houses at 60 to 72 Bromley street, the price paid being \$11,200. The purchaser is Robert H. Ford.

BROOKLINE LAND CHANGES HANDS.

A. C. Chisholm has purchased from Horace W. Taylor 25,602 feet of land on Tappan street, near the junction of Beacon street, Brookline, assessed on a valuation of \$10,600, and will improve with either apartment or two-family houses. He has also purchased from the same grantor the two-family frame house 208 Rayson road, and 8760 square feet of land, taxed for \$12,000. As part payment for the property Mr. Chisholm has conveyed a nine-suite frame apartment house at 41 Notre Dame street, Roxbury, occupying 2300 square feet of land. The total rating is \$4600, \$600 being on the land.

Some 15 lots of land, having a large frontage on Fleet road, Waverley, taxed for \$3000, with a total area of 75,000 square feet, are also included in the conveyance to Mr. Taylor, in addition to 3961 square feet of land on Highland avenue, Watertown, rated at 5 cents per square foot, and 15,000 square feet, situated on Park avenue, Braintree, also taxed for 5 cents per square foot.

NEWTON ACTIVITY.

Trading in Newton realty this month has been particularly brisk. John T.

Burns of Newton and Newtonville reports that he has sold nearly \$65,000 worth of real estate in these beautiful suburbs during May.

Mrs. Edith D. Jones of Newtonville has sold her estate numbered 20 Dexter road, Newtonville, to Charles Cotton of Dedham. The property consists of a shingle and cement 14-room house and 12,000 feet of land, all valued at \$11,000.

Edward E. Hoxie has sold his new stucco house on the corner of Upland and Oakwood roads, Newtonville, through John T. Burns, to W. T. Hodges of Boston, who purchased for occupancy. The lot contains 7000 square feet and the house is one of the most artistic in this section.

The Eliza V. Crowell estate at 11 Copley street, Newton, has been sold to Mrs. H. B. Pinkham. There is a modern 10-room house and 7500 feet of land, all rated at \$9000.

Deeds have gone to record in the transfer of the property at 721 Washington street, Newtonville, from the Austin R. Mitchell estate to M. C. MacNamara, who buys for a home. The property is valued at \$4000, of which \$1200 is on the 5700 feet of land.

The attractive stucco and shingle house at 24 Marlboro street, cwtown, just completed by John T. Burns, has been sold to Mrs. M. H. Smith of Boston for immediate occupancy. There are 5600 feet of land and the total valuation is \$7000.

Mr. Burns has sold for Dr. F. M. Johnson of Boston his beautiful home at 12 Dexter road, Newtonville, with extra lot of land, to Mrs. E. P. Crawe. The large colonial style house and 27,910 square feet of land are valued at \$11,500.

John T. Burns has sold the estate at 285 Bellevue street, Newton, to Norman F. Xavier of Newton. Mrs. S. Lovering was the grantor. The property consists of a large modern house and 10,000 feet of land, all assessed at \$6500.

The estate of A. C. Judkins has sold to L. S. Coombs a property on Omar terrace, Newtonville. The house, with 12,900 feet of land, has a valuation of \$6000. John T. Burns was the broker.

READING TRANSACTIONS.

John M. Gibbs, trustee under the will of George L. Smith, late of Reading, has sold to Dr. William J. Brown the 10-room modern house facing Reading square, with about 28,000 square feet of land, the house and lot being assessed above \$8000. The new owner is already occupying the premises. Arthur W. Temple was the broker.

Through the same agency Elizabeth C. Brooks of Brunswick, Me., has sold to Jean P. Carleton her 10-room modern colonial-style house with 15,006 feet of land at the corner of Mineral and King streets. The purchaser buys for a home.

ISBURN ESTATE TRANSFERRED.
About two months ago these columns reported the option taken by Charles M. Conant, Old South building, on the estate of John P. Isburn.

(Continued on Page 23, Column 1.)

TRINITY TO RAZE OLD STRUCTURES

NEW YORK—Trinity Church Corporation, which has been censured for the manner in which tenements owned by the church were maintained, applied Wednesday to the building superintendent of the city for permission to demolish 10 tenement houses on the rear of lots controlled by the corporation, so as to improve the light and air of the buildings standing on the front of the lots. The property to be improved is as follows:
At 83 King street, 89 and 119 Varick street, 330 Stanton street, 5 and 7 Dominick street, 12 Dominick street, 103 West Houston street, 35 and 37 Clarkson street, 25 Clarke street.

MORE MINNESOTA CONGRESSMEN.
ST. PAUL, Minn.—Minnesota will gain two congressmen in 1912 if the present ratio of apportionment is adopted by Congress, as the result of increase of population shown by the new census, it is estimated here. If Congress adopts a higher ratio, the state will probably be entitled to 10 congressmen in place of the present nine.

HOUSEHOLD NEEDS

OUR RUGS NOW CLAIM ATTENTION!

You may not be aware that, however soiled, worn or out of shape, they can be restored to their former usefulness and beauty through our native process and expert workmanship at moderate cost. The proper renovation of Oriental Rugs, Hangings, Embroideries and Tapestries has been our specialty for the past 15 years. We are, in fact, the firm that introduced into New England the Eastern way of treating these goods—an absolutely sanitary process which brings out the color, raises the nap, removes stains and disagreeable odors, without causing any injury such as shaking, beating on the line, or use of machinery are sure to do.

Our process of cleansing, together with our special method of packing, is a safeguard against moths.

Call up 3025 Oxford, and we will call to give estimates without charge.

219 Washington St. (Brookline Village)

TELEPHONES AT EACH OFFICE

Since Jan. 1, 1909, I have made cash sales of \$2,962,58 in the

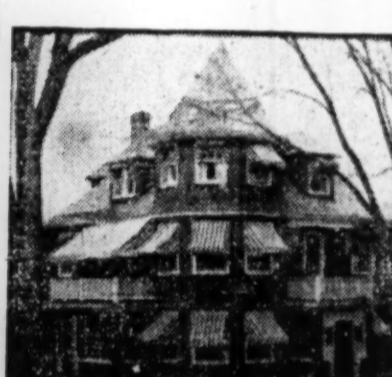

Fisher Hill District, Brookline

from the land bought on that date. Others in a position to know say this is the largest sale from any one tract in this line. Well informed buyers have been quick to take advantage of the combination of high class locality, desirable neighbors, ease of access and prices lower than market rates. Before Dec. 1 I wish to make further sales equal to the above sum. This opportunity is attractive to investors, high class builders and one to be seized by each person wishing to establish a home under exceptional conditions. REAL ESTATE MEN SAY THIS COMBINATION OF IDEAL CONDITIONS AND LOW PRICES CANNOT BE DUPLICATED TODAY. It will be difficult to equal it in the future. Large or small restricted lots at from 30c to \$5. A few at even less. Terms of payment to meet the convenience of buyers. The Fisher Hill district has been carefully developed with attractive single houses, many of them costing a large sum, which are occupied by their owners. This land, quiet, secluded, free from all objectionable features, is but from one to ten minutes from Beaconfield station, to minutes from South Terminal and near Beacon Street electric at Deane Road. A RARE CHANCE FOR MEN WHO ACT QUICKLY. JOHN D. HARDY, to High St., junct. Summer, Boston.

ROOFING and REPAIRS

Beautiful Home-Sites

One to Four Acre Lots For Sale

FAIR OAKS presents ideal home sites. It is in the town of Lexington, Boston's most scenic rural suburb, 10 1/2 miles from the State House, most accessible by train or electric. It comprises nearly 90 acres of beautiful rolling country, including Loring Hill, one of the highest elevations of miles.

It has been designed so as to take full advantage of the beautiful country in which it lies and embodies the principles of the best landscape architecture. Safeguarded by the most careful restrictions. It has all the advantages of the city with the delights of the country.

Spend an hour by coming out and examining it for yourself. Write us for illustrated descriptive booklet. Address

ARTHUR E. HORTON, Manager, Lexington, Mass. Tel. Lex-290. Offices on premises, corner Middle and Waltham streets, or EDWARD H. WIGGIN, 60 State street, Boston, Mass.

Fair Oaks, Lexington

WABAN, NEWTON

Offers greater attractions to the home buyer than any section of Greater Boston. There are good reasons for the above statement. It is high, has excellent train service, good schools, stores, is being built up entirely with single houses and on lots of 10,000 square feet and upward, which insures elbow room, and is strictly a residential section.

If you are to make a Boston suburb your home, don't make your choice until you have seen Waban. Good lots can now be had from \$750 up. Should the houses which I have for sale not meet your requirements, I can arrange to build for you either from your plans or others that will meet your needs. Send for plans and particulars.

Two furnished houses for rent for summer. For appointments Decoration day telephone 258-2 Newton So.

For anything for sale or rent in Waban, apply to

JOSEPH CONGDON

OFFICES TO LET
DESK ROOM FOR RENT—Large space, well lighted, 2nd floor of office building. Apply to janitor, 93 Broad st.

by J. E. Conant & Co. of Lowell. The real estate brought a total of \$11,587.50, plus taxes for the current year. It was sold in seven parcels and the bidding was good. Lot 1, the manufacturing lot, was purchased by J. B. Wise of Water-town, N. Y. The other purchasers were Syracuse and local buyers. The machinery, manufacturing equipment and other personal property was sold in 506 lots to purchasers from Buffalo, Syracuse, Watertown, North Adams, Mass., New York city, Ashland, Ky., Newark, N. J., Chicago, Ill., Philadelphia, Pa., Providence, R. I., Nashua, N. H., Boston, Mass., Rochester, N. Y., Worcester, Mass., and Springfield, Mass. Many very high class concerns had representatives at the sale and the bidding for the better and larger machines was very active and persistent. The total result of the sale was \$28,450.

BUILDING NOTICES.

AUTOMOBILES
In times of the new or women of moderate means did not feel that they could afford to buy an automobile, the ones they could afford to buy being obsolete and so much out of date that they would not care to purchase. All this is changed now. Today a person of moderate means can buy an up-to-date side-entrance touring car with modern equipment, a car you will be proud to own and ride in, at a very moderate price. I am conducting a sale of cars taken in exchange for new cars. The list includes new, second and third hand cars of all makes. Cars are overhauled, painted and varnished.

Any one who is contemplating buying a car should call and look over the cars I am offering.
Cars shipped all over the world. If unable to call, send for exchange car literature.

E. K. BOYNTON

REAL ESTATE NEWS

CHARLES HEAD BUILDING, 74 STATE STREET.
Sold this week to the State Street Associates, who have heretofore been unable to purchase the site. A much higher structure will eventually replace this one.

(Continued from Page 21.)

tate of the late Charles H. Isburgh at Clifton Heights, Marblehead. This estate consists of a little more than six acres of land and 11 completely furnished cottages, together with caretaker's house and garage. The parcel has a frontage on the ocean of nearly 300 feet and a frontage on Atlantic avenue (the main boulevard from Boston to Marblehead) of 304 feet. The property would have been transferred sometime ago only that there has been a delay, which has been caused by the necessity of getting certain matters arranged with the probate court in order that the title might be perfected. The fact that the greater part of this property was resold by Mr. Conant during the winter months is evidence of the value of real estate on the North Shore. This is one of the largest transactions which has taken place around the North Shore for a long time. About \$70,000 was involved in the transaction. With the exception of parcels 7, 9, 11 and 12, which are still in the market, Mr. Conant has disposed of the entire estate. All of these houses are modern in every respect, bathrooms, elec-

tric lights, etc., and all are completely furnished even to the silver and linen.

SALES BY HENRY W. SAVAGE.
Beacon Street, Brookline.
Henry W. Savage reports final papers passed in the sale made by his office for Alfred DiPesa of his brick dwelling house and 4139 square feet of land at No. 1622 Beacon street. The property is assessed on \$14,500, \$5000 being on the land. Mr. Hiram J. Potter of Brookline was the purchaser.

Aberdeen Change.
Henry W. Savage has sold for F. L. Allen the frame dwelling house and \$200 square feet of land at No. 77 Kil-myth road, Aberdeen section of Brookline. The property is taxed on a valuation of \$8500, of which amount \$2500 is on the land. Charles H. Bowen of Brookline was the purchaser and will occupy the premises immediately.

Waban.
Joseph L. Gooch of Wakefield has sold his new frame dwelling, situated on Nesbore road, Waban, Mass., together with a lot of land containing 14,178

A Quiet Country Home

I've lately lived at the "Elmwood Inn,"

An hotel in Reading, Mass.

Which for wholesome hospitality

More pretentious ones surpass.

The house throughout is as clean as wax,

And everything spick and span;

"Mine Host" is practical in the works,

And a genial gentleman.

The prices seem quite reasonable.

Quite low—I'm forced to say

For the ample provender he serves.

Most delicious every way.

Only twelve miles out of Boston.

With conveniences replete;

For an outing in the country.

This place that can't be beat.

To them who may wish to find some place

For a few weeks' stay or so

I would recommend the Elmwood Inn

As one of the best I know.

THE HOME FORUM

First Steamboat on the Lakes

Walk-in-the-Water was a dividend payer.

THE first steamboat to ply regularly between ports on the Great lakes as a mechanical and commercial success to the extent of paying dividends to its owners was the Walk-in-the-Water. This singular name was suggested by an incident related by an old navigator of the lakes.

When Fulton first steamed his boat, the Clermont, up the Hudson in 1807 an Indian standing on the river bank exclaimed: "Walks in water!"

The man of the forest saw the paddle wheels revolving and comprehended that when a paddle struck the water there was a step forward. The name Walk-in-the-Water, however, being so long, was not generally used. Being the only boat of her class on Lake Erie, where she plied regularly, the new ves-

sel was usually designated as "The Steamboat."

This historic vessel, which well earned the title of pioneer steamboat on the Great lakes, was built early in 1818 at the mouth of Scagagunda creek, in the village of Black Rock. On her first trip, the Walk-in-the-Water stopped at Dunkirk and Erie and arrived off Cleveland about noon the following day.

"On Aug. 24, 1818," says an eye-witness, "an entire novelty—the like of which not one in 500 of the inhabitants had ever seen—presented itself before the people of Cuyahoga county. On that day the residents along the lake shore of Euclid saw upon the lake a curious kind of vessel making what was considered very rapid progress westward without the aid of sails, while from a pipe near its middle rolled forth a dark cloud of smoke, which trailed its gloomy length far into the rear of the swift gliding traveler over the deep."

"They watched its westward course until it turned its prow toward the harbor of Cleveland and then returned to their labors."

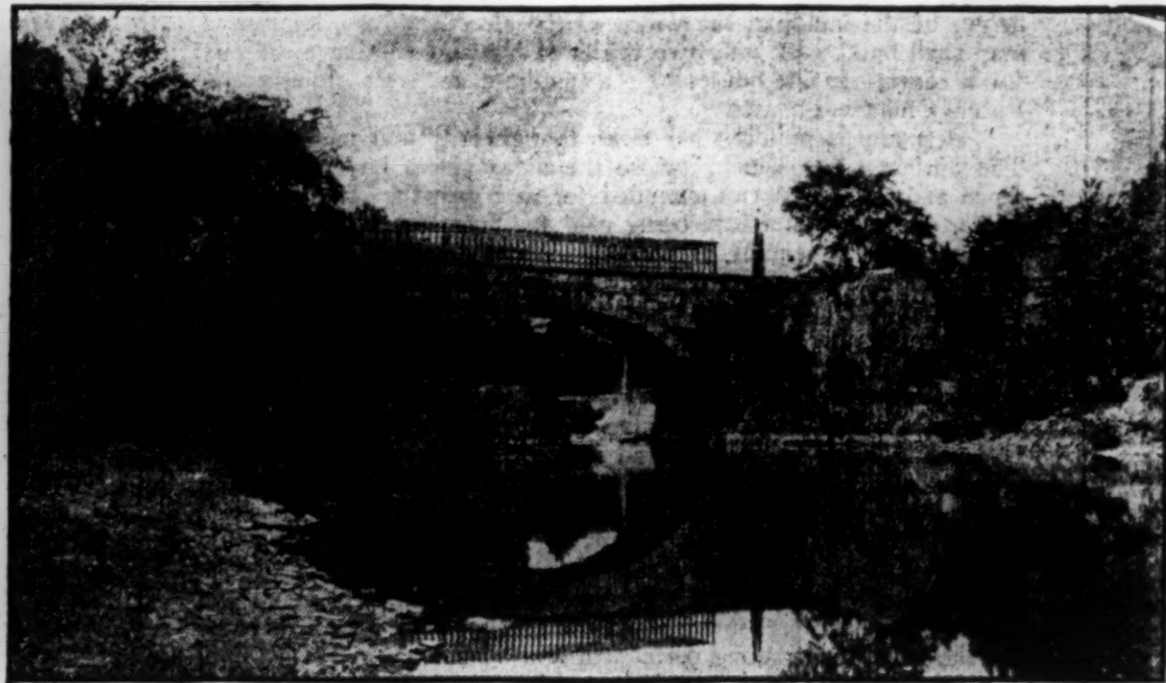

"Meanwhile the citizens of Cleveland, perceiving the approach of the monster, hastened to the lake shore to examine it. 'What is it? What is it? Where did it come from? What makes it go?' queried one and another of the excited throng. 'It's the steamboat! It's the steamboat!' That's what it is," cried others in reply. "Yes, yes! It's the steamboat!" was the general shout; and with ringing cheers the people welcomed the first vessel propelled by steam which had ever traversed the waters of Lake Erie.—Exchange.

Nut-Bearing Trees Are Needed

There are two main factors that make the planting of nut-bearing trees profitable; one is the nuts they will bear, and the other is the ultimate value of the trees themselves. As to the first consideration, many authorities express the opinion that the planting of nut trees ought to be encouraged and increased until the nuts are produced in large enough quantities to become a staple article of food, instead of merely a luxury, because they can to a very considerable extent be satisfactorily used in a mixed diet to take the place of meat, as they really are very nutritious and valuable as a food element. Even for use as a luxury alone the addition of thousands of acres of nut orchards to our present supply would be found profitable.

The value of the trees themselves may be shown by an actual example. An old farmer in Michigan, half a century ago, who was barely managing to make "both ends meet," had a son with an eye to the future, who, in spite of ridicule, went ahead and set out a lot of walnut trees on some rather unproductive low land. The trees were soon yielding a profitable crop each season, and a few years ago a furniture company bought the entire lot of trees for \$15,000. Without the trees the farm itself was worth scarcely \$5000.—Collier's Weekly.

ON THE PASSAIC RIVER

BRIDGE OVER THE PASSAIC, PATERSON, N. J.

PATERSON, N. J., is known to fame as the city of silk, but its other manufactures are many and its general enterprise is notable indeed. From a loss by fire of six million dollars, it has lately recovered phoenixlike, so that the Governor said, "Paterson, risen from the ashes, is a marvel of magnificence."

The remarkable feature of the city for visitors is the beauty of the Passaic river and the falls that, occurring in the center of the city, give it a unique scenic charm. The river above the falls is gay every summer day with boating and canoeing parties. Westside and Eastside parks are both on the river and with Garret and Breakneck mountains afford plenty of playground. High mountain, just north of Paterson, is the first land viewed from the steamer coming into New York harbor from abroad.

The river immediately below the falls is remarkable for the straight, high cliffs resembling in formation the Palisades of the Hudson. A glimpse of this rock formation is given in the cut, which shows one of the bridges across the Passaic river.

Paterson was founded in 1791 by Alexander Hamilton, to begin the industrial independence of the United States.

The Art of Gardening

French metropolis is giving three scholarships.

PROBABLY more money is spent annually in Paris for the maintenance of the flower beds in public squares and parks than in any other European city. Instead of choosing sturdy plants, which last several seasons and thrive without much care, the authorities take pride in offering the best selection of hothouse tulips, hyacinths and geraniums. The value that the municipality attaches to this subject has been recently attested by the creation of three scholarships for gardeners. The scholarships of \$240 each are to be awarded to the three men that stand highest in the competition whose requirements have been outlined by M. de Selves, the prefect of the Seine. The winners are to study the ways and means of improving the Parisian flora and they may locate either in the provinces or in a foreign country. After their investigations they are to submit a report to the city which will undoubtedly give them positions as municipal gardeners.

The task of the municipal florist is primarily that of finding out how effectively he can decorate the city for a given sum. This naturally entails a study of which flowers and foliage are best adapted to the soil, etc., but the municipality does not concern itself with the higher branches of horticultural research, such as the production of new shapes and colors in flowers.

The greatest number of floral novelties emanate from the firm of Villmorin, Andrieux & Co., the oldest and largest in Europe. They put on the market from 10 to 12 new types of chrysanthemums annually. This year their inventions include variations in the colors of dahlias, variation in the

shade of primrose leaves and carnations of a new shade, a salmon pink. These have been awarded a prize by the horticultural society.

The most beautiful rose garden in Paris is found in the heart of the Bois de Boulogne. It surrounds the chateau at Bagatelle which is municipal property. Unlike garden plots belonging to the city, the Bagatelle roses are not supplied by the municipal florist, but by different firms, which vie with each other in the magnificence of their displays. This spring the Bagatelle gardens offer a new attraction to Parisians, for over 100,000 tulips rival the roses in beauty. These tulips are a gift from Queen Wilhelmina of Holland, who sent them to M. Forrester, the keeper of Bagatelle, in exchange for rose bushes which have been planted in the royal gardens at The Hague.

Where the Souvenir Postals Are Made

Speaking of Germany, the fact is brought out by the bureau of statistics that that empire is the chief source of all imported paper and paper goods coming to the United States. More than \$7,000,000 out of the \$12,000,000 worth of paper goods used in the United States comes from Germany. The lithographic labels and prints comprise nearly half the total imports along this line, and are valued at about \$5,000,000 per year. On the other hand, American manufacturers have sold paper in foreign markets to the amount of \$80,000,000 during the 10 years past, but in the same period the United States has purchased \$70,000,000 worth of paper and paper goods from manufacturers abroad. Over 50 different countries have made separate enumerations of paper in their official statements of exports and imports, which shows that one of the potential products of today is that used in connection with printing, which is used in all nations and in all climes. The increased production and lower cost of paper for which the wood pulp is used have spread knowledge and aided in the development of the world as has no other single product of commerce. Without an abundant supply of paper, even the potent printing press would be like a great gun with no ammunition.—Joe Mitchell Chapple in National Magazine.

THE RIGHT WEAPONS

THE mental attitude of Christ Jesus was one utterly devoid of personal condemnation. At all times and under all circumstances he had only a blessing to confer upon friend or foe. He recognized error as "neither person, place nor thing" (Science and Health, p. 71), which enabled him to overcome it. Even the experience of Calvary called forth these remarkable words, "Father, forgive them, for they know not what they do." He lived and wrought in the consciousness of Love. His appearance among men was the highest manifestation of unselfed love the world had ever witnessed. He was the faithful sentinel of Love, ever on the alert to forbid the entrance of any unwelcome mental guest, and was "in all points tempted like as we are, yet without sin." His was a higher order of thinking than has ever been exercised by the worldly wise. His thoughts were "rooted and grounded in Love." For this reason they were powerful, positive and exact. They were the offspring of divine wisdom and intelligence, controlled by spiritual law. They were therefore operative to destroy all counterfeit thoughts supposed to originate in the brain or materiality, all thoughts of pain, weakness, disease, sorrow and sin. They were absolutely devoid of anything that maketh or worketh a lie. Divine Love was their Principle, cause and substance, hence their potency to heal, bless and save mankind.

In marked contrast with Jesus' scientific mental attitude is the haphazard materialistic thinking of modern times, which might be briefly summarized as a united effort to establish the reality of the very things that Christ Jesus came and lived to extirpate from human consciousness. Jesus healed the sick by thinking right concerning God and man. He neither employed nor advocated the use of material means in establishing the work of Truth. Modern religionists, however, strenuously oppose the demonstration of Christian healing and insist upon the use of material remedies. "One heaven of truth as presented in Christian Science is forcing an intelligent explanation of Jesus' method of healing, but the schools are slow to acknowledge even the possibility of such healing in this day and generation, notwithstanding the fact that thousands of bona-fide cases of healing in Christian Science have come under their observation to prove not only

the possibility but the practicability of Christian healing in this age.

In its effort to explain the modus of Jesus' healing and to estimate its importance in this age intellectual inconsistency has certainly reached a climax, so that in the future it is to be hoped that those who profess to believe in Christ and in the omnipotence of God

Origin of Games

The modern games are only ancient ones, often very little changed. Even the counting out rhymes of children, their "Ema, mena, mina, mo," and similar forms, which sound like gibberish, probably date from some forgotten language. "Shuttlecock" is a game with a very long history. Ball playing cannot be traced to its source. We read that the young St. Cuthbert "played at ball with the children that his fellowers were." Balls were tossed backward and forward with the hand till the use of racquets brought about tennis. As the kicking of a ball in the fields was the father of our modern football, so the game called stoolball is said to be the father of cricket. A three-legged stool was placed on the ground (hence the use of three wickets) and a boy stood in front of it—the ball was thrown and the player had to strike it back with his hand, to prevent its touching the stool. A piece of wood was soon used instead of the hand, and so cricket came about.—Exchange.

Chinese Satire?

This is how the editor of a paper in Peking, China, declines a manuscript: "Illustrious brother of the sun and moon! Look upon thy slave who rolls at thy feet, who kisses the earth before thee and demands of thy charity permission to speak. We have read thy manuscript with delight. We swear that never have we encountered such a masterpiece. Should we print it, thy majesty, the Emperor, would order us to take it as a criterion and never again to print anything which was not equal to it. As that would not be possible before 10,000 years, all trembling we return thy manuscript and beg thee ten thousand pardons. See—my hand is at my feet, and I am the slave of thy servant."—Primary Education.

Simple But Sufficient

THE modern world is so full of a number of intricate things that by contrast the following description of what is apparently a very simple device has interest for the general reader as well as for the farmer. The Toronto World would perhaps seem to hold a brief for the contraption, but one trusts its advocacy to be quite disinterested. At any rate this is what it has to say: Since 1896 the King drag has been before the rural residents of the United States, and by its use hundreds of miles of good roads have been maintained at little or no cost in the granger states. No report of the use of this valuable and simple remedy for bad roads is on record from Ontario, where it is more needed than anywhere else on the continent.

The use of the drag is little short of

fabulous, and the stories told of its effects are disbelieved by those who hear them for the first time, but a slight experience soon convinces the skeptical.

The drag is merely two heavy pieces of scantling, attached together so as to form an oblique frame, which slants across the road when the horses are hitched up so as to draw the loose material to the center. These two scantlings work wonders. They put a crown on the road. That drains it. It fills up ruts. As a result there are never any puddles. Puddles make holes, and with a proper crown and the resultant drainage there is an end to bad roads.

It is usual in the states where it has been used for the farmers to drag in front of their own farms. The result is a splendid smooth, rutless, level road all the way to town.

will be honest enough to admit that Christ Jesus meant what he said, that he actually performed the healing works attributed to him in the Gospels, and that the same signs should follow now as did then all who truly believe (understand). Until human consciousness is sufficiently purged of its materiality to divorce Christian healing from all thought of hypnotic suggestion or personal control there is little hope of salvation for the human race. The only weapons which Jesus employed in his healing ministry were love and truth. Can modern Christians use any other weapons than Jesus used and at the same time claim to be his followers or hope to reach his mental goal?

The inspired apostle caught the tone of Jesus' teaching when he said, "He that loveth not knoweth not God; for God is Love." Love inspires all right thinking. It is just as impossible to think accurately and scientifically without a heart full of love as it would be to live without God. One must learn to reflect Love

The President and Another Term

The Fall Mall Gazette regrets that the presidential smile cannot be reproduced by cable, saying:

It was reported by cablegram the other day that Mr. Taft had definitely said that one term was enough for him. This news turns out to have been a half-truth. The speech in question was given at a dinner of a college "fraternity," whose chairman had recommended a recipe for obtaining 25 successive terms at the White House. The President replied, with a smile and a chuckle, that the contemplation of 25 terms was more than he could stand; judging from the trouble and worry of getting through the first year of his first term, one term would be enough for him. He then took any serious edge off his remarks by continuing, "But seriously speaking, however," an utterance which occasioned vociferous cheering. It seems a pity that the resources of submarine telegraphy were unequal to the recording of the smile and the chuckle.

The Road to Youth

Since I resolved to look for Joys
In all created things,
To turn my back on what annoys
And hush all murmurings;

To look upon my neighbor as
A man who means me well,
And let the cloud that lowers pass
All heedless of its spell;

To seek the brighter side of all
That comes athwart my way,
And every morning to recall
Some happy bygone day;

To thrust from out my heart and mind
All evil thoughts and mean,
And everywhere I glance to find
Some beauty in the scene,

I find that though my days increase
My years diminish. Truth
To tell, the method brings me Peace
And holds me close to Youth!

—John Kendrick Bangs.

New Banking Methods

Mrs. Irma Franchere-Roach, a former Mason City girl who recently married Joseph Roach and with him went to live on a claim in South Dakota, with the aid of her husband has founded a bank at Faith, S. D., a new town in the newest part of that state, says the Des Moines Register and Leader. Mrs. Roach, who is a young lady of considerable energy, started out on a pony to make a canvass of the farmers and claimholders settled in the vicinity and before night came home with \$1000 in cash. With this as a nucleus for the deposits of the bank, the First Bank of Faith started. Faith is now some 60 miles from a railroad, but the line is surveyed through that section and Mr. and Mrs. Roach's farm happened to be the one selected by the road promoters for the site of the proposed town. The farm in part was laid out in town lots and at present there are 30 shacks with 16 more in the course of erection.

TODAY'S PUZZLE

A CHARADE.
My first New England's hardy sons
Were early taught to venerate.
Most to my next would claim a right
In gifts of commerce, church or state.
My whole is of my first a part,
And used with industry we see
Will aid to make a nation good,
Proppious and happy, strong and free.

ANSWER TO YESTERDAY'S PUZZLE.
Riddles: 1. Advice. 2. Hay.

He that of greatest works is Finisher
Oft does them by the weakest minister.
But most it is presumptuous in us, when
The help of heaven we count the act of men.

—Shakespeare.

About Talking Like a Book

SOME ONE has lately said that there is a prejudice among mankind to the effect that a book must not only look like a book but read like one. Literary English in other words is something different from conversational English, and even conversation in books has usually a different quality from ordinary speech. A completely rounded and "parsable" sentence is rather rare in ordinary conversation and those people who do "talk like a book" tend to tiresome pedantry. Their talk lacks sparkle (motion), takes itself too seriously, perhaps. What we think worth giving the authority of print, on the other hand, needs must have more quality, more effect of substance, even if it be not there. The ideas must be more fully clothed withal, eschewing the sketchy costume that does well enough in speech.

Any one who has tried to write conversation must appreciate this difference in style. If one writes the very words that are used by the parties to a most animated and delightful causerie the "go" of it is yet lacking. The glance, the vocal inflection, the whole sense of comradeship, that made the real life of the words as they were spoken is absent from the printed page. This is why literary English has to be different from spoken English, to appear seemly or be really expressive. It is, nevertheless, an interesting exercise to try to write out a bit of conversation exactly as people talk; and to study the vocabulary and style of spoken greetings or of conversation to see how far these usually fall short in finish of what one reads on the printed pages of the most realistic writers of conversation.

Science and Health

With Key to the Scriptures

The text book of Christian Science

Mary Baker Eddy

A complete list of Mrs. Eddy's Works on Christian Science with descriptions and prices will be sent upon application

ADDRESS

Allison V. Stewart

PUBLISHER

Falmouth and St. Paul Sts.
Boston, Mass.

The Christian Science Monitor

Published daily, except Sunday, by

The Christian Science Publishing Society

Falmouth and St. Paul Streets,
Boston, Mass., U. S. A.

Publishers of "The Christian Science Journal," "Christian Science Sentinel," "Der Herold der Christian Science," and other publications pertaining to Christian Science.

ARCHIBALD McLELLAN, Editor-in-Chief.
ALEXANDER DODDS, Managing Editor.

All communications pertaining to the conduct of this paper and articles for publication must be addressed to the Managing Editor.

Entered as Second Class at the Postoffice at Boston, Mass., U. S. A.

TERMS

Single copies, 2 cents. By carrier in the Greater Boston newspaper district, 12 cents the week.

SUBSCRIPTIONS BY MAIL PREPAID

In the United States, Canada and Mexico:

Daily, one year, \$5.00
Daily, six months, \$3.00

In all other countries additional postage at the rate of \$3.00 yearly is required.

All checks, money orders, etc., should be made payable to The Christian Science Publishing Society, Boston, Mass., U. S. A.

The Christian Science Monitor will be found on sale at all news-stands in New England, and in Christian Science Reading Rooms throughout the world.

Rates for advertising will be furnished upon application to the business department.
The publishers reserve the right to reject any advertisement.Long Distance Toll-Back Bay 4336

THE CHRISTIAN SCIENCE MONITOR

"First the blade, then the ear,  then the full grain in the ear."

EDITORIAL

Boston, Mass., Saturday, May 28, 1910.

Monday, May 30, will be officially observed in Boston as Memorial Day, and no newspaper will be issued from this office on that day.

Politics and Education

of the affairs of public schools be either wholesome or safe for the community.

James Russell Lowell said that "it was in making education not only common to all, but in some sense compulsory on all, that the destiny of the free republics of America was practically settled." This people will brook no interference with that destiny and will not tolerate plans that would hamper that education and cut off its light, and this is true of all parts of the country because the same principle applies to all. The danger to this republic of an attitude of open or furtive hostility toward public education cannot be enough impressed upon our citizens, whether that hostility be from an official who is supposed to be impartial toward all or from any body of men that prefer narrower views. The mayor says he is an ardent supporter of the public school system. Such being the case he will readily see that the free and full privilege of enlightenment is the people's birth-right and one to be most jealously guarded. Before this privilege mere questions of personal politics shrink into littleness and the real majesty of a great right is unfolded to us. The people must have this safeguard to freedom because it teaches that the noxious weeds of intolerance and ignorance quite shrivel up in the light that education sheds; by education alone do the people learn that demagogues are their worst friends and that not for an instant is the domination of false teaching to be endured.

The school that it is sought to establish here is one that shall equip for an honorable livelihood young men that by no means belong to the class of anatomical curiosities known as men born with silver spoons in their mouths, and before their chances are to be even hampered or postponed, good and solid reasons ought to be given for it. If it appears that the school committee are reckless in the spending of public money, and this can easily appear if their opponents be correct, then such quality should be tempered with more caution; but whoever may be in the right, the essential fact for the people of this country to be shown is that throughout the breadth of the United States no official, state, federal or municipal, or any body of any sort, shall presume to impede the healthy teaching of our youth.

WITH a quieter Fourth assured in many cities perhaps a less number of town people will feel that they must spend the forthcoming holiday in the country this year.

MODERN days are seeing many changes in China, one of the most radical of which is that just ordered in its currency. An edict has been issued stopping all coinage by provincial mints and establishing national decimal coinage throughout the empire. The viceroys in the various provinces have heretofore minted their own currency, from which they derived certain perquisites and advantages that they will now have to give up, much to their probable regret. Both Chinese and foreign commercial men will welcome the reform, although it may be some time before it gets into practical and general operation. Embraced in the new currency will be coins of the following denominations: Dollar, fifty cents, twenty-five cents and ten cents minted in silver; five cents minted in nickel and copper cash minted in copper.

Chinese trade has been handicapped for centuries by the confusion caused by numerous standards of value in the provinces. The new act, which simplifies the whole matter, is bound to be popular as soon as the coin it authorizes goes into circulation and the people become familiar with it. The Hongkong dollar today is equivalent to about 44 cents in United States currency, while the Shanghai tael is worth 59 cents. The value of the Peking tael fluctuates and is from 4½ to 6½ per cent higher than the Shanghai tael. The Tientsin tael is 26 cents higher than that of Shanghai, while the Hankow tael is between 2 and 4 per cent higher than the Shanghai.

One can readily perceive how everything was at sea so far as uniformity was concerned. Under the new order, all Chinese dollars will have a uniform value, and the change marks a long stride in financial progress.

IF OSCAR HAMMERSTEIN is to continue his present policy of engaging the world's famous operatic stars to sing "only in Chicago," that city may soon become the musical, as it already is the so-and-so and so-and-so, center of the United States.

Berlin City-Building Lesson

saving of money and in other respects. Why cannot the same thing be done here? It is a lesson we ought to learn. If it is necessary for us to go to the Old World for it, the sooner we set out the better.

An interesting competition was recently held for the best plans for the city of Berlin in the year 2000. This is looking far ahead, yet it is only by foresight and corresponding action that anything really worthy can be accomplished. Big prizes were offered and

THE action of his honor the mayor in refusing to sign the loan order for the appropriation for building the school of commerce in the city of Boston, though it may be prompted by consideration of economy, touches a matter in which all Americans are vitally interested. It makes us ask ourselves as well whether what seems to be a determined political opposition on the part of a public official to that body which has the direction

the winning plans are now to go on exhibition. Berlin has her territory divided into zones, and the developments and improvements are subject to strict municipal control and direction. The law in Berlin requires that, with some variations according to the height of the building, the width of the street, and the quarter, a man shall build upon only two thirds of his land and leave the rest for a court. In the houses of the middle class, trees, flowers and statuary fill these courts.

Germany is building her cities thoughtfully and methodically. The ancient walls which enclose the older places have been torn down and the boundaries extended for new growth. Parks, boulevards, docks and piers are being paid for from the sale of surplus land acquired in excess of needs. Water frontage is deemed a priceless possession. Munich, Dresden, Dusseldorf, Mannheim, Frankfurt, Cologne and Wiesbaden are vying with one another in the beautiful, the orderly and the serviceable.

Paris is much indebted to Baron Haussmann for its splendid appearance today, although it has long perceived the commercial value of municipal beauty and has steadily profited by it. London is exerting itself to remodel and improve certain districts. These changes cost immense sums and wise planning and good judgment might have rendered them unnecessary. Boston is not so large as its foreign sisters, but it is growing rapidly, as are most other American cities. Instead of allowing the suburbs to increase in a haphazard manner, let us urge upon them the adoption of a more careful, more comprehensive and more sensible plan, a plan that will provide for growth along permanent and admirable lines.

The Business Situation

SO MUCH irregularity prevails in commercial movements that an accurate estimate of conditions may be obtained only from the broadest viewpoint. On this basis much encouragement is found. If one were to take some particular lines of trade such as the copper metal industry, the cotton goods markets or one or two of the minor branches of commerce and view the whole situation from the viewpoint of any one of them it would not be difficult to see only the gloomy side of things. And it is by dwelling upon the few unfavorable conditions prevailing that many people are pessimistic as to the outlook. The situation, generally speaking, is favorable.

No better indication of prosperity can be found than that presented by immigration statistics. If the present ratio continues until the end of June more than a half million immigrants will have landed upon our shores since the first of the year. And there seems to be no doubt that these figures will prove correct, for there already have arrived from Europe at various Atlantic ports 444,337 aliens, a gain of 40,000 over the corresponding period last year. Steamship companies predict that the present year will witness the largest immigration of foreign laboring men ever known. As immigration is heavy only when there is a demand for labor it follows that the industries of the country are not only busy but are becoming daily busier. There are recessions here and there from the extreme activity of the year, but these are natural, and due in most cases to temporary causes incident to the particular business itself; but according to reports submitted from week to week to the mercantile agencies by correspondents throughout the United States and Canada the volume of trade is still large. Reports from Europe are more cheerful. Many of these say that European prosperity depends much upon that of America. If this be true our foreign neighbors have much to hope for; for if our crops turn out as present prospects indicate the addition to the wealth of this country from farm products will be the greatest in history.

The stock markets have been in a prolonged state of stagnation and depression. Many reasons have been advanced for this condition. None seems to be entirely satisfactory. There may be more or less truth in all of them. But one thing needful to remember is that stock markets do not regulate the country's crops nor the country's actual wealth. The depreciation in security prices since the first of the year amounting to several hundreds of millions is primarily due to lack of confidence. The business of the country is safe and the future promises still greater expansion.

AMAZING as it would have seemed had it been forecasted a score of years ago the present steamship record for crossing the Atlantic must, in turn, ere long have "gone glimmering through the dream of things that were." The steamship company now asking for bids on ships of the fastest type to ply over the shorter route between England and the mouth of the St. Lawrence is planning to bring the coasts of the Atlantic much nearer each other, when measured by the watch, than they have ever been before.

HAD Britain's popular author, Sir Arthur Conan Doyle, employed verse instead of prose in which to voice his fine appreciation of the new king wherein he says: "George V., in my opinion, is the strongest and biggest man mentally who has ever ascended the throne of England," there are those who would guess that sometime Sir Arthur might become a possible candidate for the poet laureateship of his realm. As conditions are his words of praise must be accepted as being as genuine as they are unusual.

THE irrepressible automobile continues to add new fields to its rapidly expanding world of conquest. Now that the road over Mont Cenis has been opened for its use, "over the Alps in an auto" is likely to become a part of the itinerary of many Americans and others touring Europe. The public mind is almost prepared to receive, without an amazing degree of surprise, the news of the arrival of the first automobile party at the tip-top of the Matterhorn.

MONTANA is developing rapidly. A hundred carloads of immigrants have passed St. Paul in a single day to take up lands there. Senator Carter tells of a family which picked its land at sunrise, started a steam plow in the afternoon, and, pitching a tent, sent to the nearest town before sunset for lumber to build a house.

ONLY two weeks intervene until the differences between the totals established by the census enumerators and those put forth by the "guessers" are to be made public. While the optimism of the latter will no doubt have to be greatly discounted, it is believed that the increase in population will be generally satisfactory.

NEW YORKERS are glad to learn that their grocers are no longer to include in the weight of the butter they buy the wooden dishes in which this commodity is commonly sold. To have to pay 40 cents a pound for ordinary lumber is an experience for which the over-taxed "ultimate consumer" does not "pine."

A Big Cotton Crop Wanted

THE cotton crop of 1909 was short, so short as to enable speculators to manipulate the market almost at their pleasure. The shortage has caused losses among manufacturers at home and abroad. In many instances the high prices have resulted in the shutting down of factories and the throwing of thousands of employees into idleness. Changed conditions have made it necessary to the prosperity of the South that the price of cotton shall not go too high, for the South is now a cotton-manufacturing as well as a cotton-producing section, and at present the hope of the cotton-growing states is that the crop of this year shall be one of the greatest on record. This will be necessary to the restoration of normal conditions.

The crop of last year is almost entirely sold. What remains of it is in the hands of a few speculators. Even with the release of all the cotton in sight at present the relief resulting would not be general. The market is prepared to take as great a crop as is likely to be raised. There is no danger of an oversupply or a serious break in prices. A short crop at the most would help only a few. The high prices resulting would be felt throughout the world.

Everywhere in the cotton belt the farmers are being urged and encouraged to raise every pound of cotton possible. The season has been backward. Much of the first planting was ruined by late winter blasts in the South. But the damage, generally speaking, has been repaired; the weather conditions have improved; the farmers are spurred on by the prospect of a ready market at good prices; and the bumper crop hoped for may be realized. If so, the South may count upon another record-breaking year of prosperity.

THE "Cape to Cairo railway," Cecil Rhodes' long cherished dream, promises soon to become a splendid material reality. With this great thoroughfare of transportation by rail in operation from the Mediterranean to the Cape of Good Hope, "the Dark Continent" is bound to be immeasurably illuminated by that lamp of progress and established civilization, the locomotive headlight.

The President at a Disadvantage

A SOUTHERN Democratic newspaper of a pronounced type not many days ago referred editorially to the prospective opposition in Congress to an allowance intended to meet any deficit that may have occurred in the appropriation made for the payment of the President's traveling expenses for last year, and was quite outspoken in criticism of Democrats in Congress, and especially of southern congressmen, who had displayed a disposition to make capital out of this matter. It maintained that the South should be thankful to President Taft, because, more than any other President in these later years, he had given recognition to that section, and more than any of his Republican predecessors had endeared himself, through personal contact, to the southern people.

It is not going too far to say that wherever Mr. Taft has appeared in the course of his travels since he became the country's chief magistrate the people have deemed his visits well worth the cost. Nevertheless, it must be said, and regretfully, that the President is at a disadvantage in the movement intended to cover last year's deficit by making the next annual appropriation of \$25,000 immediately available. The President's position has been made awkward and unfortunate by reason of his forgetfulness in regard to the economy that he preached during his travels.

It is true that these travels would not have been so expensive were it not for his good-natured responses to invitations from the officials and plain people of distant and widely separated states and communities. And it is true that the representatives of some of the states and districts that are pressing invitations upon him now that will involve heavy traveling expenses have been most ungenerous in their comments upon the expenses of his last year's tours. Yet it is equally true that Mr. Taft, during his travels of last year, pleaded earnestly in behalf of retrenchment in all departments of the government, and promised to do all in his power to keep the expenses of his administration down.

The President has not been consistent. In this case it is not the money but the example that counts.

IN THE light of the votes upon amendments to the railroad bill in the Senate on Thursday, which revealed a small but safe majority for the regulars, it is reasonable to anticipate the passage of the measure within a few days. An interesting present phase of the situation is the fact that party and factional lines are broken with great regularity when amendments contemplating vital changes in the President's favorite bill are voted upon. For example, in the case of the Martin amendment, requiring the interstate commerce commission to approve increases of rates before they become effective, while the vote resulted in reuniting for a moment the Republican factions, it caused a small insurrection in the Democratic ranks, four Democratic senators—Chamberlain, Clarke of Arkansas, Gore and McEnery—voting with the Republicans. On the Cummins amendment, to the same general effect as that offered by Senator Martin but in stronger terms, twelve Republican insurgents were found voting with the Democrats, while four Democrats—Bailey, McEnery, Smith of Maryland and Taylor—lined up with the regulars, and helped to defeat it by a vote of 43 to 29.

If the administration could depend upon votes of this proportionate strength from this time on its measures would have easy sailing, and adjournment in mid-June would be in sight. But this is more than can be expected even by the most optimistic as matters stand at present. While it is not likely that obstructive tactics will be adopted by the opposition allies, in the face of a popular demand for the speedier transaction of important business, it is not to be lightly assumed that the insurgents will wholly abandon their fight because of a few defeats, or because test votes are beginning to show that they never had as much strength as they have been credited with. They are not looking so much to victory in Congress as they are to the making of a record that will appeal strongly to the sympathy of voters in their home states and in the congressional districts.

An unbiased summary of the situation as it stands would show the regulars to be in a much better position, not only legislatively but politically, than they were a few weeks ago.

The Railroad Bill Probably
